July 27, 2001

Ms. Nancy Lee, Chairman
Roane County Municipal Solid Waste Planning Region
223 Michael Drive
Rockwood, TN 37854

Dear Ms. Lee:

We have received the needed certification of approval by the Roane County Commission for the 5-year update to the 10-year solid waste plan. With this approval from the Roane County legislative body, the revision stands approved.

If you have questions or need assistance, please feel free to contact me at (615) 532-0744.

Sincerely,

[Signature]

223 Michael Drive
Rockwood, TN 37854

Dear Ms. Lee:

Thank you for your correspondence addressing comments on the update to the municipal solid waste plan for the Roane County Municipal Solid Waste Region.

You provided information that the Roane County Solid Waste Authority disbanded in May of 2000. If no such authority exists, TCA 68-211-815(b)(15) requires a certification of the county legislative body that they have reviewed and approved of the region's plan and/or revised plan. Since several additions have been made to the revision of the solid waste plan since the first draft that was emailed to this office in April of 2000, it is recommended that a complete package be prepared and presented to the Roane County Commission for review and approval. With this approval from the Roane County legislative body, the revision will stand approved.

Certification of approval by the Roane County legislative body should reach this office not later than September 18, 2001. If you have questions or need assistance, please feel free to contact me at (615) 532-0744.

Sincerely,

Rebecca Gorham,
Waste Reduction Section

Dear Mr. Graham,

Enclosed is the requested information to complete the review process of the 5-Year Update to the 10-Year Regional Solid Waste Plan for Roane County.

Please do not hesitate to contact me if you have any further questions or concerns.

Sincerely,

Ken Yager
Roane County Executive
March 5, 2001

Ms. Nancy Lee, Chairman
Roane County Municipal Solid Waste Planning Region
223 Michael Drive
Rockwood, TN 37854

Dear Ms. Lee:

We have received the fax from Mr. Patrick Guettner addressing the comments made in our letter dated October 18, 2000. The following items continue to need additional attention:

1. TCA 68-211-815(b)(2)(D) and (E) requires that at a minimum, each plan and revised plan submitted by a municipal solid waste region shall include a current system analysis of costs and revenues. Details for meeting this requirement were provided in Chapter 2 of the guidelines for preparing the 5-year update.

   a. Describe the costs and revenues involved in public funding for solid waste programs and expenses in the Region. Be sure to include capital cost considerations, staffing requirements, and operating expenses. It may be best to go jurisdiction by jurisdiction (cities, counties, Part 9 authorities). Is the current system satisfactory? Are revenues meeting costs? What new expenses and/or new fees or revenues are needed or anticipated?

   b. The Solid Waste Management Act states that each city, county, or Part 9 solid waste authority in the Region shall use uniform financial accounting methods and account for solid waste activities with a named designated special revenue or enterprise fund (for publicly owned landfills or incinerators) [T.C.A. 68-211-874(a)]. Do all the relevant jurisdictions in the Region meet with this requirement?

2. TCA 68-211-815(b)(15) requires a certification from the region's part 9 solid waste authority, if such an authority has been formed, or if no such authority has been formed, the county legislative body of each county in the region that they have reviewed and approved of the region's plan and/or revised plan.
Item 1.a.
Budgets for solid waste services of each municipality and the County are attached for the fiscal year 1998/99, as required for the 5-Year Update to the Roane County Solid Waste Region Plan. Also, a revised 10-year solid waste budget for the Region of Roane County is attached. A discussion of the description of costs and revenues for each jurisdiction is presented below.

Roane County:
From the copy of the attached budget, it can be determined that a combination of solid waste grants, recyclables sales and general fund appropriations make up the source of revenues for the solid waste budget in the County. Primarily, expenditures cover the operation of the convenience centers and disposal fee of the waste collected at the centers, operation of the Recycling Center and post-closure costs of the County sanitary landfill. The current system is satisfactory. Revenues are meeting costs. No new expenses, fees or revenues are anticipated.

City of Harriman:
From the attached budget, revenues are primarily from charges for collection services and property taxes. Expenditures cover both operations of residential and commercial solid waste and the drop-off recycling program. The current system is satisfactory. Revenues are meeting costs. No new expenses, fees or revenues are anticipated.

City of Rockwood:
From the attached budget, a combination of refuse collection fees from residents and businesses comprise the revenues. The majority of revenues come from fees. Expenditures cover the direct solid waste collection service for residents and businesses. The current system is satisfactory. Revenues are meeting costs. No new expenses, fees or revenues are anticipated.

City of Oliver Springs:
From the attached budget, revenues are acquired from property taxes. Primarily expenditures provide direct solid waste collection service for residents and businesses. The current system is satisfactory. Revenues are meeting costs. No new expenses, fees or revenues are anticipated.

City of Kingston:
From the attached budget, a combination of property tax and commercial collection fees comprise the revenues to support solid waste collection in the City. The majority of the revenues is from property taxes. Primarily, expenditures cover the operation of the solid waste collection services for city residents. The current system is satisfactory. Revenues are meeting costs. No new expenses, fees or revenues are anticipated.
**Item 1.b.**
All jurisdictions in the Region use uniform financial accounting methods, and account for solid waste activities with a named designated special revenue fund. There are no publicly operating Class I landfills in the Region. Therefore, no enterprise fund is necessary for the Region.

**Item 2.**
The Roane County Solid Waste Authority disbanded May 10, 2000. Supporting documentation is attached.

**Item 7.**
The Roane County Solid Waste Coordinator presently is:

Margaret Hughes  
Roane County Recycling Center  
215 White Pine Road  
Harriman, TN 37748  
(865) 590-7779  
(865) 590-1251
a. Certification of approval from required local parties must be included before the revised plan can be approved by this office.

7. Please update information in Chapter 5 relating to Roane County Solid Waste Manager.

The information requested above should reach this office not later than June 5, 2001. If you have questions or need assistance, please feel free to contact me at (615) 532-0744.

RE: Five-Year Update to Ten-Year Solid Waste Plan

Dear Ms. Lee:

The Department of Environment and Conservation has not received a reply to the comments due on June 5, 2001 concerning the Five-Year Update to the Ten-Year Solid Waste Plan for the Roane County Solid Waste Planning Region.

The Region must submit the required response within 90 days of receipt of this letter. Otherwise, the region and jurisdiction(s) within the region may lose eligibility for grants from the Solid Waste Management Fund. If non-compliance continues, additional sanctions may follow [T.C.A. 68-211-816].

I am certain that the Roane County Solid Waste Planning Region will give these issues the serious consideration that is warranted. If you need additional information, please contact Louis Bordenave with the Division of Community Assistance, at 615-532-0095.

Sincerely,

Milton H. Hamilton, Jr.

