CORRESPONDENSE: the board took the following action regarding correspondence. All other correspondence was reviewed by the board but no action was taken.

From Associations-

TDHA- Questions from Lynn Russell regarding EFDA certification courses:

1. The board decided an EFDA/RDH employed at the college of dentistry cannot teach the didactic portion of the course without the present of the DDS.
2. The board stated this question was “not applicable” regarding the need to have board approval before submitting a change to the dental hygiene curriculum to CODA.
3. Regarding certification requirements, the board determined the regulation information would be sent in response.
4. The decision of whether a portion of the course could be delivered in an online course, the board determined it is a decision that can be made by the school not by the board.

From Accreditation and Testing Agencies-

CODA- Site visit Invitation, South College- No board members wanted to participate in the site visit.

From licensees and Others: Inquiry from Michelle Reeves

Ms. Reeves came before the board to request approval to open a skin care business inside of the dental office where she is the office manager. She would like to offer these services outside of business hours of the dental office. Per the rules, the board cannot grant approval or denial of the skin care business being opened in a dental office. Ms. Reeves was asked to review the rules and regulations to ensure she is following all proper regulations before opening a skin care business in the dental office.

REPORTS:

Executive Director’s Report : new applications received since the start of the year- 60 dentists, 67 hygienists, and 335 dental assistants. Graduation season is approaching, which means a large increase in applications being sent in. For certification applications since the beginning of the year, the board received: 18 for dentists, 114 for hygienists, and 461 for dental assistants. More than half of renewal applications are now being completed online.

The Jurisprudence Exam started in February 2018, with over 1,800 individuals having completed the exam to date. A “frequently asked questions” section is being worked on to be added to the board site to help those taking the exam.

Presentation by CE Broker- Marsha Mann came to explain and answer questions about the continuing education tracking options for health care providers. There are 3 account options available to license holders. The first account option is free to all users and will allow individuals to track their continuing education hours, if they have completed their hours, and if their CPR certification has been recorded. A second option is available for \$29.99 a year, and informs the user of which specific requirement they are missing from their reported totals (example, if the sedation requirement has not been completed), among other features to help the user stay on track. A third option available is \$99 a year, which has added functions such as finding the courses the individual can take, reports continuing education hours for them, and account managers check to ensure the courses taken meet state requirements.

A contract with CE Broker for these services is at no cost to the state or board. Dr. Jubran requested there be a way to have the ACE report uploaded to their CE Broker account, so it will not create more work for dentists by requiring them to upload continuing education information to two different sites. The board noted the option to track continuing education on CE Broker will be extremely useful for dental assistants and hygienists, since there has been no previous way for them to have online tracking of their certificates. License holders will be notified by mail and email of the new CE Broker account options. The expected launch of this new program is the end of May or beginning of June 2018. If an individual is unable to utilize CE Broker, they may still submit paper copies of their continuing education documents if audited in the future. Accounts will notify license holders if they have uploaded a duplicate certificate, so it will not be accidentally submitted twice. A mobile app will be available for account holders to utilize, which will allow them to report their continuing education certificates from their mobile device at any time. Search options will be available to find courses and home study options that are approved courses. CE Broker will allow the board to select a random sample of license holders based on a specific percentage of license holders to choose to participate in the audit for a specific cycle. The contract will be reviewed by Ms. Putnam to determine if the board can make the use of CE Broker mandatory or if a start date can be made mandatory for license holder.

REPORTS:

Office of Investigations Update: The Director of Investigations and Disciplinary Coordinator gave the report and update. The Director Welch discussed a request to cut out the phone call from an investigator after a complaint has been opened for non-compliance to a CE sedation audit or CE audit. The requested change in the process was due to the time taken to attempt to contact the individual, and the cost to the board for the investigator needing to contact the individual. This process would automatically have the case opened by investigations, and file would be directly sent to OGC for formal disciplinary action. The phone call made by investigations was to allow the non-compliant individual a chance to send in the required information to avoid formal disciplinary action, which has proven to be an effective practice. After a discussion amongst the board members, Dr. Jubran made a motion to maintain the current way investigations and OGC handles disciplinary action for CE audit non-compliance, Ms. Puckett seconded the motion. A vote was taken with 5 board members voting “yes” and 4 members voting “no.” The motion carried.

Office of Investigations Report: Ms. Leonard stated that there were 78 investigations opened this year with Investigations. There are currently 112 people being monitored, and 134 complaints have been closed. There are currently 78 pending complaints under review.

Presentation by Dr. Reagan, MD, PhD, Chief Medical Officer for the Tennessee Department of Health- Dr. Reagan gave a presentation concerning opioid abuse epidemic. According to studies, the total duration of opioid use is the strongest predictor of abuse. Those taking opioids for longer periods of time are more likely to abuse those opioids. There has been a 33% decrease in morphine being prescribed in the state of Tennessee from 2012-2017 due to education in the healthcare field concerning prescribing of opioids. The use of illicit drugs has contributed to more overdose deaths than those individuals who are taking opioids prescribed by a healthcare provider. The goals of healthcare in the opioid epidemic are treatment, control, and prevention.
