Each year, SCORE compiles the *State of Education* report to provide an update on Tennessee's work in education over the last year, outlining both successes and challenges for districts and schools across the state. The report identifies the priorities that must be tackled to continue raising student achievement and provides a framework for the important work that lies ahead for all education partners in our state, from teachers to policymakers.

Please let us know as soon as possible if you plan to attend by emailing Sarah Brown at rsvp@tnscore.org.

We look forward to seeing you there!
