Subject: Camden Update 9-24-2018

Dear Camden Citizens –

Below is a summary of items that have occurred at EWS from Saturday 9-15-2018 through Friday 9-21-2018. My previous update covered the period through Friday 9-14-2018. Thank you.

Pat.

- Continued to ship Aluminum Processing Waste Cell leachate off-site for disposal
- Industrial Waste Cell leachate continued to be treated and stored
- Performed routine daily gas system and cover operation and maintenance activities
- Performed daily ammonia monitoring
- Performed pipe camera inspection of the Industrial Waste Cell sump and associated leachate lines to determine condition prior to upcoming maintenance (system jetting)
- Removed and replaced leachate level transducer in the Aluminum Processing Waste Cell
- Closure Construction Activities Performed:
 - Activities at Aluminum Processing Waste Cell:
 - Began deploying and seaming 40 mil LLDPE geomembrane, deployment approximately 25% complete
 - Additional CQA personnel arrived on site to assist with documenting geomembrane installation and testing
 - Surveyors on site documenting geomembrane installation and testing
 - Activities at Industrial Waste Cell:
 - Limited activity at this cell this week as contractor concentrated on geomembrane installation
 - General Site Construction Activities:
 - Continued fill removal and shaping activities in the soil borrow area
 - Performed installation of stormwater control components (ditch check dams, energy dissipaters)
 - Weekly construction meeting held

The Closure Construction Site Visit was held on Thursday, September 20th. There were a number of construction activities taking place that day, including earthwork and geomembrane installation. The event appeared to be very successful, even the weather was very cooperative (if hot). Thanks to everyone who took time out of their busy day to attend.
