## Executive Summary

The Kindergarten Immunization Compliance Assessment (i.e., Kindergarten Assessment) is an annual assessment completed by the Tennessee Department of Health's (TDH) Vaccine-Preventable Diseases and Immunization Program (VPDIP) in collaboration with the Tennessee Department of Education (TDOE) and Tennessee (TN) public and private schools.

The goal of the assessment is to evaluate immunization coverage and exemption levels of state-required vaccines among children entering kindergarten. Children entering kindergarten in TN must be up-to-date with the following vaccines at the time of enrollment:

- Hepatitis B Virus vaccine (HBV)
- Diphtheria-Tetanus-Pertussis vaccine (DTaP) or Diphtheria-Tetanus toxoid vaccine (DT), if medically indicated
- Poliomyelitis vaccine (IPV or OPV)
- Measles, Mumps, Rubella vaccine (MMR)
- Varicella (chickenpox) vaccine (or credible history of disease)
- Hepatitis A Virus vaccine (HAV)<sup>1</sup>

All required immunizations must be documented on the Tennessee Official Immunization Certificate. Immunizing providers are also strongly encouraged to record immunizations in the Tennessee Immunization Information System (TennIIS).

Tennessee uses a census-based approach to collect immunization data for the Kindergarten Assessment. All public schools with kindergarten students enrolled at the time of the assessment are asked to report assessment results, with the exception of public schools where the students must be tested to determine grade level and programs that are distance learning only. Additionally, all TDOE-accredited private schools in Categories 1, 1-SP, 2, and 3 that have kindergarten students enrolled at the time of the assessment are asked to report assessment results. For a description of private school categories please visit <https://www.tn.gov/education/school-options/non-public-schools/non-public-school-categories.html>. School nurses and/or other school personnel review students' immunization certificates and report aggregate, de-identified data to VPDIP from mid-November to mid-January of each school year. To validate schools' self-reported results, a sample of public and private schools are randomly selected by the Centers for Disease Control and Prevention (CDC) statisticians and audited every spring. Statewide results are published on the TDH website<sup>2</sup>, shared with TDOE and school districts, and published on the CDC SchoolVaxView website<sup>3</sup>.

### 2019-2020 School Year Statewide Summary

Statewide, 95.0% of all kindergarten students were fully immunized at the time of survey completion. Of the students who were not fully immunized, 1.9% had a temporary immunization certificate on file, 1.9% had a religious exemption on file, 0.8% had an incomplete immunization record, 0.3% were missing an immunization record, and 0.1% of students had a medical exemption on file.

---

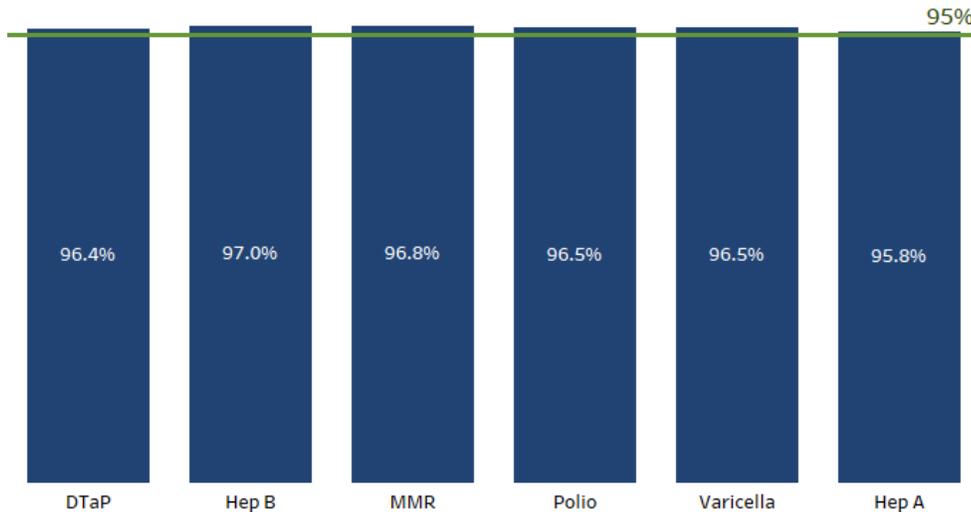

<sup>1</sup> <https://www.tn.gov/health/cedep/immunization-program/ip/immunization-requirements/childcare-12th-grade-immunization-requirements.html>

