# Executive Summary

Kindergarten-aged children are more susceptible to illnesses due to close physical interactions commonly found in classroom settings. Vaccination builds lasting immunity and helps prevent outbreaks in schools and the broader community. While the immunization coverage rate among kindergartners remains relatively high, Tennessee has consistently fallen below the statewide goal of 95.0% coverage for the past few years. Declining immunization coverage rates increase the risk of outbreaks and rare but serious outcomes, including death, from vaccine-preventable diseases among Tennessee children.

During the 2024-2025 school year, the immunization coverage rate of children enrolled in kindergarten in Tennessee declined 0.5% to 92.3%. This marks the fourth consecutive year a decrease in the immunization coverage rate of kindergarten-required vaccines has been observed. Furthermore, the immunization coverage rate was higher in public schools (92.6%) than in private schools (87.2%). Over the last four years, this assessment has concurrently documented an increase in the percentage of students filing for religious exemptions, with 3.5% of kindergartners claiming this exemption in the 2024-2025 school year. An increase in exemptions over this four-year timeframe partially contributes to falling immunization coverage rates.

## **Key Findings**

- Statewide, 92.3% of all kindergartners were fully immunized with all required vaccines for kindergarten entry. The 2024-2025 coverage rate is below the 95.0% statewide goal.
- During 2024-2025, the percentage of counties in which 95.0% of kindergartners were fully immunized with all required vaccines was 15.0% (14 of 93 reporting counties). Last year, 34.4% (32 of 93 reporting counties) met the 95.0% threshold. This represents a decrease of over 50.0% compared to the previous school year.
- Among kindergartners, 3.5% filed for a religious exemption. This is an increase from the prior school year. In fact, religious exemptions have increased annually since 2020 when the rate was 1.8%.
- Public schools had a higher immunization coverage rate (92.6%, 973 reporting schools) compared to private schools (87.2%, 129 reporting schools).

# About this Assessment

The Kindergarten Immunization Compliance Assessment (*i.e.*, Kindergarten Survey) is an annual assessment completed by the Tennessee Department of Health's (TDH) Vaccine-Preventable Diseases and Immunization Program (VPDIP) in collaboration with the Tennessee Department of Education (TDOE) and Tennessee public and private schools.

The goal of the assessment is to describe immunization coverage and exemptions for state-required vaccines among children entering kindergarten. Children entering kindergarten in Tennessee must be up to date with the following vaccines which protect against common childhood illnesses at the time of enrollment<sup>1</sup>:

- **Diphtheria-Tetanus-Pertussis vaccine (DTaP)**
- **Hepatitis B Virus vaccine (HBV)**
- **Measles, Mumps, Rubella vaccine (MMR)**
- **Poliomyelitis vaccine (IPV or OPV)**
- **Varicella (chickenpox) vaccine/credible history of disease**
- **Hepatitis A Virus vaccine (HAV)**

All required immunizations must be documented on the Tennessee Official Immunization Certificate or a valid U.S. military immunization record.<sup>2</sup> Immunizing providers are also strongly encouraged to record immunizations in the Tennessee Immunization Information System (TennIIS). TennIIS serves all Tennesseans as a system to confidentially and quickly receive a vaccination record for important things like travel and school requirements. The state recognizes five different types of immunization certificates and exemptions:

**Complete**: All vaccination requirements are completed according to the CDC immunization schedule or catch-up immunization schedule.

**Temporary**: A temporary immunization certificate is issued when a child has not received all required vaccines but is in the process of obtaining them. A temporary

---

<sup>1</sup> <https://www.tn.gov/health/cedep/immunization-program/ip/immunization-requirements/childcare-12th-grade-immunization-requirements.html>

<sup>2</sup> <https://www.capitol.tn.gov/Bills/112/Bill/SB0386.pdf>

certificate expires one month after the date that the next required immunization is due, according to the minimum acceptable (“catch-up”) dose interval per the CDC/ACIP schedule. An expired temporary immunization certificate is not valid proof of immunization. Regardless of expiration status, students with a temporary certificate are classified as having an incomplete vaccine record.

**Transfer:** Child has recently transferred from out-of-state and is in the process of obtaining the Tennessee Official Immunization Certificate.

**Religious Exemption:** This exemption requires a signed statement by the parent/guardian that vaccination conflicts with their religious tenets or practices.

