

NEW COMPOST FACILITY BEING PLANNED IN THE CITY OF LEBANON

The City of Lebanon has applied to the Tennessee Department of Environment and Conservation (TDEC) Division of Solid Waste Management (DSWM) for a Tier III composting permit to construct and operate a composting facility. The planned location is in Wilson County, at 100 Interstate Drive, Lebanon, Tennessee 37090 (latitude 36.182194 N/longitude - 86.318583 W). The waste materials to be accepted are classified as yard waste and biosolids.

Under State law, the applicant must obtain a permit before constructing or operating the proposed facility. DSWM has received a Part I Permit Application indicating City of Lebanon's desire to obtain the required permit.

A complete permit application consists of both a Part I and a Part II, as described in the regulations governing solid waste processing and disposal facilities in Tennessee, Rule 0400-11-01-.02(3)(c). When the facility submits the complete Part II application, DSWM will do an in-depth review to determine if the application meets the technical standards of the Regulations described in Tennessee Rule 0400-11-01-.11, Solid Waste Processing and Disposal. Once the technical review is completed, DSWM will make a tentative decision to either grant or to deny the permit and will issue a public notice.

This second notice will provide the public at least 45 days to submit written comments on the proposed action. If there is a significant degree of public interest, DSWM will schedule a public hearing and give at least 15 days' notice. After considering all comments received, the DSWM Director shall issue a final permit decision and a response to comments.
