

SWC# 219 Highway Maintenance Equipment Contract Information and Usage Instructions

Contract Period: This is a three year contract with a one year renewal option. It began on July 1 2016 and will expire on June 30, 2019. If renewed, the final end date will be June 30, 2020.

Summary/Background Information: Pricing is based on a percentage discount from the manufacturer's catalog. The percentage discount may vary within a manufacturer's price list with different percentages being applied on various product groups and models and/or options. You may then consider any model with the options you need to customize the equipment to your specifications. In addition, several manufactures may be considered in each category of equipment, giving the end user the flexibility and choices to get the brand and model they see as the best value. The CPO suggests that due to the complexity of pricing this equipment, that you contact the dealer(s) and allow them to assist in "Building Out" equipment to provide an accurate quote.

Some of the manufacturers offer a multiple unit discount which is an additional percentage discount that you add to the standard discount. Contracts detail these additional discounts and also the prompt pay discounts.

State Contact Information