<sup>2</sup> <https://www.tn.gov/health/ceds-weeklyreports.html>

<sup>3</sup> <https://www.cdc.gov/vaccines/imz-managers/coverage/schoolvaxview/data-reports/coverage-trend/index.html>

If a student had a valid temporary certificate, a medical exemption, or an incomplete immunization record, schools were asked to report which individual vaccine series the student had completed. Figure 1 shows the percentage of public and private school students who were complete for each vaccine series. Note: The percentages in Figure 1 reflect the sum total of public and private school kindergarten students who were complete for an individual vaccine series, regardless of whether or not they had received all of the vaccines required for school enrollment.

**Figure 1.** Percentage of public and private school kindergarten students who were complete for each vaccine series, compared to Healthy People 2020 goal of 95% complete

### Public Schools Statewide Summary

All 1,016 public schools that were asked to complete the 2019-2020 Kindergarten Assessment submitted results. Statewide, 95% of public school students were fully immunized at the time of the survey (72,737 of 76,588 students). Of all public school students, 67.3% (n=51,562) had their immunization record completed in, and validated by, TennIIS. Students who were not fully immunized fell into the following categories, in decreasing order of prevalence:

- Temporary Certificate: 2.0% (n=1,515)
- Religious Exemption: 1.8% (n=1,399)
- Incomplete Record: 0.7% (n=557)
- Missing Record: 0.3% (n=217)
- Medical Exemption: 0.1% (n=93)
- Transfer <30 days: 0.1% (n=70)

### Private Schools Statewide Summary

A total of 182 private schools (out of 255 schools; 71.4%) with kindergarten enrollment completed the 2019-2020 Kindergarten Assessment. This completion rate is higher than in the previous three school years (range: 42.3% to 56.3%). Statewide, 93.8% of private school kindergarten students were fully immunized at the time of the survey (3,757 of 4,007 students). The 2019-2020 Kindergarten Assessment did not ascertain how many private school students had immunization certificates that were validated by TennIIS. Students who were not fully immunized fell into the following categories, in decreasing order of prevalence:

- Religious Exemption: 2.7% (n=110)
- Incomplete Record: 2.1% (n=84)
- Missing Record: 0.8% (n=34)

- Temporary Certificate: 0.3% (n=14)
- Medical Exemption: 0.2% (n=8)
- Transfer <30 days: N/A for private schools based on data collection methods

## Trends over Time

Over the past six years, the average annual kindergarten enrollment in TN was 78,500 students (range: 76,181 to 80,595). Annually, approximately 96% of all kindergarten students are enrolled in public schools, and approximately 4% are enrolled in private schools. The percentage of public and private school students who received all vaccines per Tennessee’s state requirements for kindergarten entry (i.e., were “fully immunized”) has consistently been approximately 95% over the past six years (range: 94.8% to 95.6%). For a community to be at low-risk for a vaccine-preventable disease outbreak, this rate should remain above 95%.

Figure 2 shows the percentage of public school students fully immunized compared to the percentage of students documented as fully immunized in TennIIS (i.e., the child had all his/her required immunizations for kindergarten entry recorded in TennIIS). The percentage of public school students documented in TennIIS rose from 43.4% in the 2015-2016 school year to 67.3% in the 2019-2020 school year; a 24% increase in just five years. This significant increase is attributed to the concerted efforts of the VPDIP program to increase TennIIS participation among immunizing providers and school users statewide.

