

On Par with DOR

The Latest Drug Overdose Reporting News and Announcements

TPA Update

The Trading Partner Agreement (TPA) is a non-legal agreement between TDH and the trading partner to exchange data using electronic methods. TDH has made updates to the TPA's format for mapping race and ethnicity. Now, executed TPAs will need to be updated and resent for signatures. Please watch your inbox for a TDH request for your review on the updated TPA and for signatures.

Reminders

All healthcare facilities reporting to Drug Overdose Reporting (DOR) via REDCap will need to migrate to Secure File Transport Protocol (SFTP) and the new DOR format. Contact TDH.Informatics@tn.gov so you will have sufficient time to complete the transition. The Office of Informatics and Analytics has already conducted an annual SFTP server folder cleanup. During this process, previous outdated files were removed. Archived validation files can be retrieved, also by contacting TDH.Informatics@tn.gov

New Reportable ICD-10 Codes

Effective January 2023, the DOR Diagnosis Code List was expanded to capture nonfatal overdose events more accurately across the state and improve surveillance for nonfatal polysubstance overdoses.

Facilities will be required to report drug overdoses containing 78 new ICD-10-CM codes under three new categories of substance (cannabis and synthetic cannabinoids, hallucinogens, and unspecified drugs and substances) by June 30, 2023.

We do understand these changes may take some time to implement on your end, so we are requiring the overdose codes under the three new categories of substance be implemented no later than June 30, 2023. **The June 30, 2023, submission, includes the submission periods: Submission period start date 06/25/2023 - Submission period end date 07/01/2023 which is due on July 4, 2023.**

Please ensure your facility begins including these new codes for appropriate drug overdose reporting by the submission deadline. For more information and to obtain the full list of [Reportable Diagnosis Codes](#) see the TDH Drug Overdose Reporting [website](#). The 78 added ICD-10-CM codes are indicated with an asterisk.

Reporting Tips

- When submitting files via SFTP, the naming convention **MUST BE in the following format:** DOR_Trading Partner_ID_DateTime (DateTime format YYYY-MM-DD-HHMMSS).
- If there are any missing weeks in your DOR summary report, please make sure to submit those weeks, as it means TDH does not have a record of receiving files from those weeks with no errors. A **RED** facility name with no totals in the row indicates that no records were submitted for the facility. Please remember any missing weeks will need to be submitted the following week along with the current week's submission. Each facility within an organization **MUST** report a "Zero Submission Record" when there are no patient records that meet the selection criteria for drug overdose during the submission period.
- If either of your DOR Summary Reports or Data Detail Validation Files says your DOR record contains a warning, please reach out to TDH.Informatics@tn.gov for assistance with correcting the warning.
