

**3 days
\$300/\$350**

Course #404/404-V

Applied Math Week 2 for Collection System Operators

In-person & online

This course takes the skills acquired in Applied Math Week 1 and applies them to formulas used in the collection system. The student will be exposed to the types of math problems encountered on the certification exam. A student study guide will be provided at the beginning of class.

It is intended for individuals who are currently working toward obtaining a collection systems certification. **There is a prerequisite of attending Applied Math Week 1 for Wastewater & Collection System Operators.**

General Topics

- ▶ Leaks & Dye testing
- ▶ Slope & Grade
- ▶ Excavating & Paving
- ▶ Maps & Blueprints
- ▶ Manhole & Lift Station Ventilation
