**Subject:** Camden Update 12-4-2017

Dear Camden Citizens –

Below is a summary of items that have occurred at EWS from Saturday 11-25-2017 through Friday 12-01-2017. My previous update covered the period through Friday 11-24-2017.

Pat.

- Continued to ship Aluminum Processing Waste Cell leachate off-site for disposal
- Industrial Waste Cell leachate shipped off-site for disposal
- Performed routine daily gas system and cover operation and maintenance activities
- Performed daily ammonia monitoring
- Experiencing problem with ammonia monitor located on red barn; equipment vendor expected out this week to repair
- Repaired Gas Management System blower
- Installed new dedicated low-flow bladder pumps in all groundwater wells (these minimize sediment impacts during sampling)
- Repaired storm damage to scrim-reinforced geosynthetic cover on the Aluminum Processing Waste Cell
- Continuing site clean-up and housekeeping activities
- Continued engineering work on the Industrial Waste Cell closure design. Tentative closure dates include:
  - Design Package Release: December 22, 2017
  - Contractor Selection: February 5, 2018
  - Tentative Closure Construction Mobilization: March 27, 2018

Third quarter groundwater monitoring report is expected to be ready this week (for groundwater samples obtained in September 2017). When received by TDEC, this report will be posted to the EWS Information web page. Click [here](#) to view this web page.
