REQUEST FOR INFORMATION
FOR
DATA MANAGEMENT SYSTEM WITH INTEGRATED BILLING

RFI # 34347-82022
July 30, 2021

1. STATEMENT OF PURPOSE:

The State of Tennessee, Department of Health (TDH), Tennessee Breast and Cervical Screening Program (TBCSP) issues this Request for Information ("RFI") for the purpose of informing the program of the current data management with integrated billing marketplace. We appreciate your input and participation in this process.

2. BACKGROUND:

The TBCSP is a National Breast and Cervical Cancer Early Detection Program (NBCCEDP) grantee through the Centers for Disease Control and Prevention (CDC). As part of NBCCEDP requirements, TBCSP is required to collect and report on health management related to breast and cervical cancer screening and diagnosis. In addition, TBCSP pays fee-for-service for codes associated with breast and cervical cancer screening and diagnosis. Currently, TBCSP utilizes the Patient Tracking & Bill Management Information System (PTBMIS) for both data management and billing and payment which is an midrange computer system. TBCSP is looking to replace the current system of data collection and integrated billing with a system that can at a minimum perform these requirements.