**Medical Exemption:** Physicians (MD, DO) or department Public Health Nurses are authorized to indicate specific vaccines from which children are medically exempted (due to risk of harm), preferably on the TDH medical exemption form attached to the Tennessee Official Immunization Certificate. Other vaccines remain required. The medical reason for the exemption does not need to be provided.

Per Department of Education statute, T.C.A. § 49-6-5001, children who have incomplete or missing documentation of childhood immunizations without one of the above exemptions are not permitted to attend public school. Parents or guardians may receive a TennNIS record of immunizations entered by providers for documentation purposes by contacting their health department.

Public Chapter 169 Senate Bill No. 386 allows valid military immunization records to be submitted for school entry. Immunization requirements are the same for these military records, and students are reported in the category that represents their immunization status.

### ***Assessment Process***

Tennessee uses a census-based approach to collect immunization data for the Kindergarten Survey. All public schools with kindergarten students enrolled at the time of the assessment are asked to report results, except for public schools where the students must be tested to determine grade level and programs that are distance learning only. Additionally, all TDOE-accredited private schools in Categories 1, 1-SP, 2, and 3 that have kindergarten students

enrolled at the time of the assessment are asked to report results<sup>3</sup>. School nurses and/or other trained school personnel review students' immunization certificates and report their immunization statuses to VPDIP every school year. Statewide results are published on the TDH website<sup>4</sup>, shared with TDOE and school districts, and published on the CDC SchoolVaxView website<sup>5</sup>. Kindergarten Survey data for multiple years can be found on the TDH Immunization Coverage Rate Dashboard website<sup>6</sup> and can be used to draw comparisons against national objectives and evaluate trends over time.

## Detailed Findings

### *Vaccine-Specific Data*

To evaluate compliance with the Department of Education's vaccine requirements, including use of exemptions, individual vaccine series (e.g., MMR), and exemptions are described. This helps TDH assess outbreak risk for specific vaccine-preventable diseases. If a student has a valid temporary certificate, medical exemption, religious exemption, or an incomplete immunization record, schools are asked to report which individual vaccine series the student has completed. **Figure 1** shows the percentage of public and private school students who were complete for each vaccine series compared to the statewide goal of 95.0%. The percentages in **Figure 1** reflect the sum of both public and private school kindergarten students who were complete for an individual vaccine series, regardless of whether they had received all the vaccines required for school enrollment.

