

Defending common sense

Advocacy history:

***TEDx talk has [1.9 million] views

***Keynote speaker at <UNICEF> and UN meetings in Belgium at the global vaccination summit

***Testimony before the senate H.E.L.P Committee was given on march 5th, 2019

***TIME magazine Next Generation leader

***Speaker at various health conferences throughout the United states

Source:

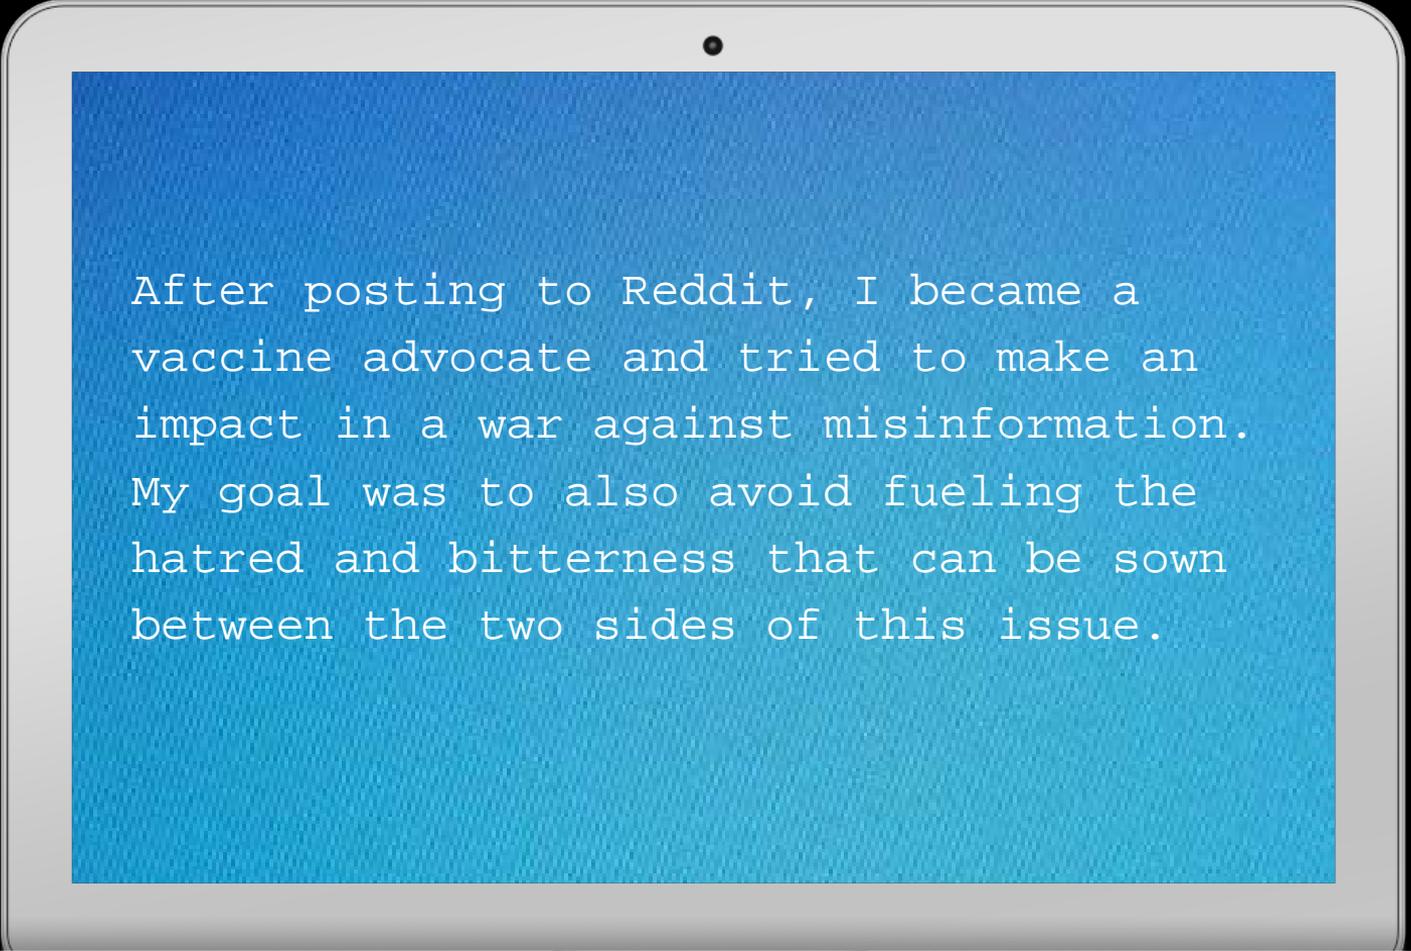

<My mother is an anti-vaccine advocate>

Beliefs include:

***Vaccines cause autism

***Vaccines cause brain damage

***Vaccines do not benefit the health
and safety of society

A silver laptop is shown from a front-facing perspective, slightly angled. The screen is the central focus, displaying a solid blue background with white text in a monospaced font. The text is centered and reads: "After posting to Reddit, I became a vaccine advocate and tried to make an impact in a war against misinformation. My goal was to also avoid fueling the hatred and bitterness that can be sown between the two sides of this issue." The laptop's bezel and a small circular camera lens are visible at the top of the screen. The bottom of the laptop shows a silver hinge and a portion of the keyboard area.

After posting to Reddit, I became a vaccine advocate and tried to make an impact in a war against misinformation. My goal was to also avoid fueling the hatred and bitterness that can be sown between the two sides of this issue.

