SECTION EIGHT

State and Local Partnerships to Address Dementia

In this section, you will find sharable materials addressing the basics of brain health including modifiable risk factors to reduce cognitive decline. Information on the new Healthy Brain Road Map is provided highlighting 25 actions for public health agencies to promote brain health, better care for people with cognitive impairment, and increase attention to caregivers. We also call attention to other public health agencies who have implemented actions, developed strategies and implemented sustainable approaches to promote cognitive health.

The local Alzheimer's Association chapters are available to co-host webinars, present at local health councils, medical and public health community and outreach events. You may find information regarding your local chapter by visiting their website: https://www.alz.org/local_resources/find_your_local_chapter.
