Subject: Camden Update 9-11-2017

Dear Camden Citizens –

Below is a summary of items that have occurred at EWS from Saturday 9/02 through Friday 9/08. My previous update covered the period through Friday 9/01.

Pat.

- Continued to ship Aluminum Processing Waste Cell leachate off-site for disposal
- Industrial Waste Cell leachate will be sent to a new facility, awaiting analytical data before restarting shipments
- Treated Industrial Waste Cell leachate to prepare for off-site disposal
- Performed routine daily gas system and cover operation and maintenance activities
- Performed daily ammonia monitoring
- Continuing site clean-up and housekeeping activities
- Repaired stormwater erosion and worked on perimeter drainage on Industrial Waste Cell
- Repaired liquid level transducer in Aluminum Processing Waste Cell (damaged in recent storm)
- Second quarter groundwater sampling and testing produced detections for cadmium in MW-3 and MW-4
 - MW-4 detections (about half the MCL) were determined to be from laboratory error
 - MW-3 detections (above the MCL) were determined to be impacted by sample turbidity; assessment of MW-3 is ongoing
- Contractor pricing for Aluminum Processing Waste Cell closure is due on Friday September 15th
- A public meeting has been scheduled for Tuesday September 19th at the Benton County Courthouse
 - Meeting to start at 6:00 pm
 - Meeting to brief Camden citizens on activities at EWS since TDEC assumed operations
 - Citizens will also be briefed on upcoming cap construction