Rockwood, TN 37854

Dear Ms. Lee:

We have reviewed the draft copy of the ten-year plan revision faxed to us for Roane County MSW Region. The draft provided a good deal of information toward a plan for the Region. The following items need additional attention:

1. TCA 68-211-815(b)(2)(C) requires that at a minimum, each plan and revised plan submitted by a municipal solid waste region shall include a current system analysis of disposal capability, including an analysis of the remaining life expectancy of landfills or other disposal facilities.
   
a. While the Region can not control many factors relating to landfills outside the region, the life expectancy of each landfill in the state is reported by the Division of Solid Waste Management in the Department of Environment and Conservation. The Region can review this information periodically to be aware of any upcoming limitations in disposal capacity. A copy of the Life Remaining Survey of Class I Landfill Sites in Tennessee for 2000 is enclosed. According to the survey, Chestnut Ridge landfill only has 6 years and 6 months remaining. Rhea County landfill has 10 years and 10 months. A discussion of limitations due to life expectancy needs to be included.

2. TCA 68-211-815(b)(2)(D) and (E) requires that at a minimum, each plan and revised plan submitted by a municipal solid waste region shall include a current system analysis of costs and revenues. Details for meeting this requirement were provided in numbers 11 and 13 of Chapter 2 of the guidelines for preparing the 5-year update. An additional copy of the guidelines is enclosed.
3. TCA 68-211-815(b)(5) and (6) requires that at a minimum, each plan and revised plan submitted by a municipal solid waste region shall include anticipated waste capacity needs, planned capacity assurance, including descriptions of planned or needed facilities.

   a. In Chapter 3, numbers 5 and 6 you identify anticipated growth in the Region. How is this growth expected to impact solid waste management and how is the Region prepared to handle the growth?

4. TCA 68-211-815(b)(2)(C) requires that at a minimum, each plan and revised plan submitted by a municipal solid waste region shall include a plan for the disposal of household hazardous waste.

   a. Comments in chapter 7, number 3, indicate the need for a permanent collection facility. Please provide more details of how the Region plans to meet this requirement. (i.e. will the Region continue to rely on the state's Household Hazardous Waste Program to meet this requirement?)

5. TCA 68-211-815(b)(11) requires that at a minimum, each plan and revised plan submitted by a municipal solid waste region shall include a description of education initiatives aimed at businesses, industries, schools, citizens and others, which addresses recycling, waste reduction, collection and other goals of this part.

   a. In Chapter 8, you identify a Keep Roane Beautiful program and the Roane County Recycling Center as providing solid waste education for the Region. A limited description of the programs is provided. Please include more details such as the successes and level of participation in these programs.

6. TCA 68-211-815(b)(15) requires a certification from the region's part 9 solid waste authority, if such an authority has been formed, or if no such authority has been formed, the county legislative body of each county in the region that they have reviewed and approved of the region's plan and/or revised plan.

   a. Certification of approval from required local parties must be included before the revised plan can be approved by this office.

7. In Chapter 3 on waste stream, you identify at least 50 illegal dumps. Identify needs and plans to address this problem?

8. Please update information in Chapter 5 relating to Roane County Solid Waste Coordinator.

The information requested above should reach this office not later than January 18, 2001. If you have questions or need assistance, please feel free to contact me at (615) 532-0744.

RE: Five-year Update to Ten-year Solid Waste Plan
Roane Co. Municipal SW Planning Region SW Region Ten-year Solid Waste Plan

Dear Ms. Lee:

We have received a Five-year Update to the Roane Co. Municipal SW Planning Region SW Region Ten-year Solid Waste Plan, submitted by Ms. Dena Rue, Solid Waste Coordinator. According to our records, your Revised Plan was due to be submitted by December 1, 1999, and you received a Commissioner’s Warning letter regarding non-submittal, dated January 6, 2000. We received the referenced revised plan on April 4, 2000. Division staff will review the plan within the next 90 days as required by The Solid Waste Act of 1991.

If you need additional information or have further questions, please contact Karen Grubbs at 615-532-0463.

Sincerely,

Ron Graham

RE: Five-Year Update to Ten-Year Solid Waste Plan

Dear Ms. Lee:

The Department of Environment and Conservation has not received the Solid Waste Planning Region Five-Year Update Report for the Roane County Solid Waste Planning Region. The Solid Waste Management Act of 1991 [T.C.A. 68-211-814 (2)] requires that these reports be revised every five years after the plan's initial approval. The Roane County report was due to the Division of Community Assistance on December 1, 1999.

The region must submit the required report within thirty days of receipt of this letter. Otherwise, the region and jurisdiction(s) within the region may lose eligibility for grants from the Solid Waste Management Fund. If non-compliance continues, additional sanctions may follow [T.C.A. 68-211-816].

I am certain that the Roane County Solid Waste Planning Region will give these issues the serious consideration that is warranted. If you need additional information, please feel to contact Karen Grubbs, with the Division of Community Assistance, at 615-532-0463.

Sincerely,

Milton H. Hamilton, Jr.

RE: Five-year Update to Ten-year Solid Waste Plan
Roane County SW Region
Region Member(s): Roane
Report Due — December 1, 1999

Dear Ms. Lee:

As you are aware, the Solid Waste Management Act of 1991 requires the Solid Waste Regions to plan, monitor, and report on solid waste activities. One of the requirements of this legislation was for each region to prepare a Ten-year Solid Waste Management Plan. The legislation also requires that Five-year updates to those plans be prepared and submitted to the state for review. The Roane County Region’s Ten-year plan was approved on December 1, 1994; therefore, your Five-year update report is due to this office by December 1, 1999.

Also required by the Solid Waste Act is submittal of a Needs Assessment report for all of the counties within each Development District. The initial Assessment report was due by September 30, 1992, with revisions due by April 1, 1999 and every five years after that. The Needs Assessment report for your region has not been received. Please contact Mr. Bob Freeman with the East TN Development District to determine the status of your Region’s Needs Assessment report. The Needs Assessment will provide much of the information necessary for the preparation of the Five-year Update to your Ten-year Plan.

I am confident you will give due attention to your Five-year update to the Ten-year Solid Waste Management Plan. If you have any concerns, I encourage you to contact Mr. Mark McAdoo with DCA at 615-532-4967.

Sincerely,

1. TCA 68-211-815(b)(2)(D) and (E) requires that at a minimum, each plan and revised plan submitted by a municipal solid waste region shall include a current system analysis of costs and revenues. Details for meeting this requirement were provided in Chapter 2 of the guidelines for preparing the 5-year update.
   a. Describe the costs and revenues involved in public funding for solid waste programs and expenses in the Region. Be sure to include capital cost considerations, staffing requirements, and operating expenses. It may be best to go jurisdiction by jurisdiction (cities, counties, Part 9 authorities). Is the current system satisfactory? Are revenues meeting costs? What new expenses and/or new fees or revenues are needed or anticipated?
   b. The Solid Waste Management Act states that each city, county, or Part 9 solid waste authority in the Region shall use uniform financial accounting methods and account for solid waste activities with a named designated special revenue or enterprise fund (for publicly owned landfills or incinerators) [T.C.A. 68-211-874(a)]. Do all the relevant jurisdictions in the Region meet with this requirement?

