Subject: Camden Update 12-18-2017

Dear Camden Citizens –

Below is a summary of items that have occurred at EWS from Saturday 12-09-2017 through Friday 12-15-2017. My previous update covered the period through Friday 12-08-2017.

Pat.

- Continued to ship Aluminum Processing Waste Cell leachate off-site for disposal
- Industrial Waste Cell leachate was treated and stored prior to disposal
- Performed routine daily gas system and cover operation and maintenance activities
- Performed daily ammonia monitoring
- Fourth quarter 2017 leachate, groundwater, stream, and stream sediment samples were collected
- Repaired storm damage to scrim-reinforced geosynthetic cover on the Aluminum Processing Waste Cell
- Continuing site clean-up and housekeeping activities
- Continued engineering work on the Industrial Waste Cell closure design. Tentative closure dates remain unchanged and are:
 - Design Package Release: December 22, 2017
 - Contractor Selection: February 5, 2018
 - Tentative Closure Construction Mobilization: March 27, 2018

The third quarter groundwater monitoring report is expected to be posted today on the TDEC web page established for the EWS site (for groundwater samples obtained in September 2017). Click [here](#) to view this web page.
