Criminal Justice Investment Task Force (CJITF)
Steering Committee Objective

State leadership has instructed the CJITF to:

“use our state’s data to move towards a criminal justice system that focuses resources on evidence-based recidivism reduction and crime prevention strategies that increase public safety and improve outcomes for all Tennesseans.”

Letter signed by:
• Governor Bill Lee
• Lieutenant Governor Randy McNally
• Chief Justice Jeffrey Bivins
• Speaker-Designee Cameron Sexton

Justice Reinvestment Initiative (JRI)

• JRI is a project funded by the Department of Justice that works with state leaders committed to using their criminal justice data to develop proven, innovative, and comprehensive approaches to reduce recidivism rates, promote public safety and shift resources toward more cost-effective strategies
Data Sources

• Primary data sources
  • TN Department of Correction
  • TN Board of Parole
  • TN Administrative Office of the Courts
  • Unless stated otherwise, all data presented was analyzed by CJI in consultation with above agencies

• Additional data from
  • U.S. Department of Justice, Bureau of Justice Statistics
  • U.S. Census Bureau

Iron Law of Prison Population Growth

Admissions + Time Served
= TDOC Population
Factors Influencing Admissions & Time Served

- Law Enforcement Options & Crime Rates
- Sentencing Practices
- Release Mechanisms
- Recidivism

Multiple Objectives of Incarceration

- **Incapacitation**: Reducing current criminal involvement by holding offenders in prison where they cannot commit crimes against the public.
- **Deterrence**: Reducing the likelihood of future criminal involvement by increasing the punishment for the current offense.
- **Rehabilitation**: Reducing the likelihood of future criminal involvement by offering effective programming and treatment during the period of incarceration.
- **Retribution**: Payment or punishment, in the form of imprisonment, for violating community norms and order.

TN: The Case for the Justice Reinvestment Initiative
Prison Population Grew Nearly 400%

Source: U.S. Department of Justice, Bureau of Justice Statistics, National Prisoner Statistics Program

Community Supervision Population Added Nearly 30,000 Since 1994

Source: U.S. Department of Justice, Bureau of Justice Statistics, Annual Probation Survey, Annual Parole Survey
Tennessee’s Incarceration Rate is 10% Higher than National Average

**U.S. and Tennessee State Imprisonment Rate per 100,000 Residents, 1978-2017**

Admissions

Iron Law of Prison Population Growth

\[ \text{Admissions} + \text{Time Served} = \text{TDOC Population} \]
Admissions Overview

- System Maps
- Admissions over time
- Admissions by demographics
- Admissions by admission type
- Admissions by offense type
- Admissions by geography

Most Law Enforcement Options Result in Arrest

1. Criminal Incident
   - Hospital
   - Mobile Outreach Team
   - Crisis Center
   - Pre-arrest Diversion Center (Misdemeanors, Limited Felonies)
2. Cite and Release (Misdemeanors Only)
3. Arrest and Booking
4. Release or Treatment
Limited Diversion Opportunities Once Arrested

Legend:
- Decision-Making Option
- Next Step in the Process

Types of Admission to Prison and Jail

- **New Commitments**: Individuals entering prison or jail as a result of a new felony conviction where they were sentenced to serve at least one year in TDOC custody

- **Community Supervision Violators**: Individuals entering prison or jail as a result of violating a condition of parole or probation, including technical violations as well as reoffending with a new misdemeanor or felony
Felony Admissions Declined 14% in Last 10 Years

Research on Incarceration and Recidivism

Researchers have studied whether incarceration reduces future criminal behavior more than other forms of sanctions

Findings:

• Bales & Piquero (2012): Found that “overall, imprisonment leads to higher recidivism when compared to a non-incarcerrative alternative, i.e., a criminogenic effect of imprisonment”

• Spohn and Holleran (2002): Found “no evidence that imprisonment reduced or delayed recidivism, either for felony offenders generally or for drug offenders specifically”

• Drake and Aos (2012): Found that technical violators of probation serving a period of confinement (jail or prison) had significantly higher recidivism than offenders sanctioned in the community

Source: Bales & Piquero (2012); Spohn & Holleran (2002); Drake & Aos (2012).
Key Takeaways

• Despite overall admissions declines, the majority of admissions are for non-person offenses and many are the result of community supervision failures
  • 74% of admissions are for non-person offenses, and property offenses are the most common
  • Nearly 5,000 admitted last year from community supervision
• Admissions have increased in certain areas and for certain types of offenders
  • Admissions of female offenders grew 12%
  • Admissions from Eastern Tennessee grew 11%

Research on Length of Stay and Recidivism

Researchers have also examined whether longer periods of incarceration reduce recidivism more than shorter periods

Findings:

• The most rigorous research studies find no significant effect, positive or negative, of longer prison terms on recidivism
• The United States Sentencing Commission (2014): Found no difference in recidivism for federal drug offenders before and after sentence reduction due to the Fair Sentencing Act
• Rhodes et al. (2018): Concluded that “prison length of stay can be reduced with minimal effects on recidivism” for federal offenders

Key Takeaways

• Despite research findings that longer prison stays do not reduce recidivism more than shorter stays, individuals are serving longer terms of incarceration
• Time served has grown 11 months or 23% overall
  • This is up most notably for drug offenses with time served for cocaine-related offenses up 63%
• Parolees now serve 20 months longer before release
  • Individuals serving until expiration of sentence are now serving 7 months longer in custody
• Time served growth also evident for felony offenders sentenced to serve time in local jails

