Staff: Rhonda Phillippi, Julianna Herod  
TN Department of Health: Ann Rutherford Reed, Kyonzte Hughes-Toombs

The CoPEC Standards Committee reviewed the draft of Standards for Pediatric Emergency Care Facility Rules. Proposed changes to the rules were made as noted below.

Administration to include physician/nurse pediatric care coordinator as written in current EIIC descriptions.

Discussion to look at gap analysis in regard to trauma center verification process (level 1 trauma center versus ACS; Trey Eubanks – Shah to further invite Eubanks to present details on gap analysis.

Proposal for Trauma Subcommittee within Standards – discussion took place agreeing that the whole group discussing this matter would not be as productive, rather it should be a few people. No volunteers: revisit this.

Information from THA/Chris Clarke: length of stay, types of surgeries, etc in critical access hospitals.

Suggestion from Chris Clarke to include guidelines for if/when basic hospitals admit pediatric patients.