Dear Ethan Lindenberger,

I've seen you testify before the committee to advocate laws to force Americans to vaccinate their children. I can tell you that you're a totally clueless 38-year-old young, fresh minded individual who doesn't understand the full facts of the harm vaccines have caused to innocent children. The problem is that you're a one-sided minded person who hasn't properly done his research from both side of the argument. You haven't even met families like mines who has a son that got vaccinated and now he is damaged for the rest of his life, explain that to me? Learn how to worry about yourself to make your own decisions instead of testifying before a committee to bash your mom and advocate laws to force Americans to get vaccinated.

You sound like a communist Anti-freedom liberal who wants to help the big pharmaceutical companies make huge profits from getting forced vaccine laws passed. What you don't know is that you're helping these pharmaceutical companies create millions of sick people from their vaccines so they can make billions in huge profits later in the long run to sell more of their toxic prescription and non-prescription drugs for chronic illness caused by their vaccines. What's going to happen in this country is that children who become disabled after getting vaccinated are going to become dependents who need 24/7 care for the rest of their lives. What you don't know is that disabilities caused by Big Pharma vaccines are going to cost taxpayers billions of dollars in Social Security and Medicare payouts for the lifetime care of these individuals who can't attend school to learn or work to contribute to society by paying taxes. Does that get you to think critically about this issue? What that means for the next generation is that half of the population is going to be dependent disabled people who are going to take from society.

What you don't understand is that vaccine manufacturers are exempt from liability lawsuits for injuries and deaths caused by their vaccines, even if their vaccines were contaminated during the manufacturing process. Ask yourself this question, if the vaccine manufacturers are not legally liable for serious injuries or deaths, would you take their vaccines? Lets think logically here because I feel like you don't. In my opinion, liability exemption is a huge red flag for consumers to be cautious about using big pharma vaccines. What you don't understand is that babies can't handle getting vaccines because their body isn't fully developed and they're fragile.

When the U.S. experienced a measles outbreak a year ago, I've learned from a news source that those people who tested positive for measles were in fact vaccinated against the disease. That leads me to believe that the mmm vaccine is nothing but "Snake Oil" creation out of a big pharma's lie. Also, the U.S. had a polio outbreak in the 40s and 50s because of poor sanitation and hygiene, but it got wiped out because of improved sanitation and hygiene not from vaccines. The problem with that is big pharma would add their vaccines as one of the contributing parts of wiping out polio which is the biggest lie people are led to believe.

What you don't understand is that Pharmaceutical companies are only in the business of making money by keeping people sick for life so they can sell tons of prescription drugs. They're not in the business of curing disease/ keeping people healthy because if they did that, it would put their multibillion-dollar company out of business. If a car manufacturer is exempt from legal liability for producing unsafe cars, would you buy one of their cars?

The reality is that vaccine scientists themselves who work for the pharmaceutical industry don't get their own families vaccinated because they know the harm these ingredients will cause to their loved ones. Even big pharma sales reps and some family doctors don't vaccinate their own families for the same

04/13/2020

reason. Also, in the pharmaceutical industry, you will find scientist, and sales reps quitting the industry in disgust for witnessing the terrible deceptions and fraud instructed by their employer to facilitate while working for the company. Those are the type of people you should go speak to them to learn more. I urge you to learn about Dr. William Thompson who works for the CDC and became whistleblower coming forward to admit the CDC has committed scientific fraud on vaccine safety studies.

When it comes to the safety of big pharma products, I've learned that pharmaceutical companies test their own products and fictitiously mark them as safe products to consumers, which is a huge red flag for consumers to watch out for. Also, big pharma companies have been known to destroy studies that prove that their own products are unsafe to consumers, but they will produce fictitious studies that says its safe. Also, you should look into the criminal history of these big pharmaceuticals who have been bribing doctors and politicians to help get their unsafe product put on the market.

Look into the criminal side of big pharma GSK who has been fined \$3 billion for fraud over the Vioxx drug. Also, look at this GSK sales representative in a Chinese court who was found guilty for bribery. This is one of the companies that manufactures vaccines that has committed scientific fraud on the safety studies of vaccines.

I urge you to take a deep look at the chart that shows a completely different picture that shows disease related death declining big before vaccines were introduced. This info will help you learn the real truth that the government and the pharmaceutical companies don't want you to know about.