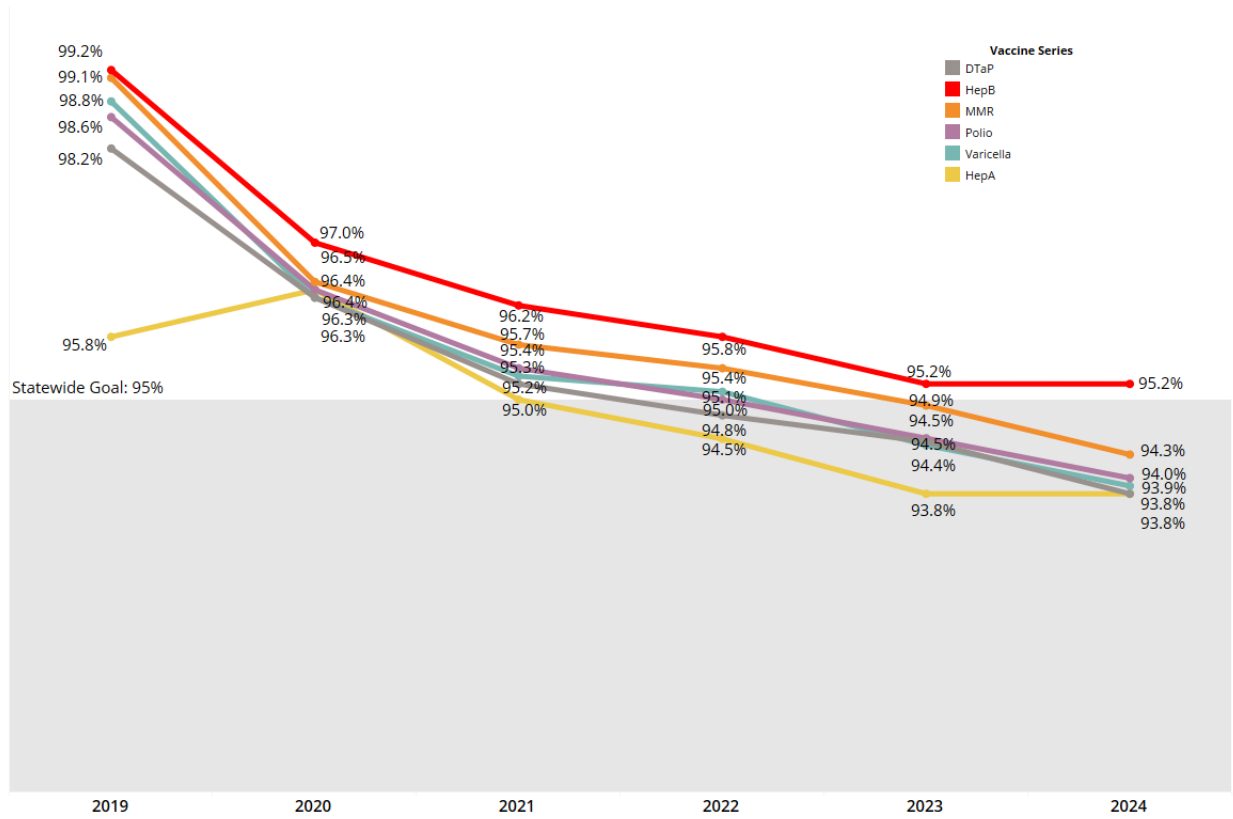

**Figure 1. Percentage of All Kindergarten Students Who Were Complete for Each Vaccine Series Compared to the Statewide Goal, 2024-2025**

Blue colored bars indicate a rate of 95% coverage or greater, while gray colored bars indicate a rate of less than 95% coverage

