

Child Care Services Daily Update – December 11, 2020

The Tennessee Department of Human Services (TDHS) will continue to provide you with the most current information pertaining to Child Care programs. We will continue to remain diligent in keeping this site current.

Guidance for Child Care Providers:

Update: This information is again being shared as a reminder of suggested CDC guidance in order to reduce the risk of exposure to COVID-19. The holidays are fast approaching, and it is a time when we want to celebrate with each other. We ask that this year, in order to keep families, children and child care agency staff safe, perhaps alternatives to holiday parties may be considered. There are opportunities through virtual meetings to share the holiday spirit and celebrate with families as their children are engaging in holiday activities within their class groupings. These are just a few suggestions as you are a creative group and can find ways to celebrate while minimizing social interactions in your agencies.

Reminder: Should you have a case of COVID-19, or potential exposure to COVID-19 in your agency, please reach out to your local health department to report the information so that you may receive guidance specific to the incident in order to implement actions appropriately.

Now, as always, child care providers play a critical role in their communities, particularly for parents who work in the health care industry or other essential roles. Each child care provider must make the decision whether to be open or closed, based on their unique situation and the needs in their community.

For child care providers who are currently open or are seeking to reopen, the Tennessee Departments of Human Services and Education are recommending that programs [follow CDC guidance for child care programs that remain open](#). The Departments are also providing additional guidance to child care facilities throughout the state on proactive measures, including screening recommendations for staff and visitors. These proactive measures are intended to help limit the spread of COVID-19 and safeguard children, families, and child care provider staff.

- **Limiting Persons in the Facility:** Providers should prohibit persons from the facility with the exceptions of:
 - Facility staff
 - Persons with a legal authority to enter, including law enforcement officers, child care licensing staff, and Child Protective Services staff
 - Professionals providing services to children
 - Children enrolled at the facility
 - Parents or legal guardians who have children enrolled and present at the facility

- **Pick-up and Drop-Off Protocols:** Pick-up and drop-off should occur outside the facility, unless it is determined that there is a legitimate need for the parent to enter a facility. Hand hygiene stations should be set up at the entrance of the facility, with supervised use. Consider staggering arrival and drop off times and/or have staff come outside the facility to pick up the children as they arrive.
- **Screening:** Persons who have a fever of 100.4^o (38.0^oC) or above or other signs of illness should not be admitted to the facility. Encourage parents to be on the alert for signs of illness in their children and to keep them home when they are sick. Screen staff and children upon arrival, if possible. Require staff to report any illness to their supervisor and require notification of COVID-19 positive case in employee's household. Examples of screening methods are available in the [CDC Guidance](#).
- **Limiting Class Sizes and Mixing:** All efforts should be made to limit congregation of children and class sizes to 10 or less.
 - **Groupings should include, to the extent possible, the same children each day to minimize exposure**
 - Limit the mixing of children, such as staggering playground times and keeping groups separate for special activities such as art, music, and exercising. Clean or disinfect equipment between groups, when possible.
- **Face Masks:** When feasible, staff members and older children should [wear face coverings](#) within the facility as recommended by the CDC. Cloth face coverings should NOT be put on babies and children under age two because of the danger of suffocation. Consider explanations to assist children with understanding why staff are wearing face coverings, as appropriate.
- **Do not allow sick children to be cared for in the facility:** If a child becomes sick while at the facility, contact the parent or guardian immediately and separate the child from other children at the facility. Make sure emergency contact information is current.
- **Have a plan if someone is or becomes sick.**
 - Plan to have an isolation room or area (such as a cot in a corner of the classroom) that can be used to isolate a sick child. Additional information about isolation in related settings can be found here: [isolation at home](#) and [isolation in healthcare settings](#).
 - Be ready to follow CDC guidance on how to [disinfect your building or facility](#) if someone is sick.
 - If a sick child has been isolated in your facility, clean and disinfect surfaces in your isolation room or area after the sick child has gone home.
 - Send staff home if they become sick with COVID-19-like symptoms. Evaluate leave policies to accommodate the provisions of these guidelines. Covered employers and employees should be aware of the provisions of the federal Families First Coronavirus Response Act, which allows for paid sick leave or expanded family and medical leave for specified reasons, such as for self-quarantining or seeking a medical diagnosis for COVID-19 symptoms.
 - If COVID-19 is confirmed in a child or staff member:
 - Close off areas used by the person who is sick.
 - Open outside doors and windows to increase air circulation in the areas.

- Wait up to 24 hours or as long as possible before you clean or disinfect to allow respiratory droplets to settle before cleaning and disinfecting.
- Clean and disinfect all areas used by the person who is sick, such as offices, bathrooms, and common areas.
- If more than 7 days have passed since the person who is sick visited or used the facility, additional cleaning and disinfection is not necessary.
- Continue routine cleaning and disinfection.
- Do not permit the child or staff member to return to the facility except as recommended by the child or staff member's medical provider.

For more details and recommendations, please refer to the [Centers for Disease Control and Prevention's Guidance for Child Care Programs that Remain Open](#), which covers topics such as:

- Social Distancing
- Child pick up and drop off procedures
- Cleaning and disinfecting toys and bedding
- Safely caring for infants and toddlers
- Food preparation and meal service
- Talking with children about COVID-19

Contact your local health department to discuss specific questions about circumstances at your agency. Local health department contact information may be found at <https://www.tn.gov/health/health-program-areas/localdepartments.html>.