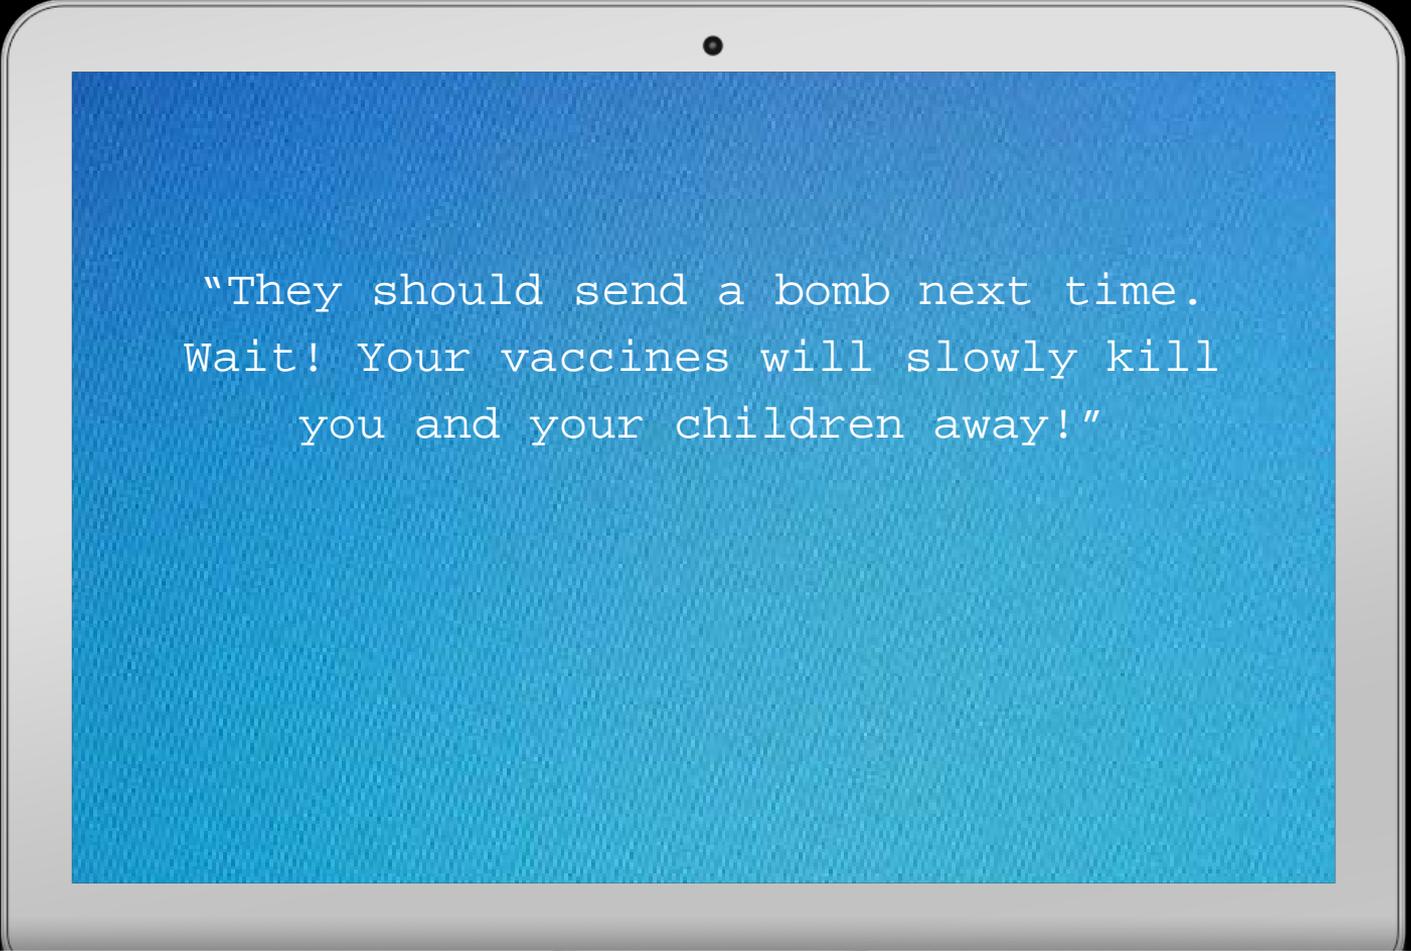

You should read a book called: "Natural Cures They Don't Want You To Know About" By Author: Kevin Trudeau where you will learn a lot about how the drug companies are corrupt and are only in the business of making money by keeping people sick. I've read the book and it has completely changed my mind of the way I think about good health without taking pharmaceutical drugs or vaccines.

Since you're pro-vaccine, I challenge you to get fully vaccinated from all the available vaccines to see if you deteriorate with serious health problems that is irreversible.