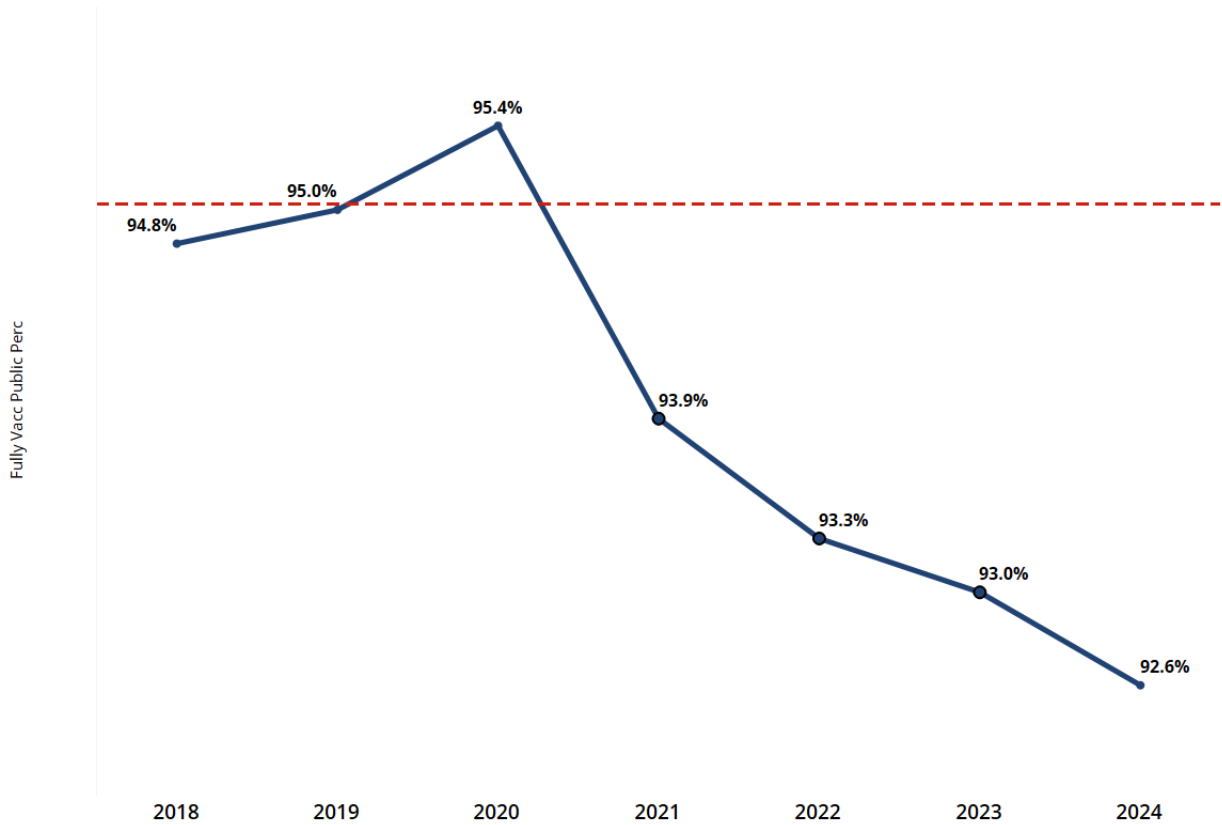

Tennessee saw almost all coverage rates continue to fall this year. DTaP, MMR, Polio, and Varicella coverage rates dropped to 93.8%, 94.3%, 94.0%, and 93.9%, respectively, when compared to 2023 (94.5%, 94.9%, 94.5%, and 94.4%), putting Tennessee children at greater risk for these diseases. Meanwhile, Hepatitis B and Hepatitis A coverage rates remained the same at 95.2% and 93.8%, respectively, when compared to last year's rates. **Figure 2** shows the trends of all vaccines from 2019 to 2024.

**Figure 2. Percentage of all Kindergarten Students Immunized, by Vaccine Series, Tennessee, 2019-2024**

Between 2015-2020, the percentage of Tennessee kindergartners who received all school-required vaccines for kindergarten entry (*i.e.*, were “fully immunized”) remained consistently close to 95.0%. However, since the 2020-2021 school year (see **Figure 3**), we have seen a decline in fully immunized kindergartners, with an all-time low of 92.3% for 2024-2025.

