Office of Policy, Planning and Assessment
Division of Health Statistics**

Tennessee U.S. Census Population Counts 2010

The following tables were prepared from the U.S. Census Summary File 1 Population Counts for 2010 data received from the University of Tennessee Center for Business and Economic Research. The tables are presented by age group, race, gender, and ethnicity for the State total and individual counties. Race data may be of any Hispanic or non-Hispanic origin. Hispanic data may be of any race. The Hispanic data in the tables are a separate component of the tables and are not additive in the totals as the race data are. The Census data for 2010 are considered to be more of a 'hard' count rather than an 'estimate'. As such, they should be considered to be very accurate and valid. It is recommended that these data now supersede the previous population estimate series for 2010 on all current and future work involving population data for year 2010. Data for year 2010 should not change on any subsequent updates or revisions to any population estimates and projections series.

Population Counts by Age Group, Sex, Race and Ethnicity, U.S. Census 2010
