

Sentinel Provider Influenza-Like Illness (ILI)¹ Surveillance Summary (health.state.tn.us/TNflu_report_archive.htm)
For the Week of Nov. 25-Dec. 1, 2012 (Week 48)

Summary for	# Sites reporting	Total Sites	Total Regional ILI	Total Regional Patients	% ILI	Compared to State ²
Hamilton County (Chattanooga)	4	4	2	775	0.3%	lower
East Tennessee Region	7	8	257	3263	7.9%	higher
Jackson-Madison County	1	1	28	557	5.0%	higher
Knoxville-Knox County	4	4	34	1535	2.2%	lower
Mid-Cumberland Region	10	10	23	1269	1.8%	lower
Shelby County (Memphis)	7	10	36	1247	2.9%	
Nashville-Davidson County	5	6	19	1226	1.5%	lower
Northeast Region	2	3	2	217	0.9%	
South Central Region	3	3	0	276	0.0%	lower
Southeast Region	5	5	9	874	1.0%	lower
Sullivan County (Tri-Cities)	2	2	0	575	0.0%	lower
Upper Cumberland Region	4	4	2	726	0.3%	lower
West Tennessee Region	5	6	4	326	1.2%	lower
State of Tennessee	59	66	416	12866	3.23%	

Note to Sentinel Providers:
 Sentinel Providers are reminded to submit specimens on all patients meeting the ILI case definition (up to 10 per week).

 Please use the TDH specimen submission form dated October 2012.

The percentage of patients with ILI reported in Week 48 was 3.23%, compared with 4.55% in Week 47. Influenza viruses are circulating in the state, with intense activity in some regions. The CDC announced on December 3 that this is the earliest start to influenza season since 2003, and activity is highest in the Southeastern US. Nationally, type A H3N2 seasonal viruses predominate: 94% of strains identified through the State Public Health Laboratory in November also are seasonal H3N2 viruses. CDC reports a good match between circulating viruses and the vaccine. To date, 60 specimens from Week 48 have been tested; 20 (33.3%) were positive for influenza viruses: 21 were A(H3) and 1 was type B. Sixteen other specimens were positive for other respiratory viruses. A map of counties with confirmed influenza (PCR or culture) in the past six weeks is below. All Sentinel Providers should submit specimens regularly to identify locally circulating strains.

State Public Health Laboratory
 Respiratory Viral Panel
Number of Positive Specimens, by week

Month/Week	#	Flu A (H1N1)	Flu A(H3)	Flu B	RSV A	Paraflu 2	Paraflu 3	Paraflu 4	Rhino	Corona OC43	Adeno B	Adeno C

Percentage of Outpatient Visits Reported by the U.S. and Tennessee Outpatient Influenza-like Illness Surveillance Network (ILINet) as Influenza-like Illness, 2011-2012

Updated: 12/06/2012

Influenza Positive Tests Submitted to TN Dept. of Health Laboratory Services, Tennessee, 2011-2012

Updated: 12/06/2012

Influenza confirmed by culture or PCR in Tennessee from specimens collected by any source within the past 6 weeks.

October 21, 2012 to December 1, 2012

- Strains are reported by county of case residence or, if unknown, county where the specimen was collected.
- Counties where influenza sentinel providers are located are identified with bold boundary lines.
- Stars mark counties with large metropolitan populations (Memphis, Jackson, Nashville, Chattanooga, Knoxville, and the Tri-Cities area)

 2009 A (H1N1)	 A(H3)	 Seasonal B
---	---	--

Reference Information for Sentinel Provider Network

1 Influenza-like illness (ILI) is defined as fever > 100°F (37.8°C) plus cough and/or sore throat, in the absence of a known cause (other than influenza). Classification of ILI is based upon symptoms only and does not require any test.

2 The % of patients with ILI seen in each region is compared to the statewide average. Regions with % statistically-significantly different from the state average are noted as "higher" or "lower." The CDC reports that the percentage of patients visiting outpatient healthcare providers in the Sentinel Provider Network (SPN) with influenza-like-illness (ILI) when influenza viruses are not circulating is expected to fall at or below a specific SPN baseline [nationwide = 2.2%, East South Central region (AL, TN, MS, KY) = 2.3%]. When the percentage of patients with ILI exceeds this baseline, this suggests that influenza viruses may be circulating.

Important information for Sentinel Providers

Sentinel Providers report ILI by the end of Tuesday following the end of the reporting week (www2a.cdc.gov/ilinet) and collect and ship specimens from ILI cases Monday through Thursday (maximum 10/week per provider). All Sentinel Provider specimens MUST be accompanied by the Influenza and Respiratory Viral Panel Submission form or testing will not be done. The Respiratory Viral Panel is only validated for nasopharyngeal (NP) specimens. Specimens collected from other sites cannot be tested.

Additional laboratory supplies can be obtained by completing the lab order supply form. To ensure the order is filled, please include the CDC Provider ID Code.