2. TCA 68-211-815(b)(15) requires a certification from the region's part 9 solid waste authority, if such an authority has been formed, or if no such authority has been formed, the county legislative body of each county in the region that they have reviewed and approved of the region's plan and/or revised plan.
Item 1.a.
Budgets for solid waste services of each municipality and the County are attached for the fiscal year 1998/99, as required for the 5-Year Update to the Roane County Solid Waste Region Plan. Also, a revised 10-year solid waste budget for the Region of Roane County is attached. A discussion of the description of costs and revenues for each jurisdiction is presented below.

Roane County:
From the copy of the attached budget, it can be determined that a combination of solid waste grants, recyclables sales and general fund appropriations make up the source of revenues for the solid waste budget in the County. Primarily, expenditures cover the operation of the convenience centers and disposal fee of the waste collected at the centers, operation of the Recycling Center and post-closure costs of the County sanitary landfill. The current system is satisfactory. Revenues are meeting costs. No new expenses, fees or revenues are anticipated.

City of Harriman:
From the attached budget, revenues are primarily from charges for collection services and property taxes. Expenditures cover both operations of residential and commercial solid waste and the drop-off recycling program. The current system is satisfactory. Revenues are meeting costs. No new expenses, fees or revenues are anticipated.

City of Rockwood:
From the attached budget, a combination of refuse collection fees from residents and businesses comprise the revenues. The majority of revenues come from fees. Expenditures cover the direct solid waste collection service for residents and businesses. The current system is satisfactory. Revenues are meeting costs. No new expenses, fees or revenues are anticipated.

City of Oliver Springs:
From the attached budget, revenues are acquired from property taxes. Primarily expenditures provide direct solid waste collection service for residents and businesses. The current system is satisfactory. Revenues are meeting costs. No new expenses, fees or revenues are anticipated.

City of Kingston:
From the attached budget, a combination of property tax and commercial collection fees comprise the revenues to support solid waste collection in the City. The majority of the revenues is from property taxes. Primarily, expenditures cover the operation of the solid waste collection services for city residents. The current system is satisfactory. Revenues are meeting costs. No new expenses, fees or revenues are anticipated.
**Item 1.b.**
All jurisdictions in the Region use uniform financial accounting methods, and account for solid waste activities with a named designated special revenue fund. There are no publicly operating Class I landfills in the Region. Therefore, no enterprise fund is necessary for the Region.

**Item 2.**
The Roane County Solid Waste Authority disbanded May 10, 2000. Supporting documentation is attached.

**Item 7.**
The Roane County Solid Waste Coordinator presently is:

Margaret Hughes  
Roane County Recycling Center  
215 White Pine Road  
Harriman, TN 37748  
(865) 590-7779  
(865) 590-1251
a. Certification of approval from required local parties must be included before the revised plan can be approved by this office.

7. Please update information in Chapter 5 relating to Roane County Solid Waste Manager.

The information requested above should reach this office not later than June 5, 2001. If you have questions or need assistance, please feel free to contact me at (615) 532-0744.

Sincerely,

[Signature]

Rebecca Gorham,
Waste Reduction Section

Cc: The Honorable Ken Yager, Roane County Executive
    Mr. Patrick Guettner, Roane County Solid Waste Coordinator
    Mr. Mitch Loomis, East TN Development District
    Ms. Chris Garkovich, CTAS Solid Waste Management Consultant
    Mr. Mark Penland, Knoxville EAC Coordinator

ACTIVITY DESCRIPTION

This Fund provides for the collection and disposal of all residential solid wastes generated in the City. The goal is to contribute to the health and welfare of the community by providing a quality level of refuse collection, while at the same time, continually striving to identify and recommend measures which improve the efficiency of the service to the public. State legislation adopted in 1992 required the City to establish a separate fund to account for solid waste management expenditures.

Residential collection is performed once a week at the back door and once a week at curbside for recyclable items. The City contracts with Browning-Ferris Industries (BFI) for the collection and disposal of residential solid waste. The current contract, which is in effect until June 30, 2001, provides for annual increases in contract payments determined by a formula calculated on an increase of 90 percent of the change in the Consumer Price Index. The contractor is also responsible for the operation of a convenience center for disposing of residential waste and recyclable items, budgeted at a cost of $254,620 for fiscal 1999. The increase in expenditures for this Fund in fiscal 1997 were the result of a new five year contract agreement with BFI resulting in significantly higher costs for the operation of the convenience center, up 242%, and residential solid waste collection, up 38%.

Other items budgeted in this activity include $9,400 for an annual spring clean-up and $21,720 for annual brush collection, both under contract for services with BFI. The budget also includes $62,490 for mulching brush and Christmas Trees, which is then distributed free of charge to citizens.

Funding for all services accounted for in the Solid Waste Fund have previously been provided through an operating transfer from the General Fund. Beginning July 1, 1998, a $5 per month refuse fee will be charged to residential utility customers on their utility bill. The revenues from these charges will be accounted for in the Solid Waste Fund and utilized to fund a portion of the costs of residential refuse collection. Commercial utility customers will not be charged, as the City does not provide commercial refuse collection.

PERFORMANCE OBJECTIVES

1. Ensure that complaints of missed collection service remain at or below one percent of services delivered.
2. Assist the Contractor in maintaining a level and quality of service that will lessen complaints.

RESOLUTION # 03-00-10 (AS AMENDED)
A RESOLUTION DISSOLVING THE ROANE COUNTY SOLID WASTE AUTHORITY.

WHEREAS, the Roane County Solid Waste Authority was established by Resolution of the Roane County Commission pursuant to Tennessee Code Annotated Section 68-31-904 (now TCA 68-211-211-903), and

WHEREAS, since 1993 the Solid Waste Authority has administered the Roane County Landfill in an efficient manner, and,

WHEREAS, the Roane County Landfill is closed and there is no further need for an Authority.

NOW, THEREFORE, BE IT RESOLVED, that the Roane County Commission does hereby dissolve the Roane County Solid Waste Authority, effective June 30, 2000.

BE IT FURTHER RESOLVED that both the assets and liabilities of the Authority will pass to the Roane County Government which will receive all assets and assume the liability of the landfill.

BE IT FURTHER RESOLVED that a copy of this resolution should be sent to each participating City Governments.

Motion to adopt as amended was made by Commissioner Harmon with second by Commissioner Easter.

Motion Passed upon unanimous voice vote.

THEREUPON, the County Chairman announced to the Commission that said resolution had received a constitutional majority and ordered same spread of record.

APPROVED:

[Signed]

County Chairman

The foregoing resolution was submitted to the County Executive for his consideration this __________ day of May, 2000.

ATTESTED:

[Signed]

County Clerk

I approve/reject the foregoing resolution this the __________ day of __________, 2000.

[Signed]

[Approved by County Executive Ken Vager at the request of the Roane County Solid Waste Authority.]

RE: Five-Year Update to Ten-Year Solid Waste Plan

Dear Ms. Lee:

The Department of Environment and Conservation has not received a reply to the comments due on June 5, 2001 concerning the Five-Year Update to the Ten-Year Solid Waste Plan for the Roane County Solid Waste Planning Region.

