

TENNESSEE INFLUENZA WEEKLY REPORT

WEEK 32

August 3, 2025 - August 9, 2025

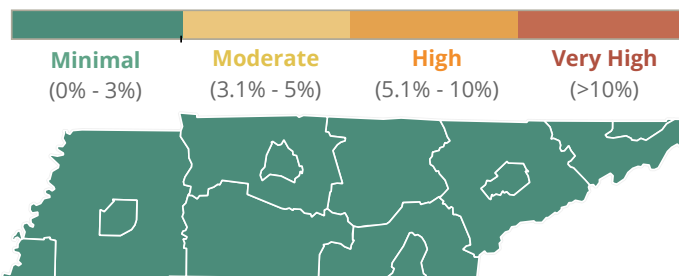

INFLUENZA ACTIVITY SNAPSHOT

SURVEILLANCE INDICATOR	TREND	CURRENT WEEK	PREVIOUS WEEK
 ILLNESS Percentage of outpatient visits due to influenza-like illness (ILI)	▶	0.9%	0.8%
 LABORATORY Percentage of positive specimens & predominant strain of influenza	▶	9.4%	0.0%
		<i>n/a</i>	<i>n/a</i>
		NEWLY REPORTED	SEASON TOTAL
		<i>during week of August 3, 2025</i>	<i>since October 1, 2024</i>
 OUTBREAKS 2 or more ill persons of a shared setting		0	100
 DEATHS Newly reported* and season total pediatric influenza-associated deaths in TN		0	6

*Deaths are reported publicly once the public health investigation is complete and cases have been confirmed. The week of reporting may not reflect the actual week of death.

INFLUENZA-LIKE ILLNESS (ILI)

Percent of Outpatient Visits for Influenza-Like Illness
Week 32

The U.S. Outpatient Influenza-like Illness Surveillance Network (ILINet) monitors outpatient visits for respiratory illness referred to as influenza-like illness (ILI). Tennessee has approximately 100 sentinel providers across the state that contribute this data weekly from a variety of healthcare setting such as primary care, pediatrics, county health departments, student health centers, and emergency departments.

ILI is defined as a fever plus cough or sore throat, not laboratory-confirmed influenza. Therefore these data may capture respiratory illness visits due to infection with any pathogen that can present with similar symptoms, including influenza, SARS-CoV-2, and RSV.

TN State Average	0.9%
Chattanooga/Hamilton County Metro	1.1%
East Region	0.8%
Jackson/Madison County Metro	0.9%
Knox County Metro	0.1%
Memphis/Shelby County Metro	1.1%