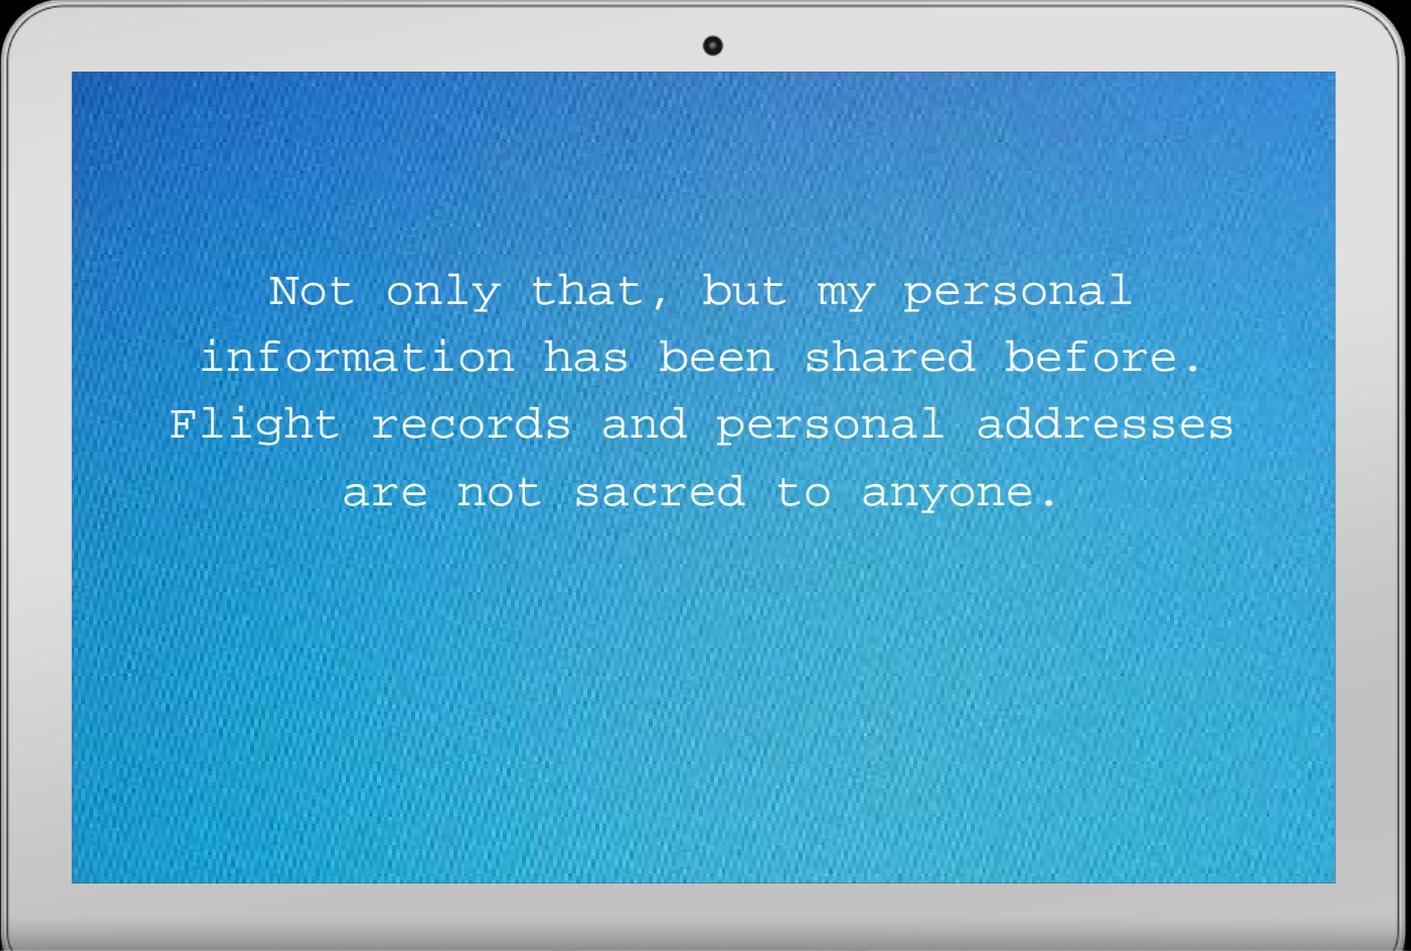

I hope that everything that I said to you so far will help get the wheels moving in your mind to think independently without having others such as the government and big pharma to tell you how to think. Also, I hope you've learned to never trust your government with your health and for others because most people like me don't rely on gov and big pharma info for good health. Just because the government says that vaccines are safe it doesn't mean its true.

