

Recycling of Used Motor Oil Specifications

I. SCOPE

The Tennessee Department of Transportation is seeking a contractor to provide all personnel, equipment and facilities needed to properly remove and recycle used motor oil from the State of Tennessee. This will be a five (5) year contract. Pick-up locations listed in paragraph IV below.

II. CONTRACTOR RESPONSIBILITIES

- a. To comply with all federal, state and local regulations. To have the required oil permit, certificate of insurance and state transporting permit(s).
- b. Provide manifest documents and complete them at the pickup site at the time of the oil pickup. Net quantities are to be determined after each container has been drained. A TDOT representative must be present when each container is drained and must verify all quantities.
- c. Transport and recycle oil in accordance with all EPA regulations. To provide personnel, equipment and service capable of handling any contingencies that may develop during performance of this contract.
- d. Oil containing more than 10% water or any halogens; ie: chlorinated solvents and fluorine more than 1000 parts per million is not to be accepted. It will be the vendors responsibility to verify that the oil is free of these contaminants at the time of pickup.
- e. Vendors to bid on charge to recycle per gallon of oil. Bid price to include all cost (labor, equipment, trip charge, fees) for pick up. No additional charges shall be allowed.

III. PAYMENT

- a. Invoices shall be sent to the site address from which the used oil is picked up. Sites are listed below by region.
