FY20-21

TENNESSEE ADDICTIONS RECOVERY PROGRAM (TN-ARP) SERVICES

Recovery Support Services Assessment

This consists of the TN-ARP screening tool and the TN-ARP Recovery Support Services Assessment Summary and Service Plan. This is available to those consumers assessing ONLY recovery support services.

Case Management

This service involves coordination of care services which assist a consumer in identifying, accessing, and coordinating resources that are supportive in achieving the consumer's treatment and recovery goals. Services may be delivered face to face or by telephone. Time spent in direct contact with the consumer, or with collateral on behalf of the consumer, is reimbursable. The staff performing this service must be trained and qualified according to the agency's governing body. This service may be offered by state-licensed treatment providers and non-licensed recovery support providers.

Drug Testing

Random drug testing is used to determine the presence of substances.

Employment Skills

This service can be utilized to teach the transferable skills needed by an individual to make them 'employable.' A component of SAMHSA's definition of recovery is purpose, which includes obtaining and holding a job. Recovery Skills are designed to assist the service recipient in obtaining the necessary skills to be a successful and productive member of the community and offer skill-building topics such as budgeting, personal growth, responsible decision making, interviewing skills, resume writing, career exploration and job retention skills.

Health/Wellness

These activities promote confidence and a positive outlook which helps to maintain abstinence and overall wellbeing. These can include tobacco cessation, healthy eating, exercise and fitness support as well as mindfulness activities such as painting, etc.

Recovery Activities

Recovery activities are activities that involve discovering new opportunities to have fun without using substances. They could include museums, picnics, parks, local events, etc.

Recovery Skills

This service is designed to assist the consumer in obtaining the necessary skills to be a successful and productive member of the community. It offers skill-building topics such as budgeting, parenting, personal growth, responsible decision making, etc. If performed in a group setting, the group size must be a minimum of two consumers and no more than 20 consumers. The staff facilitating this service must be trained and qualified according to the agency's governing body. This service may be offered by state-licensed treatment providers and non-licensed recovery support providers. Individual sessions are 50 minutes and group sessions are 60 minutes in duration.

Relapse Prevention

This service is designed to assist the consumer in developing skills to recognize early signs that may lead to relapse and to develop methods to counteract these triggers. If performed in a group setting, group size must be a minimum of two consumers and no more than 20 consumers. Staff must be trained and qualified according to the agency's governing body. This service may be offered by state-licensed treatment providers and non-licensed recovery support providers. Individual sessions are 50 minutes and group sessions are 60 minutes in duration.

Spiritual/ Pastoral Support

Spiritual/Pastoral Support is designed to assist the consumer in developing their spirituality as an integral part of their recovery and may cover practices and principles such as establishing a relationship with a higher power, identifying a sense of purpose and mission in one's life, achieving serenity and peace of mind, balancing one's body, mind, and spirit, utilizing spiritual practices such as prayer, meditation, and yoga, etc. This service is based on universal spiritual principles and practices and not based on specific religious convictions and beliefs. Pastoral Support includes a variety of recovery support services which incorporate faith and specific religious beliefs and convictions as well as in the recovery process. Examples of this service include a consumer meeting with a minister, priest, rabbi, iman, monk or other qualified person to study the application of a religion's beliefs, convictions, and scripture to recovery, for support during a crisis, or to determine a recovery plan, etc. If performed in a group setting, group size must be a minimum of two consumers and no more than 20 consumers. The staff facilitating this service must be trained and qualified according to the agency's governing body. This service may be offered by state-licensed treatment providers and non-licensed recovery support providers. Individual sessions are 50 minutes and group sessions are 60 minutes in duration.

Transitional Housing

This is housing that is required on a transitional basis to support the consumer during their treatment and/or recovery phase. The housing must be community based, safe, and drug free. This service must be governed or staffed to assure a safe and drug-free environment. The agency must meet all local housing codes and have adequate liability insurance. The staff providing this service must be trained and qualified according to the agency's governing body. This service is done in conjunction with other treatment/recovery services.

Transportation

This service provides transportation for consumers for the purpose of accessing treatment and/or recovery services or any other activity that supports a consumer's recovery. The vehicle used must be owned or leased by the TN-ARP. The agency must have proper vehicle insurance coverage. Agency staff may use their personal vehicles if the following conditions are met: a) must have a Class D License, F Endorsement and, b) staff must have copy of current full-coverage automobile insurance on file at agency. The vehicle driver(s) must have the appropriate chauffeur's or commercial driver's license. Transportation is reimbursable based on the following three criteria: 1) there is no other payment source for this service and, 2) the consumer has no other reliable transportation alternative, and 3) there is no public transportation or its use would create a hardship on the consumer.
