TN Department of Health

On Par with DOR

The Latest Drug Overdose Reporting News and Announcements

Diagnosis Code List

Effective January 2023, the DOR Diagnosis Code List was expanded to capture 78 new ICD-10-CM codes under three new categories of substance (cannabis and synthetic cannabinoids, hallucinogens, and unspecified drugs and substances). Facilities are required to report the overdose codes under these new categories of substance no later than June 30, 2023. The June 30, 2023, submission, includes the submission periods: Submission period start date 06/25/2023 - Submission period end date 07/01/2023 which is due on July 4, 2023. Please ensure your facility begins including these new codes for appropriate drug overdose reporting by the submission deadline.

Reminders

All healthcare facilities reporting to Drug Overdose Reporting (DOR) via REDCap will need to migrate to Secure File Transport Protocol (SFTP) and the new DOR format. Contact TDH.Informatics@tn.gov so you will have sufficient time to complete the transition.

Updating Facility Information

As a part of every record that is reported to DOR your facility's information is also submitted. We understand that as time goes on information for a facility may change. We at TDH, would like to remind you to keep us up to date whenever a large-scale change or small-scale change occurs at your facility or facilities.

This can include any of the following:
- Change in the facility's name
- Location change (i.e. – street name, building, etc.)
- An update to the facilities NPI
- A facility closing (permanently or temporarily) or being acquired

We ask that you double check all your current information submitted in your DOR weekly reports before submitting to ensure accuracy. Also, for any large-scale changes you can reach out to TDH.Informatics@tn.gov as soon as you are aware of the changes to ensure that we can update our system as soon as the change is made.

Reporting Tips

- When submitting files via SFTP, the naming convention **MUST BE in the following format:** DOR_Trading Partner_ID_DateTime (DateTime format YYYY-MM-DD- HHMMSS).

- If there are any missing weeks in your DOR summary report, please make sure to submit those weeks, as it means TDH does not have a record of receiving files from those weeks with no errors. A RED facility name with no totals in the row indicates that no records were submitted for the facility. Please remember any missing weeks will need to be submitted the following week along with the current week's submission. Each facility within an organization MUST report a "Zero Submission Record" when there are no patient records that meet the selection criteria for drug overdose during the submission period.

- If either of your DOR Summary Reports or Data Detail Validation Files says your DOR record contains a warning, please reach out to TDH.Informatics@tn.gov for assistance with correcting the warning.

- Every Wednesday you get sent a detail data report in your SFTP out folder. This file contains all records processed that week along with any error messages. Reviewing that file weekly will always be the fastest way to see if you have any errors.