**Figure 2.** Percentage of public school students fully immunized, and percentage of public school students whose immunization records were complete in TennIIS, over time

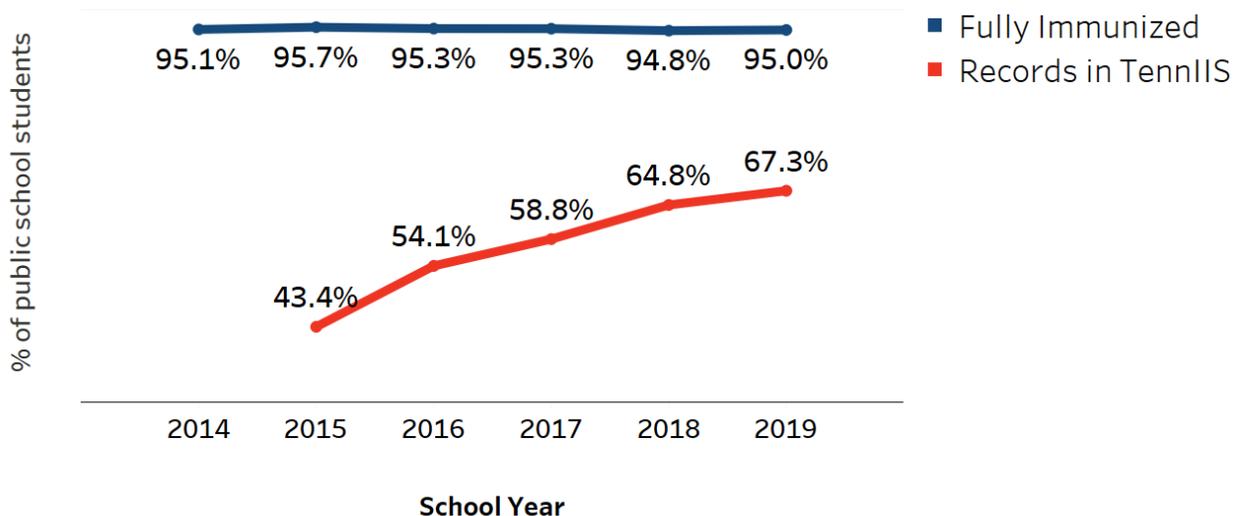

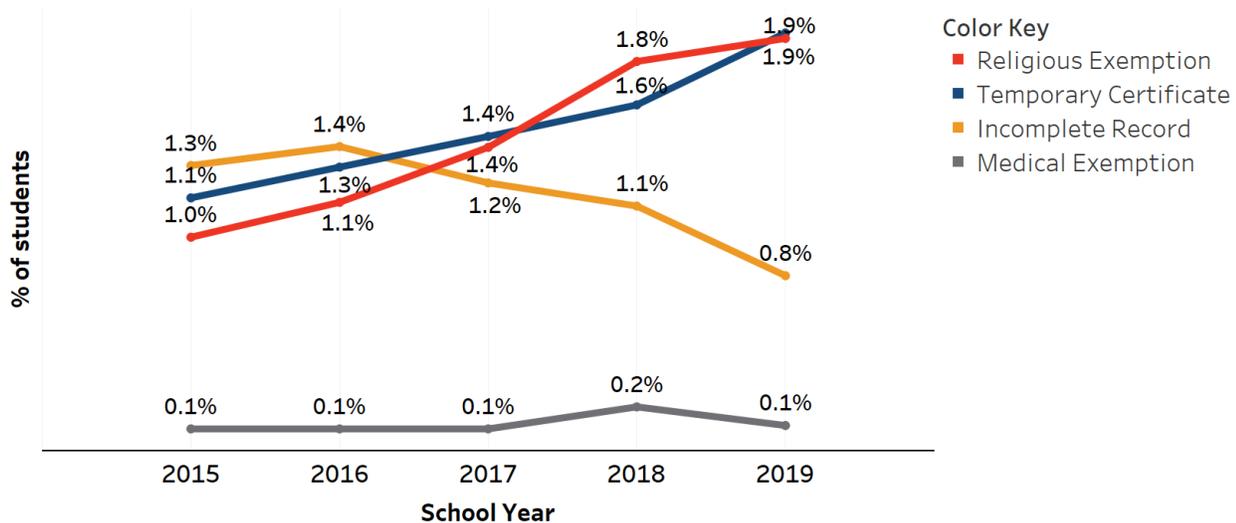

Figure 3 shows the percentage of all TN kindergarten students who were not fully immunized, by category, over time. Over the past five years, the percentage of students with an incomplete immunization record has decreased over time (see Figure 3, gold line). However, the percentage of students claiming a religious exemption and the percentage of students with a temporary immunization certificate have each increased over the past five years by nearly 1% (see Figure 3, blue and red lines). The percentage of students claiming a religious exemption rose from 1.0% to 1.9% between the 2015-2016 and the 2019-2020 school years, and the percentage of students with a temporary immunization certificate rose from 1.1% to 1.9% in the same time frame. It should be noted that none of the major Christian denominations, including Roman Catholic, Baptist, Methodist, Episcopalian, Presbyterian, Lutheran, Pentecostal, Church of Jesus Christ of Latter-Day Saints, Eastern Orthodox, Jehovah’s Witness, Mennonite, Quaker, and Unitarian-Universalist object to immunizations. Similarly, Judaism, Islam, Hinduism, Jainism, and Scientology also have no objection to immunizations. The rising