The Region must submit the required response within 90 days of receipt of this letter. Otherwise, the region and jurisdiction(s) within the region may lose eligibility for grants from the Solid Waste Management Fund. If non-compliance continues, additional sanctions may follow [T.C.A. 68-211-816].

I am certain that the Roane County Solid Waste Planning Region will give these issues the serious consideration that is warranted. If you need additional information, please contact Louis Bordenave with the Division of Community Assistance, at 615-532-0095.

Sincerely,

[Signature]

Milton H. Hamilton, Jr.

Ms. Nancy Lee, Chairman
Roane County Municipal Solid Waste Planning Region
223 Michael Drive
Rockwood, TN 37854

Dear Ms. Lee:

We have received the fax from Mr. Patrick Guettner addressing the comments made in our letter dated October 18, 2000. The following items continue to need additional attention:

1. TCA 68-211-815(b)(2)(D) and (E) requires that at a minimum, each plan and revised plan submitted by a municipal solid waste region shall include a current system analysis of costs and revenues. Details for meeting this requirement were provided in Chapter 2 of the guidelines for preparing the 5-year update.

   a. Describe the costs and revenues involved in public funding for solid waste programs and expenses in the Region. Be sure to include capital cost considerations, staffing requirements, and operating expenses. It may be best to go jurisdiction by jurisdiction (cities, counties, Part 9 authorities). Is the current system satisfactory? Are revenues meeting costs? What new expenses and/or new fees or revenues are needed or anticipated?

   b. The Solid Waste Management Act states that each city, county, or Part 9 solid waste authority in the Region shall use uniform financial accounting methods and account for solid waste activities with a named designated special revenue or enterprise fund (for publicly owned landfills or incinerators) [T.C.A. 68-211-874(a)]. Do all the relevant jurisdictions in the Region meet with this requirement?

2. TCA 68-211-815(b)(15) requires a certification from the region's part 9 solid waste authority, if such an authority has been formed, or if no such authority has been formed, the county legislative body of each county in the region that they have reviewed and approved of the region's plan and/or revised plan.
a. Certification of approval from required local parties must be included before the revised plan can be approved by this office.

7. Please update information in Chapter 5 relating to Roane County Solid Waste Manager.

The information requested above should reach this office not later than June 5, 2001. If you have questions or need assistance, please feel free to contact me at (615) 532-0744.

Sincerely,

Mr. Mitch Loomis, East Tennessee Development District
Mr. Mark Penland, Knoxville EAC Coordinator
Item 1.

A current system analysis of disposal capability will be conducted in 2001. An analysis of the remaining life expectancy of landfills we use or plan to use will be incorporated. At the present time Roane County no longer uses the Chestnut Ridge Landfill in Knox County, but uses exclusively the Rhea County Landfill which has a life expectancy of over 10 years. Our hauling and disposal contractor, Waste Services of Tennessee, operates the Rhea County Landfill, and during our negotiations with Waste Services in June, 2000, Waste Services projected that the life expectancy would be upwards of 20 years with their planned purchase of additional acreage in the future for expansion there. This landfill is only 30 miles from the Recycling Center in Roane County and is easily accessible from all the 12 Convenience Centers in Roane County. This proximity expedites the hauling and disposal of our garbage and thus provides economical advantages as well.

Item 2.

A current system for an analysis of costs and revenues for the Roane County operations is in place and maintained by the Budget Director for the County. System data is reviewed on a weekly basis with the Budget Director.

Item 3.

Moderate growth in this region and county is expected. The county population is about 50,000, up from about 40,000 over the last ten years. The county has 14 convenience centers which is 9 more than the 5 required. These Centers have reached about 50% capacity in terms of use. They will handle any growth anticipated for the next ten years. The Recycling Center is operating at about 75% capacity and can and will be enlarged as growth dictates. The same holds true for the Convenience Centers. Compaction equipment can be added to most of these Centers should the need arise. Plans will be developed over the next two years to address anticipated usage of all these facilities.

Item 4.

Two Household Hazardous Waste Collection Days were held in 2000 with almost 1000 households participating. Another is planned in June, 2001. Also, an Electronics Equipment and Hazardous Waste Day is planned for April 7, 2001. These regular events are planned on a continuing basis, and the periodicity will be accelerated. These hazardous waste collection events are planned according to the Policy Guide for the State of Tennessee. The planning and implementation utilize citizen volunteers and are extensively documented.
Item 5.

Education initiatives are utilized and aimed at all waste generators. These initiatives include:

1. Regular local television shows featuring the Solid Waste Manager, County Executive, and Keep Roane Beautiful personnel
2. Articles in the local newspaper
3. Flyers, brochures and other literature handed out at the Recycling Center and Convenience Centers
4. Talks by Solid Waste Department personnel to school and civic audiences
5. Announcements on local radio stations on upcoming events

All these media avenues were utilized during the last Hazardous Waste Collection Day. The level of participation involved almost 500 households and was deemed a great success by all. Participation came from various civic groups such as Boy Scouts as well as Keep Roane Beautiful and citizen volunteers.

Item 6.

Certification from the newly revamped Solid Waste Regional Board is forthcoming.

Item 7.

The Solid Waste Department is working in cooperation with Keep Roane Beautiful in identifying and cleaning up these illegal dumps. A priority list is being established and the assistance of the Michael Dunn Center is continuing in the cleanup effort. Also citizens doing community service work under sentencing from local judicial bodies are being utilized to assist in the cleanup.

Item 8.

A new Solid Waste Manager was hired and began work on June 1, 2000. His title is Solid Waste Manager, not Solid Waste Coordinator. He is full time, managing over 40 employees. His education includes an engineering degree from UTK and a law degree from the University of Memphis. He has broad experience in many areas of project management, engineering, safety, quality, as well as hazardous waste management.
(a) Each plan and revised plan submitted by a municipal solid waste region pursuant to this part shall be consistent with the state solid waste plan, with the provisions of this part, with all other applicable provisions of law and with any regulation promulgated by the department.

(b) At a minimum, each plan and revised plan submitted by a municipal solid waste region shall include the following:

1. **Demographic information**;
2. **A current system analysis of**:
   - (A) **Waste streams**, including data concerning types and amounts generated;
   - (B) **Collection capability**, including data detailing the different types of collection systems and the populations and areas which receive and do not receive such services;
   - (C) **Disposal capability**, including an analysis of the remaining life expectancy of landfills or other disposal facilities;
   - (D) **Costs**, using a full-cost accounting model developed by the commissioner, including costs of collection, disposal, maintenance, contracts and other costs; and
   - (E) **Revenues**, including cost reimbursement fees, appropriations and other revenue sources;
3. **Adoption of the uniform financial accounting system** required by § 68-211-874;
4. **Anticipated growth trends** for the next ten-year period;
5. **Anticipated waste capacity needs**;
6. **Planned capacity assurance**, including descriptions of planned or needed facilities;
7. **A recycling plan**, including a description of current public and private recycling efforts and planned efforts to enhance recycling within the county or region;
8. **A plan for the disposal of household hazardous wastes**;
9. **Adoption of uniform reporting requirements** as required by this part;
10. **A description of waste reduction activities** designed to attain the twenty-five percent (25%) reduction required by § 68-211-861;
11. **A description of education initiatives** aimed at businesses, industries, schools, citizens and others, which addresses recycling, waste reduction, collection and other goals of this part;
12. **An evaluation of multi-county solid waste disposal region options** with an explanation of the reasons for adopting or failing to adopt a multi-county regional approach;
13. **A timetable for implementation** of the plan;
14. **A description of the responsibilities** of the various participating jurisdictions;
15. **A certification** from the region's part 9 solid waste authority, if such an authority has been formed, or if no such authority has been formed, the county legislative body of each county in the region that they have reviewed and approved of the region's plan and/or revised plan; and
16. **Any other information** as the commissioner may deem relevant to the implementation of this part.

