Epidemiologist 2
Tennessee Department of Health

Job Overview:
The Tennessee Department of Health seeks a highly motivated, qualified Epidemiologist 2 to act as Program Coordinator and Epidemiologist for the Tennessee Behavioral Risk Factor Surveillance System (BRFSS). Under general supervision, this individual will be responsible for daily program management activities, including communicating with the CDC and other partners. This position also performs statistical analysis, data management, quality assurance and reporting. Other job duties include creating fact sheets and data reports, providing secondary data analysis to confirm colleagues' SAS outputs, responding to internal/external data requests, and providing programmatic support to Division projects, as assigned. This position will report directly to the Director of the Office of Population Health Surveillance.

Key responsibilities:
- Analyzing Data or Information
- Making Decisions and Solving Problems
- Processing Information
- Monitoring and Controlling Resources
- Resolving Conflicts and Negotiating
- Establishing and Maintaining Interpersonal Relationships
- Communicating with Persons Outside Organization
- Thinking Creatively

Minimum qualifications:
Qualified candidates for this position should have a strong understanding of statistical concepts and moderate experience writing statistical programs using SAS software to generate analytics such as descriptive statistics, regression analytics, prevalence ratios and trend reports. Individuals should have excellent organizational skills, a keen attention to detail, strong oral and written communication skills, and be adept at multitasking. Candidates should also demonstrate knowledge of the general principles of population health surveillance. Candidates for this role will be expected to independently set and meet milestones and coordinate with other members of a multi-disciplinary project team to complete deliverables.
Epidemiologist 2
Tennessee Department of Health