number of religious exemptions in the state of Tennessee is likely due to parents filing a religious exemption in lieu of a personal philosophical exemption, despite the Tennessee Code Annotated stating that doing so is subject to penalty of perjury.<sup>4</sup> A temporary immunization certificate is issued when a child has not received all required vaccines, but is in the process of completing them. A temporary certificate expires one month after the date that the next required immunization is due, according to the minimum acceptable (“catch-up”) dose interval per the CDC/ACIP schedule.<sup>5</sup> An expired temporary immunization certificate is not valid proof of immunization; students with an expired temporary certificate are classified as having an incomplete vaccine record in the Kindergarten Assessment.

The percentage of kindergarten students claiming medical exemptions from a vaccine remained stable at approximately 0.1% each year (see Figure 3, grey line). The percentage of students with missing vaccine records over the same time period has also remained stable at approximately 0.5% (not shown in figure).

**Figure 3.** Percentage of all TN kindergarten students not fully immunized, by category, over time

We hope you find the new format of the 2019-2020 Kindergarten Assessment report useful in understanding the statewide trends in compliance with kindergarten immunization requirements.

Questions and comments regarding this report or the Kindergarten Assessment may be directed to [School.Imm@tn.gov](mailto:School.Imm@tn.gov).

Sincerely,

Michelle Fiscus, MD FAAP  
 Medical Director  
 Tennessee Vaccine-Preventable Diseases and Immunization Program