**Figure 3. Percentage of Fully Immunized Public School Students in Tennessee, 2018-2024**

## ***Exemptions***

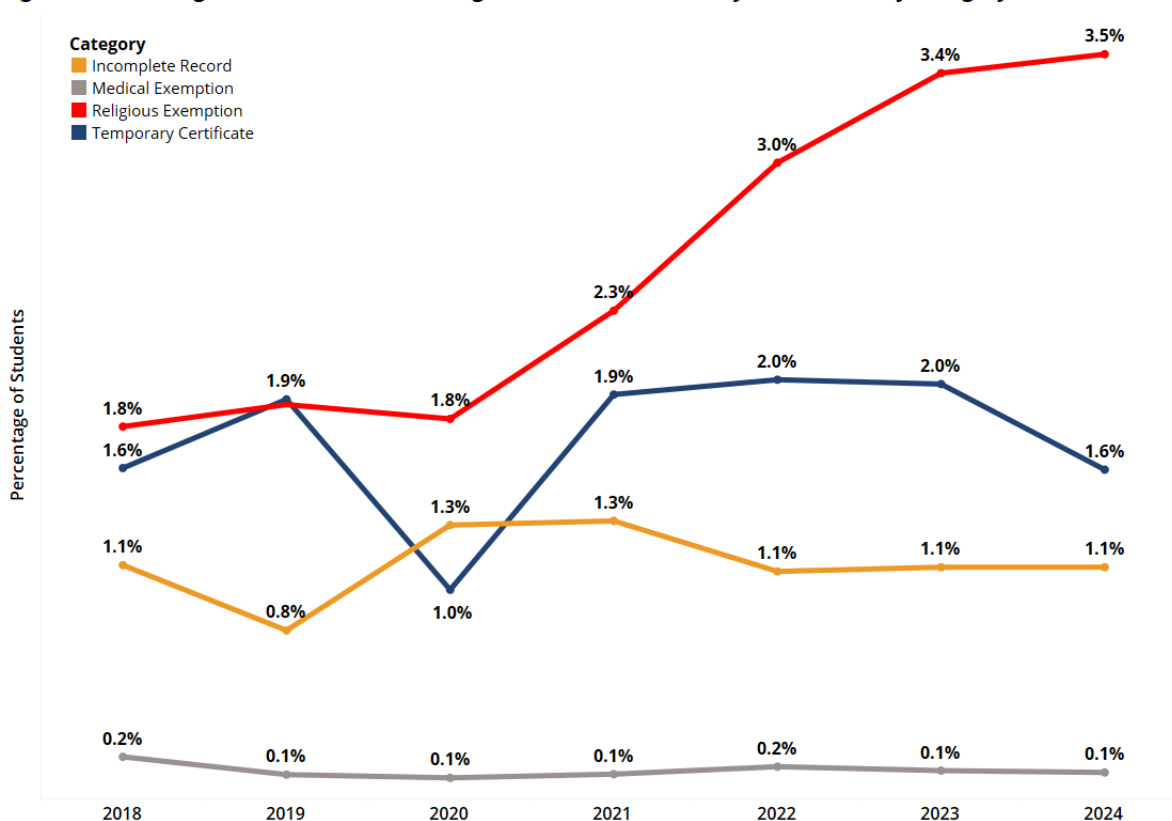

The percentage of all Tennessee kindergarten students who were not fully immunized, by category, over time, is shown in **Figure 4**. Approximately 6.6% of students lack complete immunization records required for enrollment (medical exemptions, religious exemptions, temporary certificates, incomplete records, and missing records).

In the 2024-2025 school year, the percentage of religious exemptions filed in participating private schools increased by 2.3% to 8.9% while the religious exemption rate for public schools increased by 0.1% to 3.3%. The percentage of students filing for a religious exemption has increased annually since 2020 and reached an all-time high in the 2024-2025 school year, with 3.5% of all kindergarten students having filed for a religious exemption. In 2024-2025, the percentage of students categorized as having incomplete records and medical exemptions

remained stable at 1.1% and 0.1%, respectively. The percentage of students who received temporary certificates decreased by 0.4%. The total exemption rate declined from the previous survey from 7.1% to 6.6%. However, the trends observed in recent years describe a substantial and increasing proportion of kindergartners who are not fully immunized. This trend is expected to place Tennessee children, schools, and communities at increasing risk for vaccine-preventable diseases, outbreaks, and deaths.

**Figure 4. Percentage of All Tennessee Kindergarten Students Not Fully Immunized, by Category, 2018-2024**

- Religious Exemption: 3.5% (n=2,676)
- Temporary Certificate: 1.6% (n=1,183)
- Incomplete Record: 1.1% (n=830)
- Missing Record (not shown): 0.3% (n=200)
- Medical Exemption: 0.1% (n=95)

## County Coverage

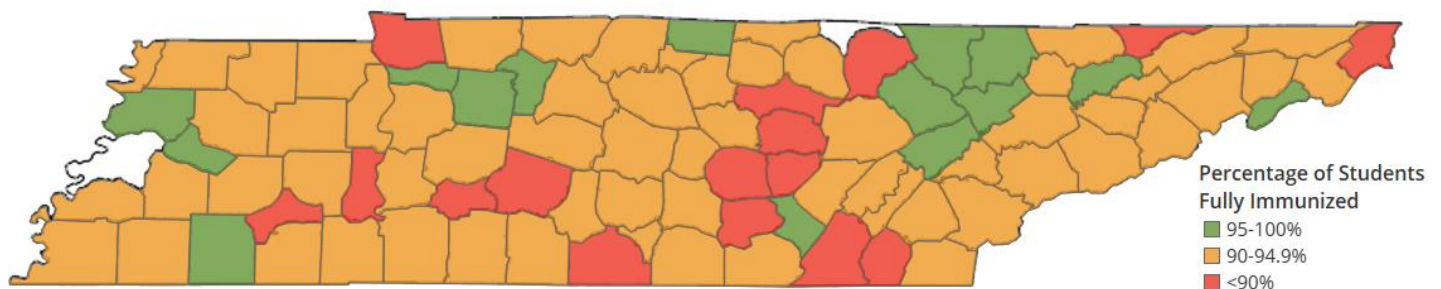

Certain communities and counties in Tennessee are expected to be at higher risk for outbreaks of vaccine-preventable diseases due to immunization coverage rates falling below 95.0%. The 95.0% level is widely considered the threshold needed to provide herd immunity for highly contagious diseases like measles. During the 2024–2025 school year, only 15.0% of Tennessee counties (14 of 93 reporting counties) achieved a 95.0% immunization coverage rate among kindergartners. This means that 79 counties fell short of the statewide goal for full kindergarten series coverage. In these counties, when a highly infectious disease like measles is introduced in a classroom, it would spread more easily among unvaccinated students.

Over the past four years, the percentage of counties meeting the 95.0% immunization coverage rate threshold has continued to decline. During the 2021–2022 school year, 45.3% of counties (43 of 95 reporting counties) reached this benchmark. In 2022–2023, that figure dropped to 27.4% (26 of 95 reporting counties). The downward trend continued in 2024–2025, with only 15.0% of counties (14 of 93 reporting counties) meeting the target immunization coverage rate (see **Figure 5**).

