*This list includes most vendors that have evaluated cathodic protection tests for petroleum underground storage tank systems in the State of Tennessee and have signed off on these tests as a Corrosion Expert. The list does not represent all vendors that may provide such services. This list has been provided only as a convenience for assisting tank owner/operators in achieving compliance. Before utilizing the services of any CP Expert, verify that their National Association of Corrosion Engineers (NACE) certification is current.

The Division of Underground Storage Tanks (Division) cannot recommend one service provider over another. The Division does not guarantee nor make claims regarding the quality of services provided by any particular vendor.

It is the responsibility of the owner/operator of the facility to procure services from the vendor of their choice. The owner/operator, not the service provider, is responsible for all compliance requirements of the Division as well as meeting all compliance deadlines.

It is the responsibility of the owner/operator to procure another vendor or multiple vendors to meet compliance deadlines if services cannot be provided on time or are delayed.