# 2019-2020 Kindergarten Immunization Compliance Assessment Results

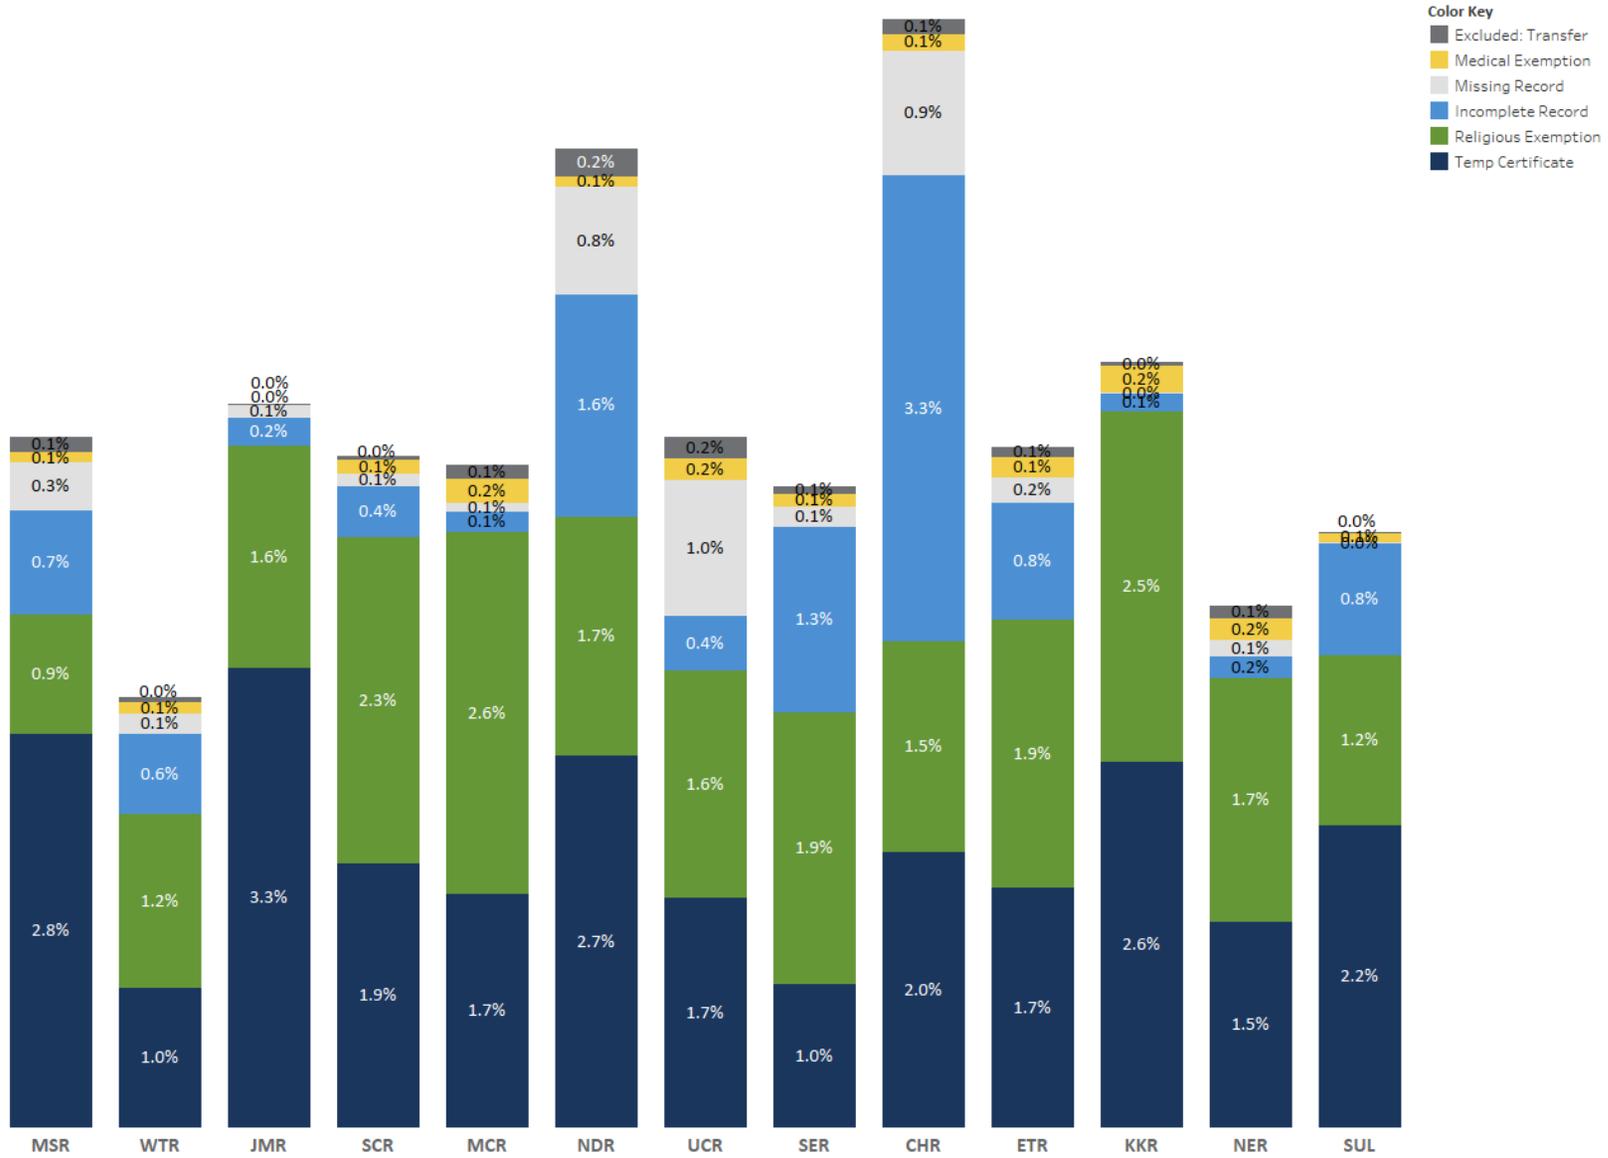

## Public Health Regions Summary

The percentage of public school students fully immunized across Tennessee’s public health regions ranged from 92.1% to 97.1%, with Chattanooga/Hamilton Region having the lowest percentage of fully immunized students and West Tennessee Region having the highest percentage of fully immunized students during the 2019-2020 school year (see Figure 4). Figure 5 displays the percentage of public school students who had a temporary certificate, a religious exemption, an incomplete record, were