Antidegradation:

Tennessee's Antidegradation Statement is designed to fully protect existing uses of all surface waters and to maintain existing conditions of high-quality waters.

The Antidegradation Statement applies only to new or increased discharges of pollutants. Most NPDES permits constitute renewals without an increased discharge: in this case, no antidegradation review is required.

An application for a new or increased discharge requires antidegradation review if it proposes greater than de minimis degradation (<5% for a single discharge, <=10% total for multiple discharges in the same stream segment) of waters with available parameters or Exceptional Tennessee Waters, the discharge of a pollutant for which the receiving water is impaired, or a discharge to one of the seven designated Outstanding National Resource Waters in the state. Tennessee conducts antidegradation review on a parameter-by-parameter basis. See Rule 0400-40-03-.06 for detailed antidegradation requirements.

State of Tennessee Policy of Non-Discrimination:

Pursuant to the State of Tennessee's policy of non-discrimination, the Tennessee Department of Environment and Conservation does not discriminate on the basis of race, sex, religion, color, national or ethnic origin, age, disability, or military service in its policies, or in the admission or access to, or treatment or employment in its programs, services or activities.
