

Tennessee Department of Environment & Conservation
Division of Water Resources

PUBLIC NOTICE
November 23, 2021

Tennessee's Draft 2022 List Of Impaired and Threatened Waters

As required by Section 303(d) of the federal Clean Water Act, the Tennessee Department of Environment and Conservation has developed a draft 2022 List of Impaired and Threatened Waters in Tennessee. The List compiles waterbody segments that violate one or more water quality criteria, or are documented as threatened by pollutants. These segments are then prioritized for a specialized water quality study of the identified pollutants known as a Total Maximum Daily Load (TMDL).

Although the development of this document is neither a regulatory promulgation nor an action of the Tennessee Board of Water Quality, Oil and Gas, it is subject to public review and comment, and must ultimately be approved by the U. S. Environmental Protection Agency.

The 2022 List is presented as an Excel spreadsheet for each of the major watersheds in the state. Included in the workbook is a sheet for rationales for waterbody segments delisted for one or more parameters. The draft version of the list with rationales for delisting can be accessed on the Division's web page for [Public Participation Opportunities](#).

Entities wishing to submit data for use in support of comments regarding existing assessments should provide these data in electronic format, to the address in this notice. Submissions should include detailed sample station location information plus a description of sampling methods and data quality assurance measures.

The Department will be accepting comments on the draft 2022 List until February 25, 2022. After responses have been developed for the comments received, TDEC will revise the List as appropriate and prepare a proposed final version, which will be submitted to EPA for review and approval on or before the federal statutory deadline of April 1, 2022. Tennessee's statewide water quality assessment information will be transmitted to EPA by means of the federal ATTAINS database.

Comments regarding the draft 2022 List or questions about Tennessee's water quality assessment process should be directed to:

Richard Cochran
Watershed Planning Unit
Division of Water Resources
11th Floor, Tennessee Tower
312 Rosa L. Parks Ave.
Nashville, TN 37243

Individuals with disabilities who wish to participate in these proceedings (or review the administrative file record) should contact TDEC to discuss any auxiliary aids or services needed to facilitate such participation. Contact may be in person, by writing, telephone, or other means, and should be made no less than ten days prior to January 11, 2022, to allow time to provide such aid or services. Contact the ADA Coordinator at (1-866-253-5827) for further information. Hearing impaired callers may use the Tennessee Relay Service (1-800-848-0298). If it is hard for you to read, speak, or understand English, TDEC may be able to provide translation or interpretation services free of charge. Please contact Ms. Paula Mitchell at 615-924-4985 for more information.
