

**Tennessee Board of Nursing, Rules and Regulations of Licensed Practical Nurses
1000-02-.02 (3)(4) Licensed Practical Nurse Limited, Directed Scope of Practice**

(3) Licensed Practical Nurses shall not administer the following fluids/medication/agents or drug classifications in the context of intravenous therapy:

- (a) Chemotherapy;
- (b) Serums;
- (c) Oxytocics;
- (d) Tocolytics;
- (e) Thrombolytics;
- (f) Blood or blood products;
- (g) Titrated medications and dosages calculated and adjusted by the nurse based on patient assessment and/or interpretation of lab values and requiring the nurse's professional judgment;
- (h) Moderate sedation;
- (i) Anesthetics;
- (j) Paralytics; or
- (k) Investigative or experimental drugs.

(4) Intravenous (IV) Push Medications - The administration of intravenous push medications refers to medications administered from a syringe directly into an ongoing intravenous infusion or into a saline or heparin lock. Intravenous push does not include saline or heparin flushes.

- (a) Licensed Practical Nurses may deliver selected intravenous push medications when prescribed by a licensed health care professional who has legal authority to prescribe such medications, and when under the supervision of a licensed physician, dentist or registered nurse pursuant to T.C.A. § 63-7-108, provided:
 - 1. The Licensed Practical Nurse administers IV push medications in peripheral lines only; and
 - 2. The Licensed Practical Nurse administers IV push medications only to adults weighing over eighty (80) pounds; and
 - 3. The Licensed Practical Nurse has successfully completed a course of study developed from the Infusion Nurse Society Standards; or
 - 4. The Licensed Practical Nurse has successfully completed a formal (institutional/agency-based) intravenous therapy training and competency program prior to January 1, 2007.
- (b) Licensed Practical Nurses shall not administer IV push medications to pediatric or prenatal obstetrical patients.