Sincerely,

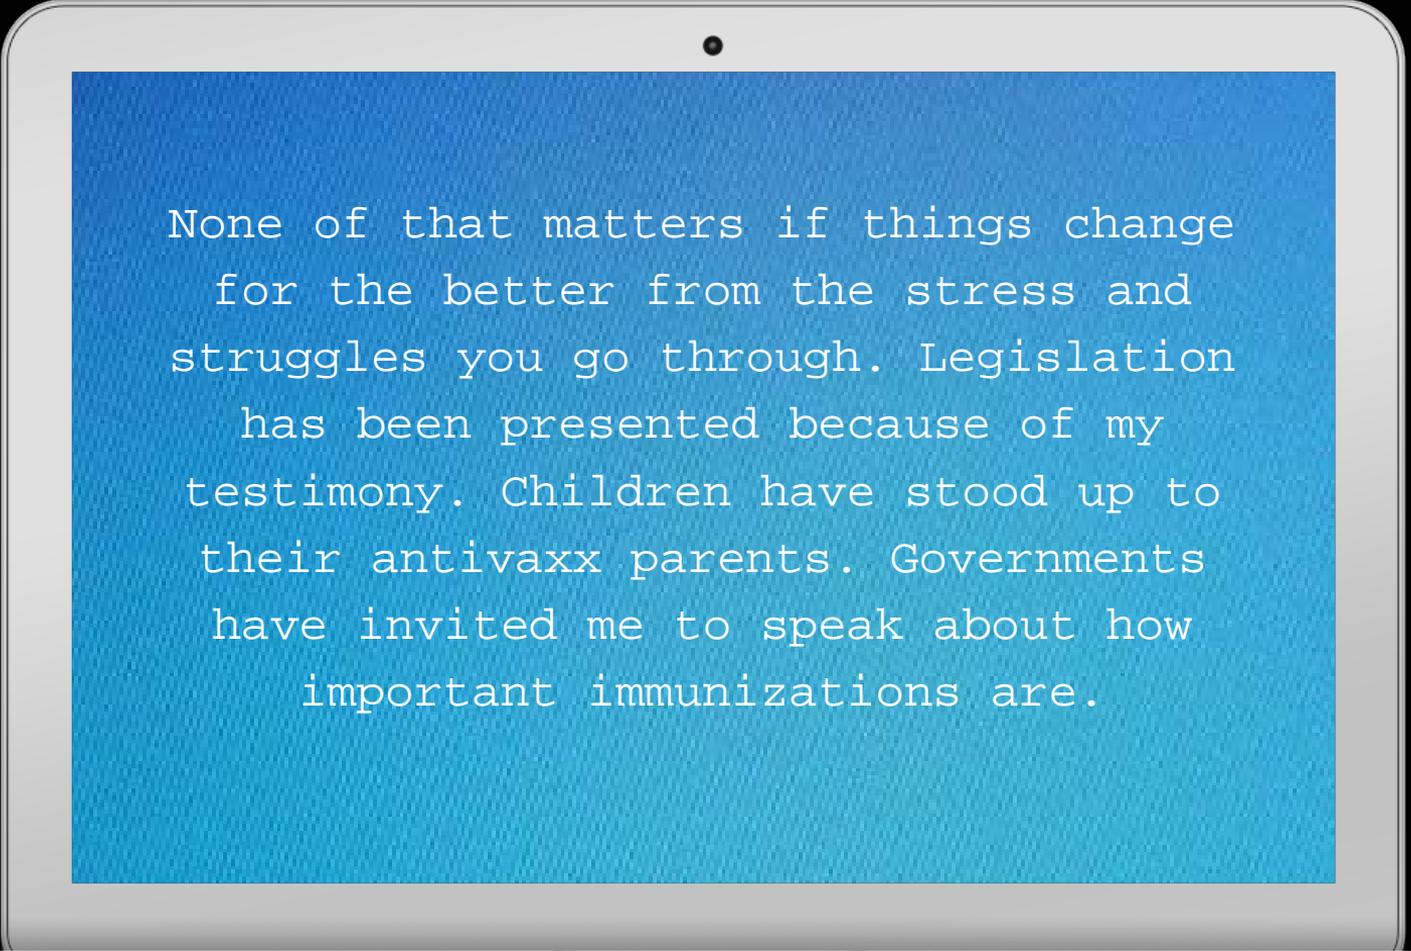

Anonymous person

A silver laptop is shown from a front-facing perspective, open. The screen is filled with a solid blue color. Centered on the screen is white text in a monospaced font. The text reads: "They should send a bomb next time. Wait! Your vaccines will slowly kill you and your children away!"

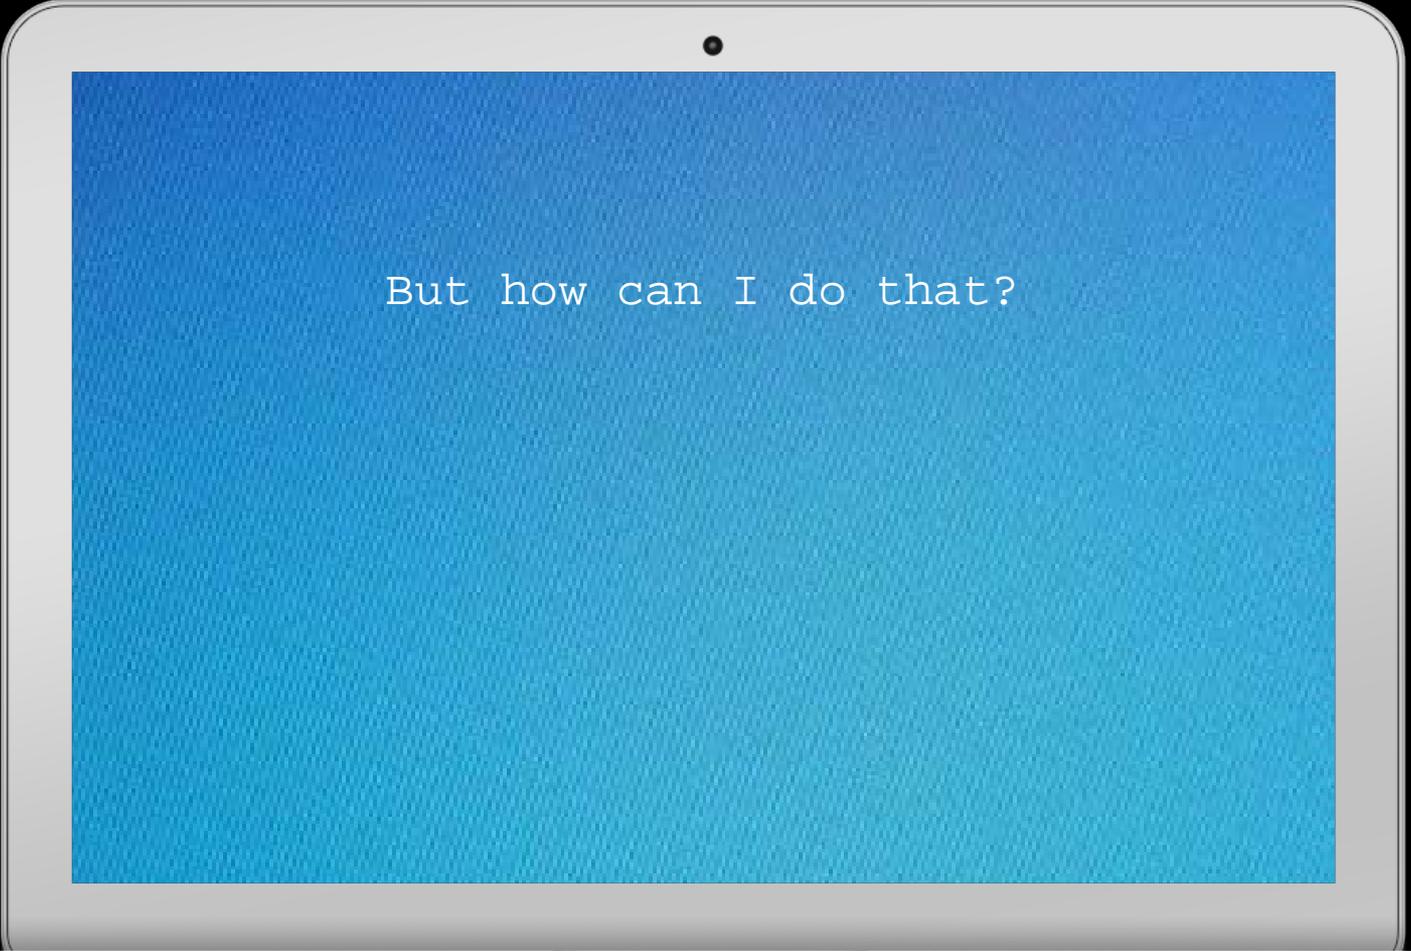

"They should send a bomb next time.
Wait! Your vaccines will slowly kill
you and your children away!"

