Subject: Camden Update 11-5-2018

Dear Camden Citizens –

Below is a summary of items that have occurred at EWS from Saturday 10-27-2018 through Friday 11-2-2018. My previous update covered the period through Friday 10-26-2018. Thank you.

Pat.

- Continued to ship Aluminum Processing Waste Cell leachate off-site for disposal
- Industrial Waste Cell leachate continued to be treated and stored
- Performed routine daily gas system and cover operation and maintenance activities
- Performed daily ammonia monitoring
- Performed monthly calibration on the two stationary and one portable ammonia monitors
- Closure Construction Activities Performed:
 - Activities at Aluminum Processing Waste Cell:
 - Deployed geocomposite drainage layer; deployment 95% complete
 - Tied-in 40-mil cap geomembrane to bottom liner extension (tie-in 95% complete)
 - Activities at Industrial Waste Cell:
 - Completed installation of 40-mil LLDPE bottom liner extension
 - Contractor installed rock and organic-free clay above bottom liner extension (clay placement 90% complete)
 - Contractor began installation of toe-drain
 - General Site Construction Activities:
 - Continued final grading of borrow area in preparation of seeding
 - Performed installation of stormwater control components (ditch check dams, energy dissipaters)
 - Weekly construction meeting held

Please note items of Recycling Ventures-related news. Because it appears that trespassers/vandals continue to enter the Recycling Ventures property, TDEC has placed concrete barriers and access prevention chains at the facility entrance to prevent unauthorized access. Additionally, "No Trespassing" signs have been ordered and will be

installed once they arrive. TDEC had previously removed the remaining piles of aluminum processing waste from the Recycling Ventures property.