Opportunities for Credit Accrual

- **4-8 DAYS**: Good institutional behavior*
- **1-8 DAYS**: Satisfactory program performance*
- **60 DAYS**: Educational program performance
- **60 DAYS**: Intensive residential treatment
- **8 DAYS**: Time served in pretrial confinement*

* Earned on a monthly basis

Research on Incentives and Rewards

Researchers examined steps that can be taken to improve management of prisons and effectively change individuals’ behavior

Findings:

- Gendreau et al. (2014): Found that contingency management programs “produced marked improvements on indices of institutional adjustment and educational and work-related behaviors”
- Drake et al. (2009): Examined the impact of increasing earned credits for nonviolent offenders in Washington and found that recidivism rates of those released early decreased by 3.5% compared to those who stayed in prison for 63 days longer

Parole System Map

Eligibility Factors:
- Specific Offense Requirements (100%, 85%, 75%, 60%)
- Offender Range (Mitigated – Career)

# Key Takeaways

- Longer sentences and declining parole grants are driving the increases in time served
  - Average sentences increased by 6 months in 10 years and sentences for drug offenses grew by over 30%
  - Releases to parole declined by more than 1,200 in 10 years, and grant rates at initial parole hearings dropped to 10% in FY2019

- The lowest level felony class is the largest group sentenced to incarceration compared to more serious classes of offenders

---

# Custody Population

Research on Facility Type and Recidivism

Researchers have evaluated how the place of incarceration relates to recidivism in the context of programming opportunities.

Findings:
- Christensen (2008) noted, “Given the reality of shorter, uncertain incarceration periods, the opportunity for immersion within comprehensive programmatic initiatives within jails is relatively short”
- Duwe (2017) concluded that “what is truly important for recidivism outcomes is providing prisoners with access to effective programming”

Recidivism Rates Higher for Those Released from Jail

36-Month Recidivism Rate for Felony Offenders Released in FY2014

- Jail: 50.9%
- Prison: 40.6%

Source: TN Department of Correction
Key Takeaways

- Increasing lengths of stay have driven the custody population to grow 12%
- Growing number of non-person offenders, led by drug offenders, responsible for custody population growth
  - More than 75% of low-level felony offenses are non-person
- Nearly half of the population held in state prisons has a mental health diagnosis
  - Substance-related and addiction disorders more than doubled, and serious persistent mental illness cases tripled
- A significant number of state inmates are in local jails, many of which are over capacity

Female Population
Female Incarcerated Population Grew 47%

Admissions from Community Supervision by Supervision Type, FY2018

Source: TN Department of Correction
More than 50% of Revocations for Technical Violations

Technical Violations Make Up Growing Share of Revocations
Recidivism Reduction Principles for Community Supervision

Researchers have examined what practices are most successful at changing individuals’ behavior and reducing recidivism on community supervision.

Findings:
- **Risk, Need, Responsivity**: Focus on high-risk offenders, target criminogenic needs, address programming barriers.
- **Use sanctions and incentives to respond to behavior**
- **Frontload resources** for offenders coming out of custody.
- **Balance supervision with treatment**
- **Monitor quality, fidelity, and outcomes**

Tennessee’s Current Supervision Practices

**Responsivity Factors**: There are no formal systems in place to address responsivity barriers to programming and treatment successes.

**Sanctions**: The use of swift, certain, and proportionate sanctions is inconsistent throughout the state and opportunities remain to ensure this best practice is applied more broadly and uniformly across Tennessee.

**Rewards**: There is also no formal structure in place for rewarding positive behavior on probation or parole, including no way to earn time off of the sentence for good behavior or program participation.
Tennessee’s Current Supervision Practices

**Treatment:** While probation and parole utilize assessments to determine what types of programming and treatment needs are required for offenders, access to treatment remains a challenge, particularly in the rural areas.

**Frontload Resources:** With a growing population on community supervision, resources within the first days and weeks after release are limited, especially for those released from jails.

**Quality Control:** While criminal justice agencies collect a wide variety of data, inconsistent definitions across agencies and time limit the state's ability to conduct comprehensive analysis.

---

Key Takeaways

- Community supervision population has grown 13% in the last decade to over 76,700 individuals
- Community supervision violators make up 39% of felony admissions
- Just over half of revocations last year were for technical violations
- While Tennessee has made great strides in adopting evidence-based practices to reduce recidivism, access is limited across the state
Review

Summary of Trends

Admissions Down 14%

Time Served Up 23%

Custody Population Up 12%
### Summary Takeaways

- Overall admissions are down 14%, but admissions of women and admissions from the East are growing
  - 74% of admissions are for non-person offenses
  - Nearly 5,000 admitted last year from community supervision
- Time served has grown 11 months or 23% overall
  - Sentences increased by 6 months in 10 years
  - Individuals are serving 20 months longer before parole release, and 7 months longer before expiration of sentence
- Releases to parole declined by more than 1,200
  - Grant rate at initial parole hearing declined by 59%
  - Just 24% of all parole hearings result in decision to grant

---

### Summary Takeaways

- Custody population grew 12% in 10 years, and female population increased 47%
  - Increasing numbers of non-person offenders, especially drug offenders, are responsible for growth
  - Two thirds of women are in custody for non-person offenses
  - Mental health cases in state prisons doubled
- Regional variation in type of cases leading to custody
  - Twice as many women in custody from East than West
- Technical revocations play a significant role
  - Over 4,000 revocations last year for technical violations