missing an immunization record, or had a medical exemption, across Tennessee’s public health regions.

**Figure 4.** Percentage of public school students fully immunized, the number of public school students fully immunized, and the number of students not fully immunized, by public health region during the 2019-2020 school year

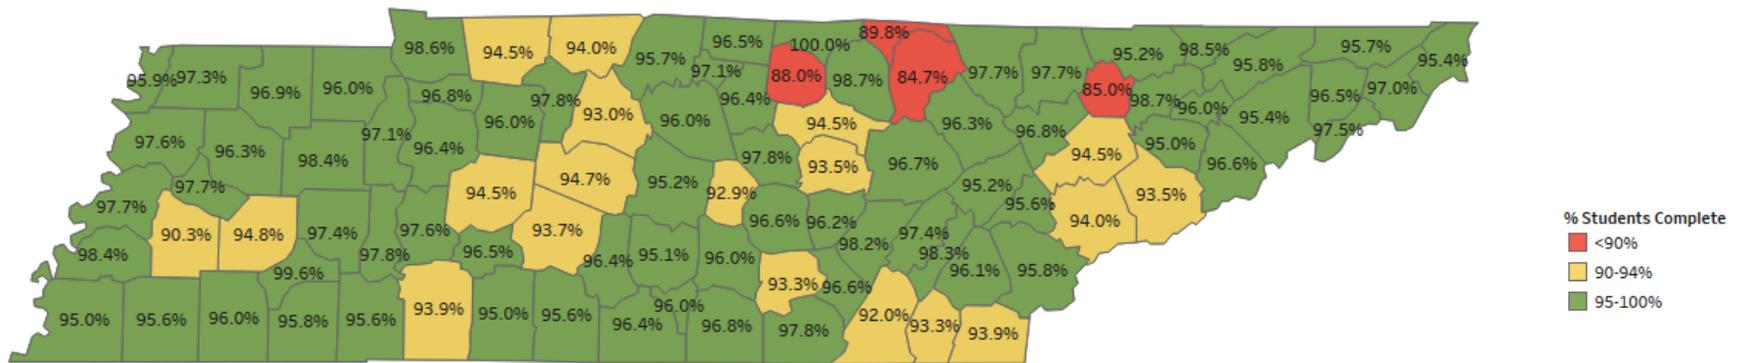

**Figure 5.** Percentage of public school students with a temporary immunization certificate, religious exemption, incomplete record, missing record, medical exemption, and excluded transfer students, by public health region during the 2019-2020 school year

