Rate of Hispanic Cases by Zipcode in TN

As of **3/2/2024** there are **2,717,892** COVID-19 cases in Tennessee, a rate of **39,799** cases per 100,000 Tennesseans. Additionally, **4.0%** (**108,741** cases) of the total COVID-19 cases are reported among Hispanic Tennesseans, a rate of **30,857** cases per 100,000 Hispanic Tennesseans. According to U.S. Census population estimates, **5.2%** of the TN population is Hispanic.

The map above displays the rate of Hispanic COVID-19 cases per 1000 Hispanic Tennesseans by zipcode. If a zipcode has a rate of 5.0 COVID-19 cases per 1000 Hispanic Tennesseans, it can be interpreted that 5 out of every 1000 Hispanic Tennesseans in the zipcode have been counted as a COVID-19 case.

Hispanic Cases per 1000 Hispanic TNs

- No Cases Reported
- Rate Unstable
- 0-<25 Hispanic Cases per 1000
- 25-<50 Hispanic Cases per 1000
- 50-<75 Hispanic Cases per 1000
- 75-<100 Hispanic Cases per 1000
- 100+ Hispanic Cases per 1000

Hispanic Case Demographics

Age (years)	Hispanic Cases	% of Hispanic Cases	Hispanic Deaths	% of Deaths