Kindergarten enrollment increased slightly in 2024–2025, rising by 0.7% to a total of 75,688 students. Of these students, approximately 5.0% were enrolled in private schools. **Figures 5–7** illustrate county-level immunization rates, including comparisons of public and private school coverage by county.

County-level immunization rates varied widely, ranging from 78.7% in Grundy County to 98.2% in Hardeman County (see **Figure 5**). It is important to note that the number of public and private schools varies by county, and not all counties include data from private schools. For more detailed information on the number of schools, student enrollment, and immunization rates by county and immunization category, refer to **Table 1** of **Appendix 1** in this report.

**Figure 5. Percentage of 2024-2025 Public and Private School Students Fully Immunized by County, Tennessee**

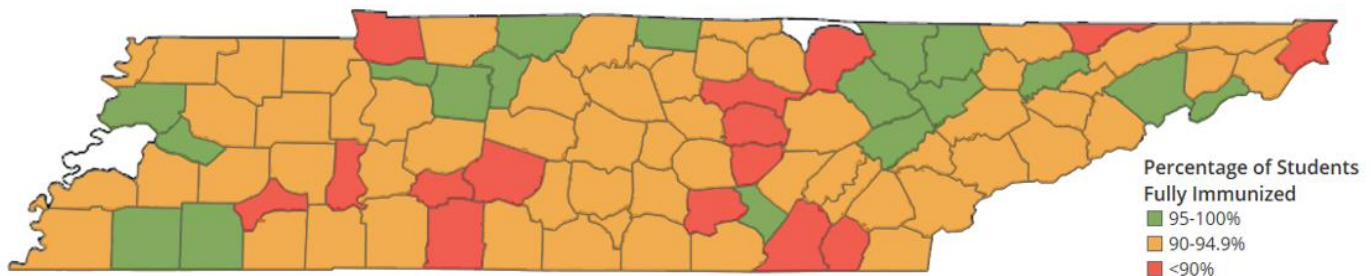

## Public School Statewide Summary

Of the 1,027 public schools surveyed during the 2024-2025 Kindergarten Survey, 973 (94.7%) responded. Statewide, 92.6% of public-school kindergartners were fully immunized at the time of the survey (66,574 of 71,927 students). Students who were not fully immunized fell into the following categories (Note: arrows and corresponding figures represent a percent change greater than 0.1% between the 2023-2024 and 2024-2025 assessments, if applicable).

- |                          |                |        |
|--------------------------|----------------|--------|
| • Religious Exemption:   | 3.3% (n=2,342) | ↑ 0.1% |
| • Incomplete Record:     | 1.0% (n=735)   | ↓ 0.1% |
| • Missing Record:        | 0.3% (n=185)   | ↓ 0.1% |
| • Temporary Certificate: | 1.6% (n=1,166) | ↓ 0.5% |
| • Transfer <30 days:     | 0.1% (n=86)    | ↔      |
| • Medical Exemption:     | 0.1% (n=88)    | ↔      |

Figure 6. Percentage of 2024-2025 Public School Students Fully Immunized by County, Tennessee

