

9.20. SECTOR T – WASTEWATER TREATMENT WORKS

This permit covers all existing point source discharges of stormwater from treatment works treating domestic sewage or any other sewage sludge or wastewater treatment device or system, used in the storage, treatment, recycling, and reclamation of municipal or domestic sewage, including lands dedicated to the disposal of sewage sludge that are located within the confines of the facility with a design flow of 1.0 MGD or more, or required to have an approved pretreatment program under [40 CFR Part 403](#).

The following are not required to have permit coverage: farm lands, domestic gardens or lands used for sludge management where sludge is beneficially reused and which are not physically located within the facility, or areas that are in compliance with Section 405 of the CWA.

9.20.1. Additional SWPPP Requirements

To minimize the discharge of pollutants in stormwater, implement control measures such as the following, where determined to be feasible (list not exclusive):

- routing stormwater to the treatment works; or
- covering exposed materials from the following areas: grit, screenings and other solids handling, storage or disposal areas; sludge drying beds; dried sludge piles; compost piles; and septage or hauled waste receiving station.