A silver laptop is shown from a front-facing perspective, open. The screen is filled with a solid blue color. Centered on the screen is white text in a monospaced font. The text is arranged in four lines. The top line is indented from the left and right edges. The second line is also indented. The third and fourth lines are aligned with the left edge of the text block.

Not only that, but my personal
information has been shared before.
Flight records and personal addresses
are not sacred to anyone.

A silver laptop is shown from a front-facing perspective, open. The screen is the central focus, displaying a solid blue background with white text in a monospaced font. The text is centered and reads: "None of that matters if things change for the better from the stress and struggles you go through. Legislation has been presented because of my testimony. Children have stood up to their antivaxx parents. Governments have invited me to speak about how important immunizations are." The laptop's bezel and a small circular camera lens are visible at the top of the screen. The bottom of the laptop shows a silver hinge and a small rectangular port.

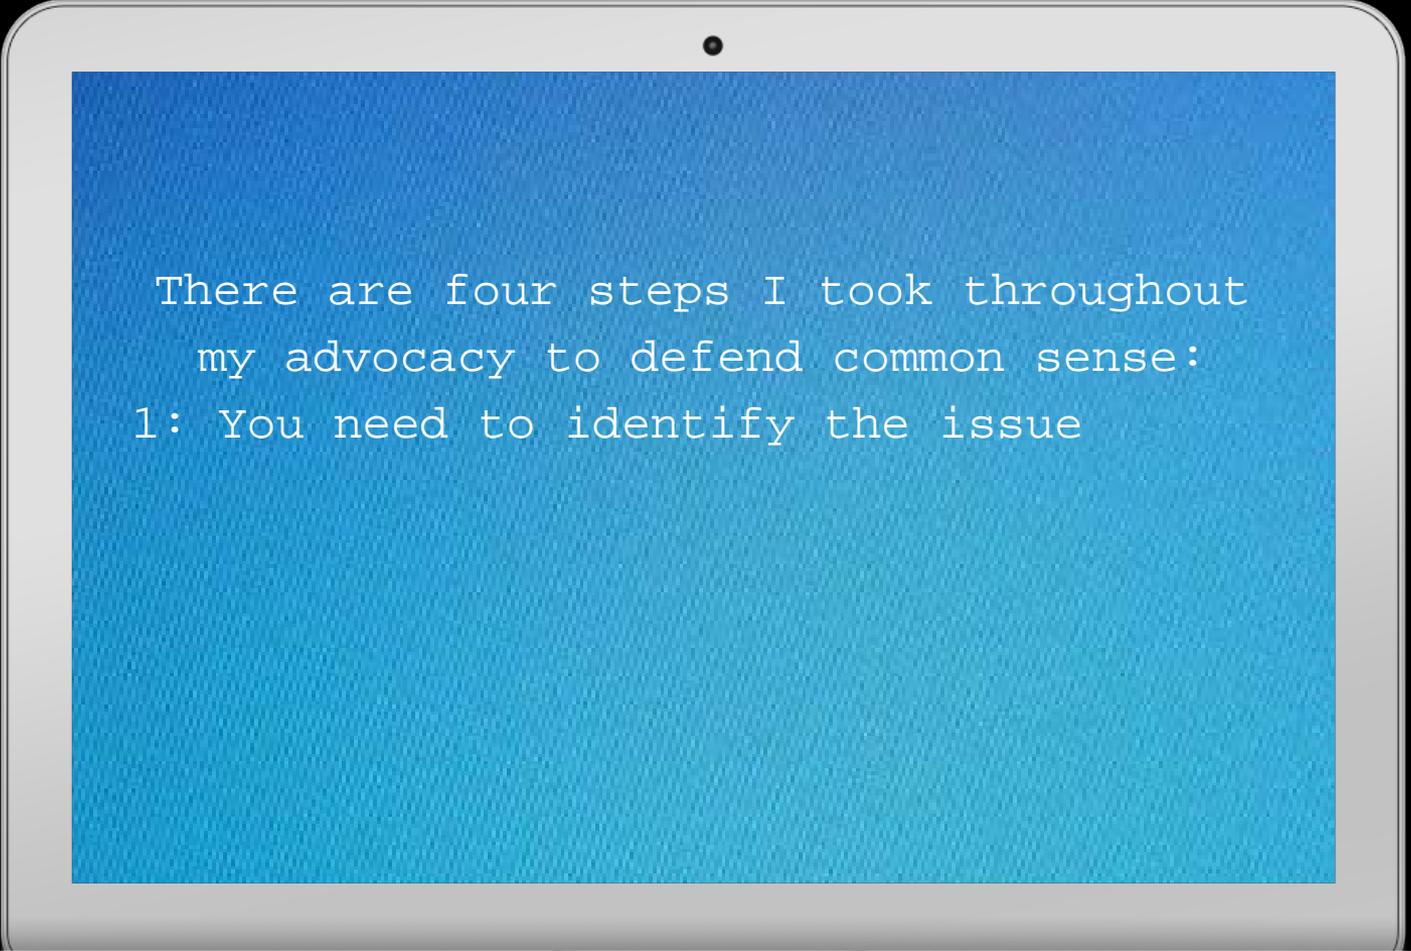

None of that matters if things change

A silver laptop is shown from a front-facing perspective, open. The screen is filled with a solid blue color. Centered on the screen is white text in a monospaced font. The text reads: "You need to stay authentic to the data, the research, and the reasons behind your cause. If you don't have a foundation and motivation you won't be able to make an impact." The laptop's bezel and hinge are visible, and the background behind the laptop is black.