RE: Five-year Update to Ten-year Solid Waste Plan
Roane Co. Municipal SW Planning Region SW Region Ten-year Solid Waste Plan

Dear Ms. Lee:

We have received a Five-year Update to the Roane Co. Municipal SW Planning Region SW Region Ten-year Solid Waste Plan, submitted by Ms. Dena Rue, Solid Waste Coordinator. According to our records, your Revised Plan was due to be submitted by December 1, 1999, and you received a Commissioner's Warning letter regarding non-submittal, dated January 6, 2000. We received the referenced revised plan on April 4, 2000. Division staff will review the plan within the next 90 days as required by The Solid Waste Act of 1991.

If you need additional information or have further questions, please contact Karen Grubbs at 615-532-0463.

Sincerely,

Ron Graham
Director

Mr. Mark Penland, Coordinator, Knoxville Environmental Assistance Center
Roane County 5-year Planning Update prepared by Dena Rue, Roane County Solid Waste Coordinator

(Reformatted to reduce number of pages to print. KLG 4/30, 2000)
CHAPTER 1: SUMMARY

Since approval of the 10-year Solid Waste Plan, Roane County has invested approximately $500,000 in a MRF, problem waste collection center, and construction/demolition transfer station. These components of Roane County’s Solid Waste System were collectively named, the Roane County Recycling Center. Participation at this location is welcomed by all jurisdictions within the region. Goals for the center have included the following:

1. Provide a place for residents to drop off problem wastes: tires, oil, car batteries, appliances, furniture, construction materials, wood waste, and recyclables at a central location.

2. Recycle materials which were previously landfilled: wood waste, tires, oil, appliances

3. Divert construction/demolition materials from class I to class IV landfill.

4. Provide opportunities for the public to recover furniture and other household goods by providing a covered shelter to keep them dry and usable.

5. Provide opportunities for a local sheltered workshop’s clients to learn job skills.

6. Provide local businesses with free disposal of cardboard, paper, scrap metal, and other recyclables.

7. Provide a means to process materials collected within Roane county and surrounding counties.

8. Establish more opportunities for recycling throughout the county by providing more widespread dropoff locations at the county’s convenience centers.

9. Educate citizens and expand collection efforts to reduce illegal dumping. Targeted wastes include: tires, appliances, mattresses, furniture, and automotive gas tanks.

10. Generate enough revenues to pay operating expenses.

During the last year, the county waste reduction program has expanded considerably. The Roane County Recycling Center now has 7 locations at convenience centers throughout the county for recyclable materials drop off. The Seven locations include: Swan Pond, Post Oak, Pumphouse, Orchard View, Clax Gap, North Gallaher, and South 58. Materials are collected by a county owned rolloff truck and brought to the Recycling Center MRF. The materials are then processed by a combination of Michael Dunn Workers (a sheltered workshop), local jail inmates, and community service workers. Materials processed at the MRF include steel cans, aluminum cans, cardboard, mixed paper, newspaper, #1 and #2 plastics, and sorted glass containers. After processing, most materials are
sold through the Recycling Marketing Cooperative for Tennessee (RMCT). This organization has been a key player in making markets readily available to the county.

In 1999, the county also began to accept materials from two private haulers, BFI and Tennessee Waste Movers. BFI brings 5 tons per week of cardboard which are picked up at businesses in Roane and Loudon counties. Tennessee Waste Movers brings mixed recyclables from West Knoxville and Loudon County. This has allowed the county to regionalize recycling efforts.

In addition to household recyclables processing, the center also serves as a problem waste collection point. By taking advantage of the state’s waste tire program, the county has successfully begun collecting and recycling tires, which were previously landfilled. The county is diverting wood waste to a mulching program. Most construction debris is sent to a Class IV landfill. Segregated carpet backing is recycled. Scrap Metal and appliances are now recycled. Usable furniture is now stored and salvaged by residents in need. Waste Oil is collected at 5 convenience center and the Recycling Center. Car batteries are also recovered. A list of recycled materials and the amounts recovered are included on last page of this document. As you can see, Roane County recycled 34% more in 1999 than in 1998. Roane County is committed to its recycling and diversion programs. The ongoing commitment is illustrated by the fact that the variety of materials and the amounts collected and recycled are increasing every year.

The program has expanded recently by adding used clothing in the spring of 1999. During 2000, the county will implement an automotive scrap tank recycling program and extend (under the state’s precollection program) to materials collected. The county also participates in the mobile Household Hazardous Waste Collection Event.

Education efforts have included the following:
1. Established an education room at the recycling center to provide information to the public.
2. Worked with local charitable organizations to provide reusable household items to the areas needy citizens.
3. Distributed videos and literature to schools, street departments and convenience centers.
4. Working with cities to get needed information to residents and to encourage disposal of bulky wastes at the Recycling Center when city collection of these items is not available.
5. Established an education team to write an education plan.
6. Continuing speaking engagements to civic organizations and private companies and making TV appearances to promote Recycling Efforts.

These goals have met with some success and the Recycling Program is becoming an integral part of the region’s solid waste program. Because the facility was a landfill before 1997, people are already accustomed to bringing waste to this location. This fact has helped publicize the facility through word of mouth. Also, the media has been very helpful in promoting the facility by running newspaper articles/PSA’s and by running the county’s recycling video on local cable TV. A
breakdown of materials processed through this program follows:

<table>
<thead>

By working with TDEC, the Roane County Region has managed to set an example for other counties to follow in meeting the needs of local citizens.

1. An implementation schedule for new programs is below:

   1999-2000   Add used paint precollection to collection program.  
               Add automotive gas tanks to collection program.

   2000-2001   Add another location to convenience center recycling dropoff locations.  
               Add computer recycling to collection program.

   2001-2002   Add another location to convenience center recycling dropoff locations

   2002-2003   Add another location to convenience center recycling dropoff locations.

   2003-2004   Add another location to convenience center recycling dropoff locations.  
               Seek funding to add recycling dropoff at local schools.
3. PROPORTIONAL FLOW DIAGRAM FOR THE ROANE COUNTY SOLID WASTE REGION

- Source reduction 7.5%
  (2500 tons/yr)

- Diversion 9%
  (3000 tons/yr)

- Class I Solid Waste 78.87%
  (26239 tons/yr)

- Recycling 3.29%
  (1100 tons/yr)
CHAPTER 2: GENERAL INFORMATION ABOUT THE REGION

1. Roane County Solid Waste Planning Region includes Roane County and the cities of Harriman, Kingston, Midtown, and Rockwood.

