Greetings from the Andersen at the Tennessee Department of Human Services, Adult Day Services Team!

To continue receiving our emails, add us to your address book.

We strive to make each individual feel cared for, loved, and needed with a purpose in life. Our program gives people with a wide range of physical and cognitive disabilities more quality of life. The activities are designed to stimulate, motivate, and/or retrain participants to maximize their functional abilities. Our mission is to provide compassionate care, therapeutic activities, and professional support in a cozy, structured therapeutic environment.

Any issues outside of the ALPS domain are referred to the appropriate agency or resource, when available. During the Family Conference issues or concerns are identified, and plans implemented to address these areas of concerns. Family conferences are scheduled, as deemed necessary, by ALPS employees or participant's family.

ALPS Adult Day Services' mission is to provide compassionate care, therapeutic activities, and professional support in a cozy, structured therapeutic environment.

Please note that these changes will help clarify the requirements/process for conducting ADS criminal background checks and make the program more efficient.

Welcome to the April/May/June 2022 edition of the Adult Day Services (ADS) Quarterly Newsletter. We also plan to feature an existing agency in the Program Spotlight section each issue. If you are willing to allow us to feature your agency, please contact AdultDayServices.DHS@tn.gov using TrueRemove™.

We are adding a fingerprinting requirement to the Adult Day Services Rulemaking Hearings.

The newsletter will be a vehicle to share information on topics that support your day-to-day operations as a licensed ADS provider.
