Vaccines Matter to Rutherford County

What is a VPD Outbreak?

A Vaccine-Preventable Disease, or VPD, outbreak (e.g., measles) may occur when community members are inadequately vaccinated against a disease. The TN Kindergarten Immunization Compliance Assessment is a great way to understand your county’s risk of an outbreak!

Rutherford County Kindergarten Immunization Compliance Assessment (2018-19)

<table>
<thead>
<tr>
<th>Student Status</th>
<th>% (#) of Schools</th>
</tr>
</thead>
<tbody>
<tr>
<td>At least 95% immunized</td>
<td>67% (24)</td>
</tr>
<tr>
<td>90% - 94.9% immunized</td>
<td>31% (11)</td>
</tr>
<tr>
<td>Below 90% immunized</td>
<td>3% (1)</td>
</tr>
</tbody>
</table>

Overall, 95.4% of 2018-2019 Rutherford County kindergarten students were fully immunized at enrollment. To remain at low risk for a VPD outbreak, this rate should remain above 95%.

Impact of One Case of Measles in TN April 2019

One case of measles → Visited 4 health care facilities and 1 hotel

Exposed 537 people

Resulting in:
- 32 people in isolation/quarantine
- 4 additional measles cases
- 584 total days missed work/school

Outbreaks like this can be avoided when the community is properly vaccinated.
Facts Matter:

1. The United States has the safest vaccine supply in its history. Vaccines do not cause autism.