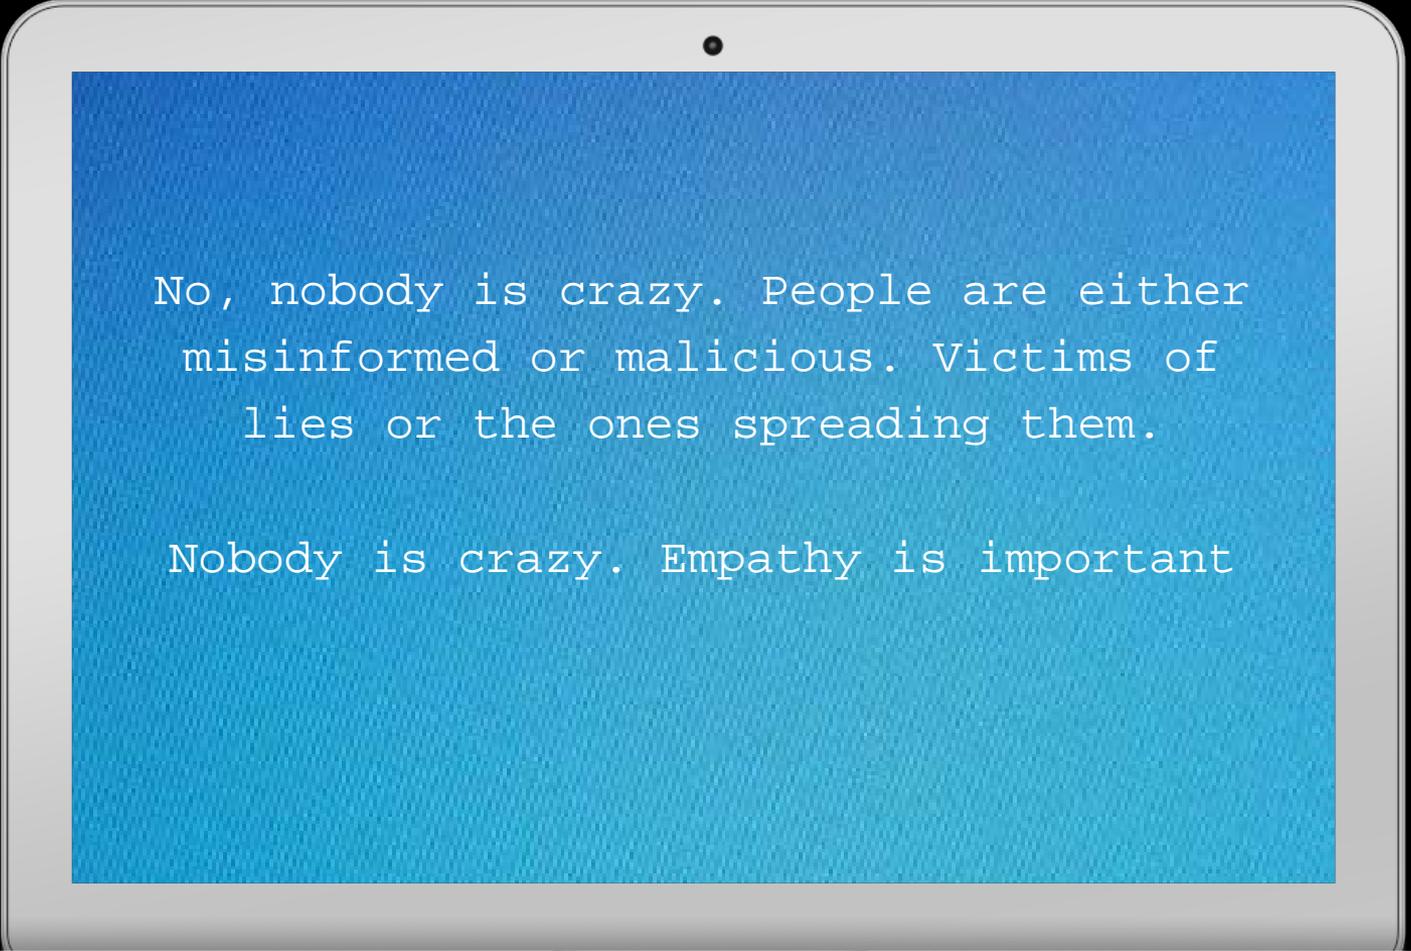

You need to stay authentic to the data,
the research, and the reasons behind
your cause. If you don't have a
foundation and motivation you won't be
able to make an impact.

There are four steps I took throughout
my advocacy to defend common sense:

- 1: You need to identify the issue
- 2: You need to bring awareness
- 3: You need to stay authentic
- 4: You need to have empathy

A silver laptop is shown from a front-facing perspective, open. The screen is a solid, vibrant blue color. In the center of the screen, the text "Are Antivaxxers crazy?" is displayed in a white, monospaced, typewriter-style font. The laptop's bezel is visible, and a small black dot, likely a camera lens, is positioned at the top center of the bezel. The background is solid black.

Are Antivaxxers crazy?

No, nobody is crazy. People are either
misinformed or malicious. Victims of
lies or the ones spreading them.

Nobody is crazy. Empathy is important

A silver laptop is shown from a front-facing perspective, open. The screen is a solid, vibrant blue color. In the center of the screen, the text "So what can I do?" is displayed in a white, monospaced, typewriter-style font. The laptop's bezel is visible, and a small black dot, likely a camera lens, is positioned at the top center of the bezel. The background is black.