3. Regional Solid Waste Board Members

Seven Members appointed by County Executive/commission
One member representing the City of Kingston
One member representing the City of Harriman
One member representing the City of Rockwood
One member representing the City of Oliver Springs

Regional Board Chairman
Nancy Lee
223 Michael Drive
Rockwood, TN 37854
4. Solid Waste Authority

    A. The region did form a Part 9 Solid Waste Authority. The Chairman is

    Bert Pemberton
    119 North Kingston Ave.
    Rockwood, TN 37854
    (865) 354-1521

    Jurisdiction of the Roane County Solid Waste Authority includes Roane County and the cities of Harriman, Kingston, Midtown, and Rockwood.

    B. Not Yet. Dissolution of the Solid Waste Authority is expected in June of 2000.

5. Three Contacts for Solid Waste Information for the region are as follows:

    Ken Yager
    Roane County Executive
    P.O. Box 643
    Kingston, TN 37763
    (865)376-5578

    Dena Rue
    Roane County Solid Waste Coordinator
    P.O. Box 643
    Kingston, TN 37763
    (865)590-7779

    Bert Pemberton
    Chairman, Roane County Solid Waste Authority
    119 North Kingston Ave.
    Rockwood, TN 37854
    (865)354-1521

6. Roane County has both a Solid Waste Regional Board and a Part 9 Solid Waste Authority. Each has a different function:

    The Roane County Regional Board meets about twice a year at called meetings to address report issues and specific items. The Board has not had a request for permit review since its formation. Reports have been filed and are up to date.

    The Roane County Solid Waste Authority meets on the first Monday of every month. Its primary function has been to operate and perform closure duties for the Roane County Landfill. This landfill’s closure was approved by the Knoxville Field office in December of 1999. The Authority expects to dissolve in June, 2000 since county employees will be performing post-closure duties during the 30-year post-closure period.
7. The County opted to become a single-county region due to a lack of interest on the part of neighboring counties. Even though the solid waste program has been non-regional in nature, the county recycling program has encouraged regionalization by accepting some recyclables from jurisdictions outside the county. Roane County currently exports most of its solid waste to Anderson County and therefore, in effect, has regionalized through exportation of class I waste.

8. City/Town Name    | Population
---------------------|-------------
Harriman City        | 7119        
Kingston City        | 4552        
Oak Ridge City       | 2567        
Oliver Springs       | 979         
Rockwood City        | 5348        
Rural Roane County   | 26662       

9. Roane County is a one-county region. Commercial activity centers around Kingston, Harriman, Midtown, and Rockwood. Three of the four cities form a triangle and the county seat is Kingston with Midtown located squarely in the middle. Roane County is divided by Watts Bar Lake and the Clinch River and consequently, several bridges must be crossed in order to get from one place to another. Interstate 40 cuts through the northern portion of the county. Some of our young people attend Roane State Community College. A portion of Oliver Springs is in Roane County. Oliver Springs is in the Anderson County Planning Region as is the Oak Ridge Portion of Roane County.

10. The Cities of Rockwood, Harriman, and Kingston charge a fee for solid waste services.

   Kingston  $4.00 per month was instituted 15 years ago, utility bill plus general tax funds, garbage collected once a week through contract with BFI.

   Rockwood $3.50 per month was instituted since 1992, billed by street department, garbage collected once a week by street department

   Harriman $6.50 per month, garbage collected once a week by BFI, contract expires in 3 years.

11. Each of the cities funds its solid waste collection and disposal through a combination of taxes and direct fees. The cities provide problem waste collection and brush collection in varying degrees. None of the cities collects recyclable materials directly from citizens. Residents from each city are allowed to utilize the county’s main recycling center for problem wastes and recyclables if they wish.

Roane County has three solid waste budgets which are funded by a combination of taxes, user fees, and sale of recycled materials.

The Convenience Center budget (fund 116) is tax funded with the exception of an occasional grant for capital projects (the convenience center grant spent 4 years ago). The county is exploring the costs of door-to-door pickup as an alternative to the convenience center system, because the costs of operating convenience centers are increasing. Anticipated capital expenditures include replacement of some aging equipment and buildings.

The Recycling Center (fund 123) was built using 100% of local funds for the building. The initial
equipment was funded in part by a TDEC Recycling Equipment Grant. This year, the Recycling Center will break-even on its operating budget due to the improving materials markets and improved management practices. Improvements have been done since initial construction utilizing the state’s MRF grant for paving, fencing, etc. which was matched dollar for dollar with local funds.

The ultimate goal in this budget is to generate enough funds to repay the initial investment.

This project is growing rapidly and funding will be needed to expand storage capacity and enhance special waste programs, such as collection of automotive gas tanks and the addition of other materials, such as used clothing. The Recycling Center will also begin participation in the Paint Precollection program by collecting paint year round from households to be disposed of with the annual mobile Household Hazardous Waste Collection.

Post Closure Funding- This is funded in the Recycling Center Budget with 2 cents on the tax rate allocated. It is anticipated that this funding will cover routine costs.

12. All relevant jurisdictions in the Region use uniform accounting methods and account for solid waste activities in a separate fund.

</table>

4. Total Generated Waste Stream

(1) source reduction
(2) recycling
1100 (includes 1035.69 tons recovered at recycling centers)
(3) diversion 3000 (includes 589 tons C & D diverted at recycling center)
(4) unmanaged wastes 500
Class I solid waste 26239

TOTAL GENERATED WASTE STREAM 33339

PERCENTAGE REDUCTIONS
(1) source reduction 7.50 %
(2) recycling 3.29%
(3) diversion 9%
(4) unmanaged wastes 1.5 %
Class I solid waste 78.7%

Source reduction is a guess, I do know that in 1989 we produced a total of over 44,000 tons of MSW so this figure carries a high margin for error.
In 1997, our in-county landfill closed. It is suspected that some of the 1989 waste stream was hauled from out-of-county by private companies.

The Roane County Recycling Center recycled 1035.685 tons of paper, aluminum, scrap metal (incl. White goods), wood waste, tires, and steel cans in 1998. There are also some small recycling programs which do not ship materials to the county recycling program therefore this figure was padded slightly to allow for those. This figure is close to accurate.

The Roane County Recycling Center diverted 589 tons of C & D by accepting small loads of C &D debris in containers at the recycling center. All loads too large, such as in a house demolition, have been sent to Class IV landfills near Roane County where possible. This is a best guess of those amounts. This figure is reasonable and concurs with EPA waste stream estimates.

Unmanaged waste figures are a guess. Because of our geography and lack of illegal dumping enforcement funds, Roane County has at least 50 illegal dumps. This accounts for most of the unmanaged wastes in the county.

5. There are at least 2 new large subdivisions going up soon in East Roane County which may affect solid waste in the area. We anticipate that both of these will become part of the cities of Kingston and/or Oak Ridge. Another subdivision is in the Rockwood Area is underway and is part of that city’s growth plan as well.

