April 01, 2021

WATER LABORATORY ALLIANCE (WLA) WORKSHOP: Water Sector Emergency Response Planning

The State of Tennessee (Department of Health, Department of Environment and Conservation, and the Tennessee Emergency Management Agency) and the U.S. Environmental Protection Agency are hosting a virtual workshop designed for the Water Sector and Laboratories to enhance their preparedness to respond to an all-hazard water contamination incident that requires analytical support.

WORKSHOP OBJECTIVE: Participating organizations will develop a roadmap that will guide the revision (or creation) of their emergency response plans that includes analytical support considerations.

ROADMAP DEVELOPMENT WILL BE ACCOMPLISHED THROUGH:

- Gathering and reviewing plans and documents in advance of the workshop.
- Learning about EPA water-security resources through participation in an interactive tabletop exercise with a water contamination incident scenario.
- Networking and learning from fellow colleagues in the Water Sector through small group breakout sessions, individual brainstorming sessions and facilitated large-group discussions.

WHO SHOULD ATTEND? Representatives of drinking water and wastewater utilities, state and local drinking water laboratories, state and local governments, and emergency managers.