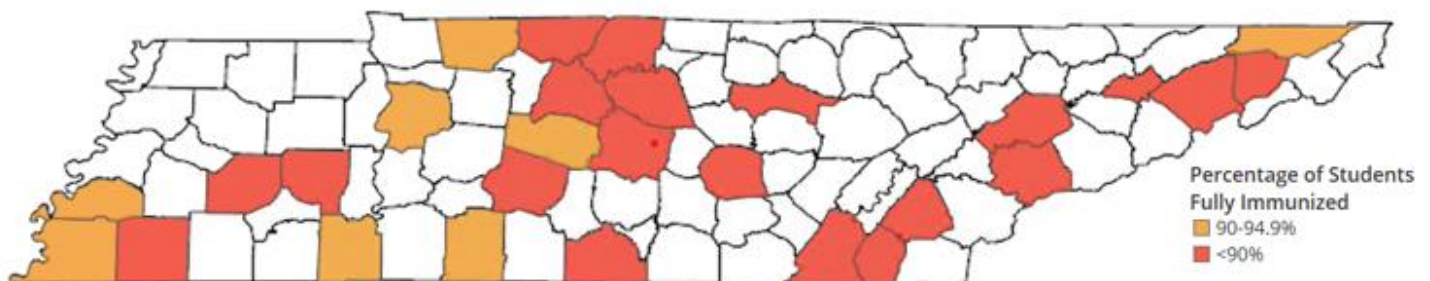

## Private School Statewide Summary

During the 2024-2025 survey, a substantial decline in the response rate of private schools occurred with 129 (52.9%) of 244 private schools responding (in comparison, the response rate was around 70.0% last year). Furthermore, 87.2% (3,279 of 3,761 students) of kindergartners enrolled in private schools were fully immunized, which represents a substantial 3.0% decrease in the fully immunized rate when compared to the previous year. Unlike public schools, for which student rosters are provided by the Department of Education, private schools lack centralized enrollment lists. Thus, the survey could not describe the number of private school students with immunization certificates validated by TennIIS. Overall, around 5.0% of all kindergartners were enrolled in private schools during the 2024-2025 school year.

Private school kindergartners who were not fully immunized fell into the following categories (Note: arrows and corresponding figures represent a percent change greater than 0.1% between the 2023-2024 and 2024-2025 assessments, if applicable):

- Religious Exemption: 8.9% (n= 334) ↑ 2.3%
- Incomplete Record: 2.5% (n= 95) ↑ 0.9%
- Missing Record: 0.4% (n=15) ↓ 0.8%
- Medical Exemption: 0.2% (n=7) ↑ 0.1%
- Temporary Certificate: 0.5% (n=17) ↑ 0.1%
- Transfer <30 days: N/A for private schools based on data collection methods

**Figure 7. Percentage of 2024-2025 Private School Students Fully Immunized by County, Tennessee**

Note: Only 129 out of 244 private schools completed the 2024-2025 Kindergarten Survey; this may influence the percentage of students fully immunized within each county.

## Conclusion

This survey described recent trends of increased vaccine exemptions and decreased immunization coverage and protection for Tennessee children. To reduce risks for Tennessee school-aged children from vaccine-preventable diseases and outbreaks, maintenance of high rates of immunization coverage through immunizations is required. Efforts to increase the public's awareness and actions by communities, providers and public health are critical to maintain safe school environments for all children. Tennessee's medical providers are trusted sources of information about childhood diseases and immunizations. Medical providers are encouraged to utilize TennIIS to review immunization records and provide catch-up immunizations at every opportunity. Thank you for partnering with us to inform and protect Tennessee communities and children.

Questions and comments regarding this report or the Kindergarten Survey may be directed to [School.Imm@tn.gov](mailto:School.Imm@tn.gov).

Communicable and Environmental Diseases and Emergency Preparedness Division  
Tennessee Department of Health

## ***Appendix 1: Percent Complete by County Table***

To minimize the risk of a vaccine-preventable disease outbreak, the immunization coverage rate should remain at or above 95.0% to control highly infectious diseases such as measles, according to the CDC<sup>7</sup>. In the maps above and tables below, TDH categorized an immunization rate of at least 95.0% as “meets immunization goal” (green), an immunization rate of 90.0% to 94.9% as “needs improvement” (yellow), and an immunization rate below 90.0% as “places the community at increased risk” (red).

For detailed Kindergarten Survey results at the county, school district, and school levels, please see the School Districts (SD) by County Summary section below in **Appendix 2**.

## ***Appendix 2: Public and Private School Summaries by County and School District***

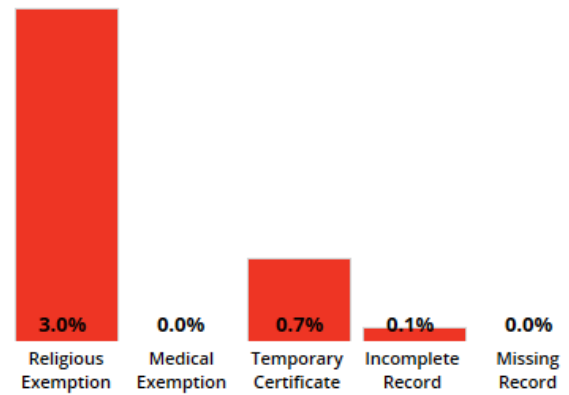

The following tables and graphs describe data: 1) at the county-level, featuring information for both public and private schools within the county; and 2) at the school district level, featuring information for all schools within the school district. Data are presented by county in alphabetical order, with school districts nested under each respective county in alphabetical order, and schools nested under each respective school district in alphabetical order.

## ANDERSON COUNTY
