Distribution Systems
Grades 1 & 2
Course #1103 or 1103-V

Who should attend?
Persons who are currently working in a Grade 1 or 2 Distribution System and are planning to become certified distribution operators.

No prerequisite is required, however, basic math skills are essential. For those who need to brush up on math courses #1009 Math Fundamentals for Operators-in-Training and/or #1014 Basic Math for All Certifications are recommended. Diagnostic tests are available to determine your skill level.

Course Description
The course will examine distribution system facilities and the procedures used to distribute treated water to consumers.

Topics include:
- Pipe Installation and Maintenance
- Valves and Pumps
- Fire Hydrants
- Services and Meters
- Water Storage
- Cross Connection Control
- Safety, Rules, and Recordkeeping

Course Materials
Please bring a scientific calculator, scratch paper, highlighter, and pens or pencils to class.

If attending at the Training Center, the class booklet will be provided at the beginning of class.

For virtual attendance, a camera and microphone are required. The class booklet will be emailed to virtual students prior to the class start date.

For a complete list of exam reference textbooks, please visit our website.

Course Length
The course is four and a half (4.5) class days.

Experience Credit
Three (3) months for Distribution Grade 1 & 2 Operator applicants.

Continuing Education
Approved for six (6) hours of CE credit for Grade 1 & 2 certified Distribution System operators.

Fees:
$300.00 for class
