Preface

Companion Guides (CG) may contain two types of data, instructions for electronic communications with the publishing entity (Communications/Connectivity Instructions) and supplemental information for creating transactions for the publishing entity while ensuring compliance with the associated ASC X12 IG (Transaction Instructions). Either the Communications/Connectivity component or the Transaction Instruction component must be included in every CG. The components may be published as separate documents or as a single document.

The Communications/Connectivity component is included in the CG when the publishing entity wants to convey the information needed to commence and maintain communication exchange.

The Transaction Instruction component is included in the CG when the publishing entity wants to clarify the IG instructions for submission of specific electronic transactions. The Transaction Instruction component content is limited by ASCX12's copyrights and Fair Use statement.

Express permission to use ASC X12 copyrighted materials has been granted to TennCare related to this CG. The underlying TR3 that is used as the basis for this CG can be purchased at <http://store.X12.org>.

Transaction Instruction (TI)

1 TI Introduction

1.1 Background

1.1.1 Overview of HIPAA Legislation

The Health Insurance Portability and Accountability Act (HIPAA) of 1996 carries provisions for administrative simplification. This requires the Secretary of the Department of Health and Human Services (HHS) to adopt standards to support the electronic exchange of administrative and financial health care transactions primarily between health care providers and plans. HIPAA directs the Secretary to adopt standards for transactions to enable health information to be exchanged electronically and to adopt specifications for implementing each standard HIPAA serves to:

- Create better access to health insurance
- Limit fraud and abuse
- Reduce administrative costs

1.1.2 Compliance according to HIPAA

The HIPAA regulations at 45 CFR 162.915 require that covered entities not enter into a trading partner agreement that would do any of the following:

- Change the definition, data condition, or use of a data element or segment in a standard.
- Add any data elements or segments to the maximum defined data set.
- Use any code or data elements that are marked “not used” in the standard’s implementation specifications or are not in the standard’s implementation specification(s).
- Change the meaning or intent of the standard’s implementation specification(s).

1.1.3 Compliance according to ASC X12

ASC X12 requirements include specific restrictions that prohibit trading partners from:

- Modifying any defining, explanatory, or clarifying content contained in the implementation guide.
- Modifying any requirement contained in the implementation guide.

1.2 Intended Use

The Transaction Instruction component of this companion guide must be used in conjunction with an associated ASC X12 Implementation Guide. The instructions in this companion guide are not intended to be stand-alone requirements documents. This companion guide conforms to all the requirements of any associated ASC X12 Implementation Guides and is in conformance with ASC X12's Fair Use and Copyright statements.

2 Included ASC X12 Implementation Guides

This table lists the X12N Implementation Guides for which specific transaction Instructions apply and which are included in Section 3 of this document.

Unique ID	Name
005010X220A1	Benefit Enrollment and Maintenance (834)

3 Instruction Tables

These tables contain one or more rows for each segment for which a supplemental instruction is needed.

Legend
SHADED rows represent "segments" in the X12N implementation guide.
NON-SHADED rows represent "data elements" in the X12N implementation guide.

V5010X220A1 Benefit Enrollment and Maintenance

Loop ID	Reference	Name	Codes	Notes/Comments
	REF	Transaction Set Policy Number		REF02 will be the TennCare-assigned MCC identifier (e.g. "nnn").
1000A	N1	Sponsor Name		Outbound: N104 = 626001445.
1000B	N1	Payer		Outbound: N102 = name of payer; N104 = tax id of payer.
2000	INS	Member Level Detail		Outbound: All TennCare coverage is provided at the subscriber level.
2000	REF	Subscriber Identifier		Outbound: REF02 = TennCare-assigned Recipient Identifier (RID).
2000	REF	Member Policy Number		Outbound: REF02 = Recipient's Social Security Number (SSN).
2000	REF	Member		Outbound: This segment will appear

		Supplemental Identifier		only if the recipient has Medicare coverage REF02 = HICN .
2100A	NM1	Member Name		Outbound: A corrected insured indicator and associated 2100B loop appear only once in the daily 834 cycle and are not repeated in an audit or any subsequent daily file.
2300	HD	Health Coverage		Outbound: TennCare provides a 2300 HD loop for each eligibility segment. Inbound: Report TPL with 2300 loop (HD and DTP) and 2320 loop (COB, REF, and N1). Both Outbound and Inbound: Detailed information can be found in the separate document "834 2300 Loop Definitions".
2310	NM1	Provider Name		Inbound: Used by MCOs to provide Primary Care Provider (PCP) information with NM109 = Provider NPI.
2320	COB	Coordination of Benefits		Inbound: TennCare only stores the first 16 characters of COB02.
2320	REF	Additional Coordination of Benefits Identifiers		Inbound: TennCare requires REF01 = "ZZ" and REF02 = a 10-character TennCare-assigned TPL Carrier Code. If available, group number should also be reported.

4 TI Additional Information

4.1 Business Scenarios

(Intentionally left blank.)

4.2 Payer Specific Business Rules and Limitations

For Outbound files:

The trading partner id for TennCare is “626001445TC” and will be used in ISA06 and GS02.

The TennCare-assigned trading partner id for the recipient will be used in ISA08 and GS03.

TennCare places all entries in a single ST-SE Transaction Set.

For Inbound files:

Each trading partner must identify itself to TennCare by the trading partner id assigned by TennCare and must be used in ISA06 and GS02.

The trading partner id for TennCare is “626001445TC” and must be used in ISA08 and GS03.

TennCare will process the first ST-SE Transaction Set in a file.

4.3 Frequently Asked Questions

(Intentionally left blank.)

4.4 Other Resources

(Intentionally left blank.)

5 TI Change Summary