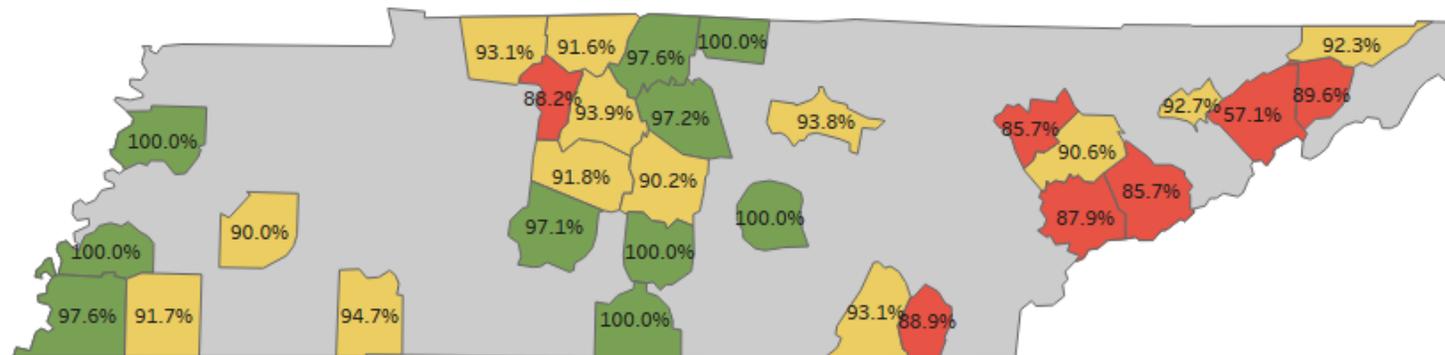

## County-Level Summary

The percentage of public school students who were fully immunized, by county, ranged from 84.7% (Fentress County) to 100% (Clay County) (see Figure 6). Among private schools, the range was from 57.1% (Greene County) to 100% (Bedford, Dyer, Lincoln, Macon, Tipton and Warren Counties) (see Figure 7). Note that the number of public and private schools within each county varies, and not all counties have private schools. For a detailed breakdown of the number of public and private schools within each “percentage fully immunized” category, and the total number of students in each county, see Tables 1 and 2, respectively.

**Figure 6.** Percentage of **public school** students fully immunized, by county

**Figure 7.** Percentage of **private school** students fully immunized, by county (**Note:** 182 out of 255 schools completed the 2019-2020 Kindergarten Assessment; this may influence the percentage of students fully immunized within each county)

High immunization coverage rates are critical to avoiding Vaccine-Preventable Disease (VPD) outbreaks (e.g., measles). A VPD outbreak may occur when community members are inadequately immunized against a disease. To remain at low risk for a VPD outbreak the immunization rate should remain at or above 95%. In the maps above and tables below, an immunization rate of at least 95% meets this immunization goal, an immunization rate of 90% to 94.9% needs improvement, and an immunization rate below 90% makes the community members vulnerable to preventable outbreaks.

For detailed Kindergarten Assessment results at the county, school districts, and school levels, please see the *Public School Districts (SD) by County Summary* and the *Private Schools by County Summary* sections below.

## Public School Districts (SD) by County Summary

The following series of tables and graphs capture information at two different levels: 1) at the county-level, featuring information for all school districts within the county; and 2) at the school district level, featuring information for all schools within the school district. Data are presented by county in alphabetical order, with school districts nested under each respective county in alphabetical order, and schools nested under each respective school district in alphabetical order.

