Good morning Holly.

I agree with Dr. Wagner.

6 months is a reasonable time period to find and attend an ABLS Course.

The ABLS live courses can be difficult to come by while the online option (ABLS Now) can be completed at the learners pace and convenience.

Best,

Patrick Brockway MSN-ED, RN, CBRN

Holly

Adult and pediatric verifications are separate – they can be done at the same time but that is not always the case – I think they should be listed separately – for instance we are a verified adult burn unit – additionally we take care of pediatric patients – however – we are not a pediatric verified unit at the moment but will be when we go up for verification again in 3 years.

I agree with the ABLS requirements – it could be added that other burn providers such as therapy, pharmacy, program coordinators, etc are encouraged to become ABLS certified but are not required to be ABLS certified.

It also has occurred to me that we did not include the specific language in the document that describes the components necessary to become a pediatric verified burn center – that language is only found in the pre-review questionnaire?

Thank you, Anne

**Subject:** RE: Update Burn TAG - Proposed Rules

Good morning Holly.

- Burn Centers should be distinguished as Adult, Adult and Pediatric, or Pediatric.

- I have some additional feedback for the ABLS requirement:

1. The word "Staff" should be narrowed to Physicians, Advanced Practice Providers, and Registered Nurses. It is my opinion that other disciplines such as pharmacy and therapy do not need ABLS certification to work within a burn unit.

Best,

**Subject:** Update Burn TAG - Proposed Rules

Hi all,

To piggyback on the last email do we need to distinguish if all facilities need to be only Adult ABA verified, or Pediatric and Adult ABA verified? I noticed we don't distinguish that in the rules. Please send additional feedback along with any thoughts on a timeframe to become ABLS certified and any other comments.

Any comments will be added as public comments.

Thank you so much!

---

Good afternoon all,

I just spoke with Dena at the American Burn Association, and she sent me over the below information.

Some Burn centers tend to have Criteria Deficiencies (CD) in one or more of the below for Pediatrics.

I added in red if they are listed as Criteria 1 or Criteria 2 deficiencies.

One Level 1 criterion deficiency will result in non-verification, anything higher than five or more Level 2 CD's will also result in non-verification.

I hope this helps. Please feel free to reach out if you have any questions.

Thank you,  
Holly

Holly,  
It is always nice to chat with you. Please see information regarding pediatric burn centers below.

The ABA distinguishes the burn centers as Adult only, Adult and Pediatric and Pediatric only. An adult and pediatric burn center can be verified for both Adult and Pediatric or just Adult. The CDs listed below are ones I have documented and have been cited in both A & P and just P.

Section 2-

2.1-The burn center must have a sufficient volume of acute burn admissions on an ongoing

basis. (Criteria 1 deficiency)

2.3 -The burn center maintains and average daily census of 3 or more patients with acute burns.  
(Criteria 1 deficiency)

### Section 3

3.12-The burn center director demonstrates CME or evidence of education in pediatric burn care annually (i.e. Pediatric Advanced Life Support, pediatric topic review, local regional meetings, invited speakers, journal clubs etc.) (Criteria 2 deficiency)

3.14-The burn center director is involved in at least 25 pediatric cases annually. (Criteria 2 deficiency)

### Section 11-

11.3-Emergency physicians are board certified or eligible for certification by an appropriate emergency medicine board according to current requirements in pediatric emergency medicine.  
(Criteria 2 deficiency)

### Section 12-

12.4-There are protocols for burn specific care in collaboration with the PICU. (Criteria 2 deficiency)

12.5 PICU works in concert with the Burn Center Director to develop protocols for intensive care.  
(Criteria 2 deficiency)

### Section 13

13.4-For centers admitting patients under 2 years of age and requiring surgery, an anesthesiologist with certification in pediatric anesthesiology is available 24/7 (Criteria 2 deficiency)

13.5-A pediatric anesthesiology representative serves as a liaison to burn quality improvement program. (Criteria 2 deficiency)

I hope that helps and please let me know if you have any questions.

Dena

I was looking to see if there is an average daily census required to become ABA pediatric verified, but I am not seeing it. Do you happen to know if there is a daily census requirement to become verified at the pediatric level?

Thank you,  
Holly
