

# StationMD

The Telehealth Solution Serving  
Individuals With Intellectual and  
Developmental Disabilities

## Access to I/DD-Specific Medical Care at Anytime from Home

StationMD delivers superior medical care to people with intellectual and developmental disabilities (I/DD) in their home settings employing telehealth. Our physicians have a special commitment to caring for people with I/DD and have dedicated training in this population's complex challenges and needs. From routine primary care to urgent/emergency issues, StationMD delivers care without disrupting important routines of meals, activities and sleep. Our technology allows people to access care from home, nearly immediately at all hours, all days.

## During the COVID-19 Pandemic

StationMD has been partnering with congregate settings to keep individuals protected in the hardest hit areas. We provide an access point to care when trips to clinics and ERs pose high risk of COVID-19 exposure, and where family members/staff may not be permitted to accompany patients. When there is concern for exposure, we help implement protocols for quarantine, monitoring, treating and, if necessary, transferring individuals safely to hospitals.

## How It Works

\*follow up visits performed when necessary

## Cost Savings & Budget Impact

- Partners using StationMD typically see a **50 - 85% reduction** in ER transfers
- Annual Average Provider Savings per 100 individuals = **\$49,000 - \$108,000**