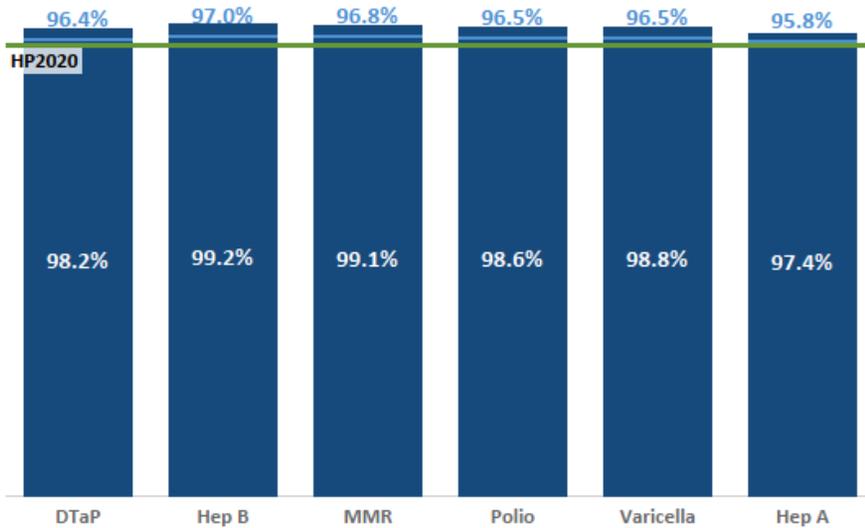

Below are descriptions of each category shown in the county and school district tables and graphs. All table percentages on a given row are the percentage of the “Total Students” number on that row.

<b>County</b>	Tennessee county name. School districts are grouped into their corresponding county.
<b>School District</b>	Department of Education school district name. Schools are grouped into their corresponding school district.
<b>School Name</b>	School name, listed alphabetically within each school district.
<b>Total Students</b>	Total number of enrolled kindergarten students at the time of immunization record assessment.
<b>Fully Immunized</b>	Number and percentage who meet state school entry requirements by being fully immunized.
<b>Religious Exemption</b>	Number and percentage with a valid religious exemption.
<b>Medical Exemption</b>	Number and percentage with a valid medical exemption to one or more vaccines.
<b>Temporary Certificate</b>	Number and percentage with a valid temporary certificate.
<b>Excluded Transfer</b>	Students exempt from assessment because records are unavailable due to a recent transfer from another TN school (within 30 days of the assessment).
<b>Incomplete Record</b>	Number and percentage who do not meet requirements because they have an incomplete vaccination record.
<b>Missing Record</b>	Number and percentage who do not meet requirements because the school has no official immunization certificate on record.

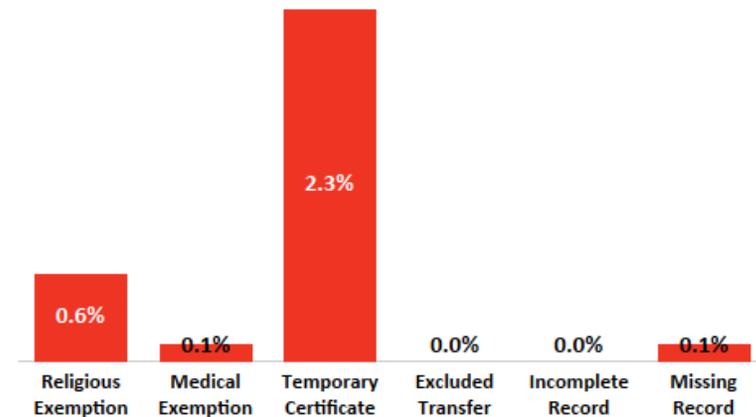

## ANDERSON COUNTY