An industrial park is being developed in East Roane County which may affect the county’s waste stream in the future.

6. Unemployment rate is 4.0 percent as compared to 4.2 percent nationally.

There are currently two industrial parks located in Roane County with another in the planning/development stages. Existing industries are below:

East Tennessee Technology Park- 1000 acres, 500 of which will be developed. This park is located on Highway 58 and is within 10 miles of I-40 in East Roane County.

Roane County Industrial Park- 462 acres with 75 left for development. This park is located between Harrriman
and Rockwood just off Hwy 27 and is 3.5 miles south of I-40.

7. Major contributors to the region’s waste stream-

Roane County Convenience Centers
Ken Yager, (865)376-5578
mixed residential
11349.00 tons

Harriman, City of
Honorable Jerry Davis, (865)882-2123
mixed residential
2302.00 tons

Kingston, City of
Carolyn Brewer, Acting City Manager (865)376-6584
mixed residential
1602.24 tons

Rockwood, City of
Bob Tidwell, (865)354-0184
mixed residential
2318.59 tons

8. The Roane County Litter Grant is allocated to Keep Roane Beautiful, a nonprofit Keep America Beautiful affiliate. This organization subcontracts cleanup to the Dunn Diversified Industries, a sheltered workshop in Roane County. KRB has also acquired litter contracts with some of the cities in Roane County. The County and the cities work with Keep Roane Beautiful by referring complaints and sharing educational resources. The president of KRB is Ron Coleman and executive coordinator is Glynis Murray. Office phone is (865)882-1030.

9. An adjustment is not necessary. Roane County had a 59% waste reduction as compared with 1989 waste figures.

10. It will not affect our figures. Most of our waste reduction activities occurred after 1995.

Roane County

In late 1997, Roane County closed its landfill and completed construction of a mini-MRF and problem waste disposal center. In addition, Roane County established drop-off recycling at five out of 14 of its convenience centers and has added 2 more locations last year. Recyclables are hauled by the county via rolloff container and dumped at the mini-MRF where they are sorted and processed. About 1625 tons of tires, wood, construction debris and recyclable trash was recycled or diverted in 1998. 2176 tons was recycled or diverted in 1999. These figures do not include oil and car batteries. This center was and continues to be available for use by all city and county residents. Operations are funded by a combination of fees, disposal charges, operating transfers, and the sale of recycled
materials. This program is operationally self-sufficient and relies on state funds for improvements and equipment upgrades. The initial capital expenditures for the building were funded locally. It is the goal of the program to repay all capital expenditures as well as continue operational self-sufficiency.

Harriman City
The City of Harriman participates in the county's waste tire collection program and sometimes brings brush and other wastes to the recycling center in Midtown. The city does not collect recyclables door to door but does offer an oil and paper drop off at the street department. City residents are allowed to bring recyclables to the county's Recycling Center which is located about 5 miles from Harriman. Harriman actively participates in the annual household hazardous waste collection by distributing flyers to its residents.

Kingston City
The City of Kingston brings brush and some wastes to the recycling center in Midtown. The city does not collect recyclables door-to-door and has no drop off location within the city limits. City residents are allowed to bring recyclables to the county's Recycling Center which is located about 5 miles from Kingston. Kingston actively participates in the annual household hazardous waste collection by distributing flyers to its residents.

Rockwood City
The City of Rockwood brings tires to the recycling center in Midtown and provides an oil drop off at the city street department. The city does not collect recyclables but does recycle oil and brush. City residents are allowed to bring recyclables to the county's Recycling Center which is located about 5 miles from Rockwood. Rockwood actively participates in the annual household hazardous waste collection by distributing flyers to its residents.

Midtown City
The city of Midtown subcontracts with the county for use of its convenience centers. Drop off garbage disposal and recycling are available to Midtown residents with the County recycling center being located at the edge of the city limits.
CHAPTER 4: COLLECTION AND TRANSPORTATION

1.

</tbody>
</table>

2. This county more than exceeds the collection requirements as mandated by the state.

3. Collection needs in the rural areas are currently adequate to meet the needs of rural citizens and door to door collection is being considered as an alternative to the convenience center system. The county is currently bidding out this collection, however, a few convenience centers would have to remain in service to handle bulky wastes and problem wastes. Automotive gas tanks are a collection problem because the nearest market is in Alabama. Dead animals are also a collection problem. Small animals are usually placed in with garbage causing odor problems and large animals can not be accepted at all. The nearest Class I landfill is 30 miles away.

Collection in the City of Rockwood is done by the City’s street department. Because it is a nonmandatory program, those residents not using city services utilize the convenience centers in the area. The Street Department Manager cited standardization of service rates as his main collection problem, ie. Residents generating large amounts of garbage are charged the same as those producing very little. This street department does a particularly good job of collecting bulky wastes and trash.

Collection in the City of Kingston is subcontracted to BFI. The City of Kingston street department collects brush two times a year and collects furniture as needed.

Collection in the City of Harriman is subcontracted to BFI. The City of Harriman street department collects brush, construction debris (except shingles), furniture, and other bulky wastes as needed on a call-in basis by residents.
CHAPTER 5: RECYCLING

1. Roane County Solid Waste Coordinator
   P.O. Box 643
   Kingston, TN 37763
   (865)590-7779

2. Recycling Drop off and Materials Recovery Facility

   Roane County Recycling Center and Convenience Centers
   (865)590-7779
   215 White Pine Road
   Harriman, TN 37748
   Items accepted for recycling: mixed paper, newsprint, cardboard, steel food cans, aluminum cans, glass, plastic containers #1 #2, clothing, tires, scrap metal, oil, car batteries, carpet backing, and yard waste
   furniture, construction debris, and other bulky wastes also accepted.
   This is a drop-off program available to all Roane County Residents.

   Materials Processed include: mixed paper, newsprint, cardboard, steel food cans, aluminum cans, glass, plastic containers #1 #2, and clothing,
   Volume processed annually - 22,329 tons in calendar year 1999. This does not include tires, wood waste, oil, car batteries, or scrap metal which are stored and recycled but are not processed per se.

   Roane County Convenience Centers equipped with recycling containers-
   Swan Pond Convenience Center*
   South 58 Convenience Center*
   North Gallaher Convenience Center*
   Orchard View Convenience Center*
   Post Oak Convenience Center*
   Pumphouse Convenience Center
   Clax Gap Convenience Center

   At these seven locations, the following are collected: mixed paper, newsprint, cardboard, steel food cans, aluminum cans, glass, and plastic containers #1 #2. This is a drop-off program for use by any Roane County resident.

   *also have oil collection containers
   City of Harriman paper drop off
   Darrell Langley
   (423) 882-0942
   P.O. Box 433
   Harriman, TN 37748
   drop off for paper, oil
3. Roane County has made amazing progress in waste reduction efforts in the Region. Educational funding needs to be increased and a collection program for the cities needs to be implemented. The region needs continued funding for expansion of its recycling programs.

The region also needs help in coming up with solutions for problem wastes, which have been unresolved since the landfill closed. Specifically, the region needs disposal solutions for automotive gas tanks and dead animals (large and small).

