NEW TENNESSEE WILDLIFE RESOURCE AGENCY
COMPOST FACILITY BEING PLANNED IN
MADISON COUNTY

The Tennessee Wildlife Resources Agency (TWRA) has applied to the Tennessee Department of Environment and Conservation (TDEC) Division of Solid Waste Management (DSWM) for a Tier II composting permit to construct and operate a composting facility. The planned location is in Madison County, at 40 Highway 412 East, Jackson, Tennessee 38305 (latitude 35.675680 N/longitude -88.743596W). The waste material to be accepted and composted is deer carcass parts that result from deer processing.

Under State law, the applicant must obtain a permit before constructing or operating the proposed facility. DSWM has received a Part I Permit Application indicating TWRA’s desire to obtain the required permit.

A complete permit application consists of both a Part I and a Part II, as described in the regulations governing solid waste processing and disposal facilities in Tennessee, Rule 0400-11-01-.02(3)(c). When the facility submits the complete Part II application, DSWM will do an in-depth review to determine if the application meets the technical standards of the Regulations described in Tennessee Rule 0400-11-01-.11, Solid Waste Processing and Disposal. Once the technical review is completed, DSWM will make a tentative decision to either grant or to deny the permit and will issue a public notice.

This second notice will provide the public at least 45 days to submit written comments on the proposed action. If there is a significant degree of public interest, DSWM will schedule a public hearing and give at least 15 days’ notice. After considering all comments received, the DSWM Director shall issue a final permit decision and a response to comments.
