

## Retirement Credit for Military Service

If someone is receiving a military retirement, they may not receive additional retirement credit for TN Consolidated Retirement System.

**The individual must not be receiving credit in any other retirement system, including but not limited to the United States Military Retirement System, Federal Civil Service Systems, or any other retirement system for this military service with exception to the National Guard and Reserves.**

If someone was in active duty in the armed forces, and they are not receiving a military retirement credit, they may be eligible for additional retirement credit.

Below is the link to the form for additional retirement credit for military service.