Future plans for expansion include adding recycling drop off to the other 7 convenience center locations as well as possibly collecting materials at schools and/or recreational areas. Because the county does not handle waste collection within city limits, the decision for adding city collection will have to be made by each city.

4. See #2 above.
CHAPTER 6: DISPOSAL

1. There are no landfills operating within the region.

2. CLASS I WASTE EXPORTED

<table>
<thead>
<tr>
<th>Exported to: county</th>
<th>Exported to: Facility name/owner</th>
<th>estimated tonnage exported from region to class I landfills</th>
</tr>
</thead>
<tbody>
<tr>
<td>Rhea County</td>
<td>Rhea County Landfill</td>
<td>12,150.4</td>
</tr>
<tr>
<td>Anderson County</td>
<td>Chestnut Ridge Landfill</td>
<td>14,089</td>
</tr>
</tbody>
</table>

3. Disposal needs can be met with existing facilities for the next 10 years. Changes in disposal cannot be anticipated because they are all privately held.

   None.

5. Not applicable.

CHAPTER 7: PROBLEM WASTES

1. YES. The county has participated in the program for 6 years.

2. No.

3. This program is fairly successful. Most residents would like a more permanent collection mechanism. The County will be adding paint pre-collection in the near future but does not have the resources to add a permanent facility.

4. Waste Tires are collected at the County's main recycling center and shipped via tractor-trailer to Greenman Technologies in Jackson, GA.

5. The only problem we have with the tire collection program is that tires from cleanups are excluded from the program. We feel our citizens would voluntarily clean up more tire sites if the fee were waived for these tires. This would mean that the state would only have to pay for disposal.

6. Waste tire dumping is very sporadic and random. See above.

7. The region has added 6 waste oil collection sites and one car battery collection site at the Recycling Center and 5 convenience centers. In addition, the cities of Harriman and Rockwood collect oil at their street departments. WalMart and other stores in the area collect antifreeze.
CHAPTER 8: SOLID WASTE EDUCATION

1. Organizations active in Solid Waste Education

Keep Roane Beautiful, Inc.
Ron Coleman, President
Glynis Murray, Executive Coordinator
P.O. Box 25
Kingston, TN 37763
(865)882-0030
General Public
On-going cleanup programs
Administers County Litter Contract
Distributes information at events such as Great American Cleanup, has programs for teachers to use in schools.

Roane County Recycling Center
215 White Pine Rd.
Harriman, TN 37748
(865)590-7779
General Public, businesses, industry
Distribute flyers, publicity for Household Hazardous Waste Collection, newspaper articles regarding solid waste issues, organizes waste reduction events, provides tours of Recycling Center to groups. Speaks to various groups including school groups, business groups, and civic organizations.

4-H Extension Office
Nancy Carter
(865) 376-5558
School Children
School Curriculum

TNSWEP has not been active in Roane County.

2. The county has formed an education team which has met twice. The team has not filed an education plan yet but will sometime this year. More money is needed for direct mail and the county would like to produce a second video geared toward problem waste.

CHAPTER 9: FLOW CONTROL AND PERMIT REVIEW

1. No.
2. No.

CHAPTER 10: FIVE-YEAR PLAN UPDATE REVIEW

4. Budget attached.
October 18, 2000

Ms. Nancy Lee, Chairman
Roane County Municipal Solid Waste Planning Region
223 Michael Drive
Rockwood, TN 37854

Dear Ms. Lee:

We have reviewed the draft copy of the ten-year plan revision faxed to us for Roane County MSW Region. The draft provided a good deal of information toward a plan for the Region. The following items need additional attention:

1. TCA 68-211-815(b)(2)(C) requires that at a minimum, each plan and revised plan submitted by a municipal solid waste region shall include a current system analysis of disposal capability, including an analysis of the remaining life expectancy of landfills or other disposal facilities.

   a. While the Region can not control many factors relating to landfills outside the region, the life expectancy of each landfill in the state is reported by the Division of Solid Waste Management in the Department of Environment and Conservation. The Region can review this information periodically to be aware of any upcoming limitations in disposal capacity. A copy of the Life Remaining Survey of Class I Landfill Sites in Tennessee for 2000 is enclosed. According to the survey, Chestnut Ridge landfill only has 6 years and 6 months remaining. Rhea County landfill has 10 years and 10 months. A discussion of limitations due to life expectancy needs to be included.

2. TCA 68-211-815(b)(2)(D) and (E) requires that at a minimum, each plan and revised plan submitted by a municipal solid waste region shall include a current system analysis of costs and revenues. Details for meeting this requirement were provided in numbers 11 and 13 of Chapter 2 of the guidelines for preparing the 5-year update. An additional copy of the guidelines is enclosed.
3. TCA 68-211-815(b)(5) and (6) requires that at a minimum, each plan and revised plan submitted by a municipal solid waste region shall include anticipated waste capacity needs, planned capacity assurance, including descriptions of planned or needed facilities.

   a. In Chapter 3, numbers 5 and 6 you identify anticipated growth in the Region. How is this growth expected to impact solid waste management and how is the Region prepared to handle the growth?

4. TCA 68-211-815(b)(2)(C) requires that at a minimum, each plan and revised plan submitted by a municipal solid waste region shall include a plan for the disposal of household hazardous waste.

   a. Comments in chapter 7, number 3, indicate the need for a permanent collection facility. Please provide more details of how the Region plans to meet this requirement. (i.e. will the Region continue to rely on the state's Household Hazardous Waste Program to meet this requirement?)

5. TCA 68-211-815(b)(11) requires that at a minimum, each plan and revised plan submitted by a municipal solid waste region shall include a description of education initiatives aimed at businesses, industries, schools, citizens and others, which addresses recycling, waste reduction, collection and other goals of this part.

   a. In Chapter 8, you identify a Keep Roane Beautiful program and the Roane County Recycling Center as providing solid waste education for the Region. A limited description of the programs is provided. Please include more details such as the successes and level of participation in these programs.

6. TCA 68-211-815(b)(15) requires a certification from the region's part 9 solid waste authority, if such an authority has been formed, or if no such authority has been formed, the county legislative body of each county in the region that they have reviewed and approved of the region's plan and/or revised plan.

   a. Certification of approval from required local parties must be included before the revised plan can be approved by this office.

7. In Chapter 3 on waste stream, you identify at least 50 illegal dumps. Identify needs and plans to address this problem?

8. Please update information in Chapter 5 relating to Roane County Solid Waste Coordinator.

The information requested above should reach this office not later than January 18, 2001. If you have questions or need assistance, please feel free to contact me at (615) 532-0744.
Sincerely,

[Signature]

Rebecca Gorham,
Waste Reduction Section

Cc: The Honorable Ken Yager, Roane County Executive
    Mr. Patrick Guettner, Roane County Solid Waste Coordinator
    Mr. Mitch Loomis, East TN Development District
    Ms. Chris Garkovich, CTAS Solid Waste Management Consultant
    Mr. Mark Penland, Knoxville EAC Coordinator