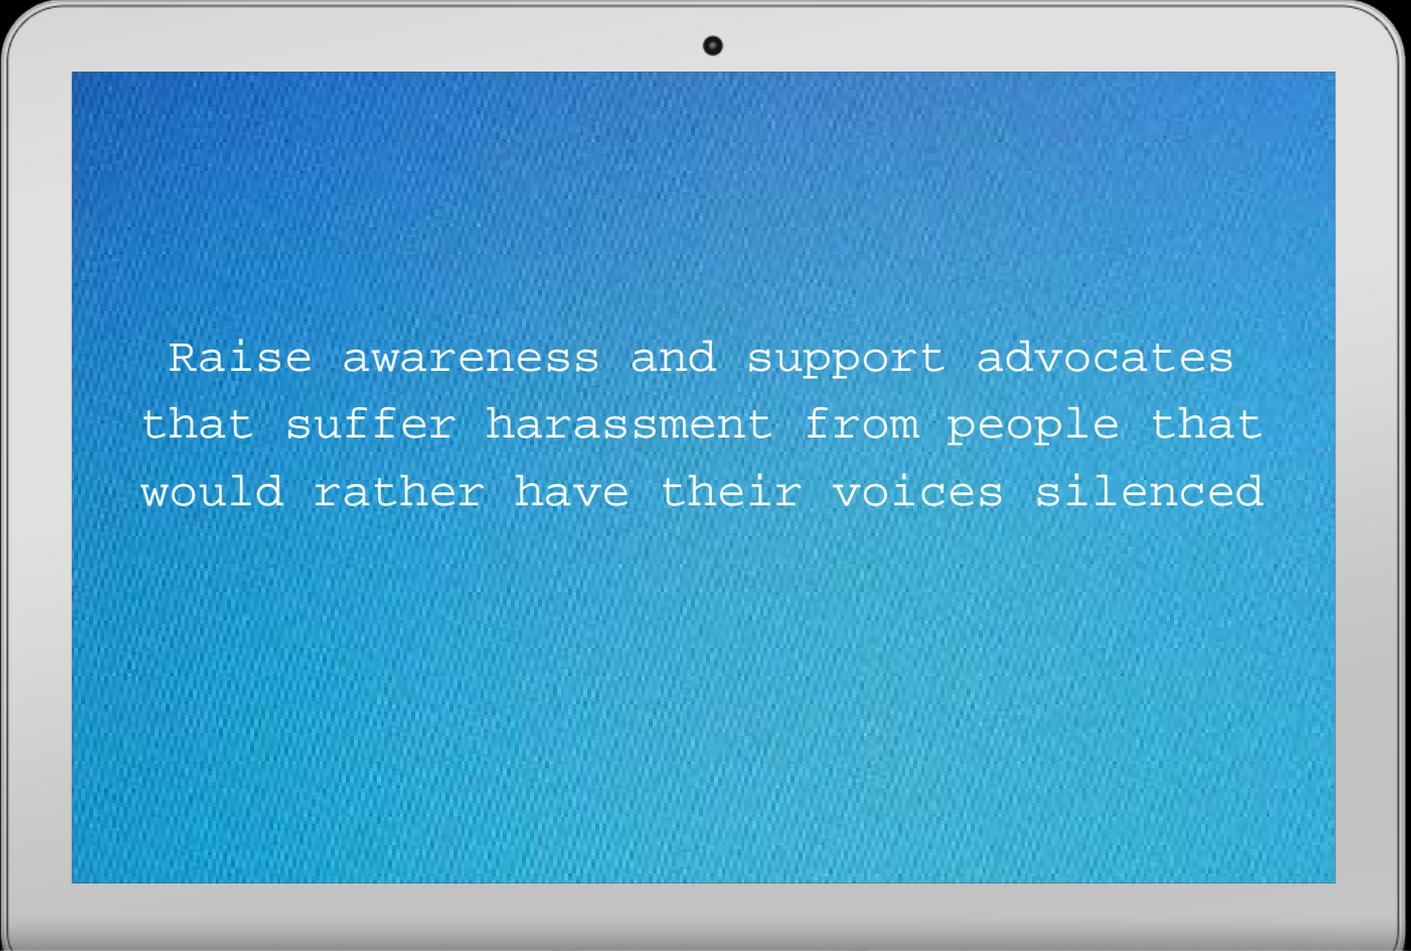

So what can I do?

A silver laptop is shown from a front-facing perspective, slightly angled. The screen is a solid, vibrant blue. Centered on the screen is the text "Stand up for the truth in your personal and professional life" in a white, monospaced, typewriter-style font. The text is arranged in two lines. The laptop's bezel is visible, and a small black dot, likely a camera lens, is positioned at the top center of the bezel. The background is solid black.

Stand up for the truth in your personal
and professional life

A silver laptop is shown from a front-facing perspective, slightly angled. The screen is a solid, vibrant blue color. Centered on the screen is white text in a monospaced font. The text is arranged in two lines: the first line reads "Address misinformation properly and" and the second line reads "with empathy". The laptop's bezel is visible, and a small black dot, likely a camera lens, is positioned at the top center of the bezel. The background behind the laptop is black.

Address misinformation properly and
with empathy

A silver laptop is shown from a front-facing perspective, open. The screen is filled with a solid blue color. Centered on the screen is white text in a monospaced font. The text reads: "Raise awareness and support advocates that suffer harassment from people that would rather have their voices silenced".

Raise awareness and support advocates
that suffer harassment from people that
would rather have their voices silenced

A silver laptop is shown from a front-facing perspective, slightly angled. The screen is a solid, vibrant blue. In the center of the screen, the words "Remain unbreakable" are written in a white, monospaced, typewriter-style font. The laptop's bezel is visible, and a small black dot, likely a camera lens, is positioned at the top center of the bezel. The background is a solid black, making the laptop stand out.

Remain unbreakable
