

# Distribution Systems Tutoring Course #1100

## Who should attend?

This course is intended for individuals who are currently working toward obtaining a certification in Distribution Systems and needs additional assistance in studying for the certification exam.

## Course Description

This course is intended to be a traditional tutoring session for examination candidates. Because this class is limited to five (5) students per instructor, the student will have the opportunity to receive personal instruction on topics of concern. The course may include classroom instruction and/or hands on laboratory exercises.

## Topics include:

The intention of this course is for the student to bring topics of interest with them. The following topics are assumed to be of significance:

- Pipe Installation and Maintenance
- Valves and Pumps
- Fire Hydrants
- Services and Meters
- Water Storage

## Course Materials

Please bring a scientific calculator, scratch paper, highlighter, and pens or pencils to class. Study material will be provided at the beginning of class.

For a complete list of exam reference textbooks, please visit our [website](#).

## Course Length

The course is three (3) hours.

## Experience Credit

Not applicable
