

# Tennessee Breast and Cervical Screening Program

Fiscal Year 2022 (July 1, 2021 - June 30, 2022)

The Tennessee Breast and Cervical Screening Program (TBCSP) operates in all 95 counties by providing screening and diagnostic procedures for breast or cervical cancer and enrollment into TennCare for treatment for eligible individuals. The TBCSP aims to serve the most vulnerable populations, specifically those who are low-income and uninsured or underinsured.

## Program Eligibility Guidelines:

Nearly 400 vendors, including local health departments, radiologists, breast centers, and Federally Qualified Health Centers, provide services throughout Tennessee.

## 14,126 women served

Among more than **86,300** eligible women in Tennessee, almost **16%** received cancer screening through TBCSP

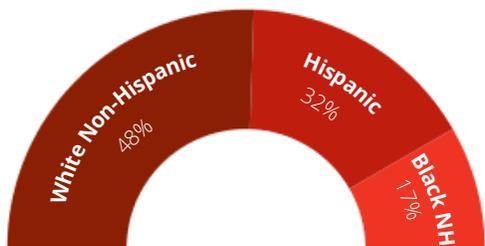

Over **12,600** breast services provided

**170** breast cancers diagnosed

Routine Breast Screenings by Race/Ethnicity

Number of Women Screened Compared to FY21

**28% Increase** in Hispanic Women

**2% Decrease** in Black Women

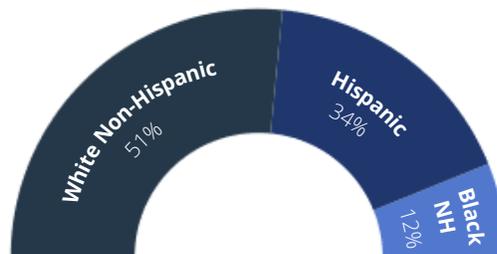

Over **5,000** cervical services provided

**189** cervical pre-cancers and cancers diagnosed

Routine Cervical Screenings by Race/Ethnicity

Number of Women Screened Compared to FY21

**15% Increase** in Hispanic Women

**4% Decrease** in Black Women

**48** men received breast services in FY2022.

Men are eligible for diagnostic breast services if they meet the other program eligibility requirements and can be enrolled in TennCare if breast cancer is diagnosed.
