

State and County Planning Resources

State Level Data:

- **Tennessee 2020 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System:**

This document is the Uniform Reporting System (URS) Output Tables for the state of Tennessee. Information is collected and reported annually to support the Community Mental Health Services Block Grant program in efforts to use data in decision support and planning. This document includes data on National Outcome Measures (NOMS), evidence-based practices, and utilization measures providing an overview of state mental health delivery.

- **2020 Income, Poverty, Education, and Insurance Coverage in Tennessee:**

This webpage provides an overview comparison of income, poverty, education, and insurance coverage in Tennessee to national levels for years 2013 through 2018 using census data. Figure 1 compares median household income. Figure 2 compares percent of children and overall percent of population under poverty level. Figure 3 compares percent of adults age 25 and older with at least an associate's or bachelor's degree. Figure 4 compares percent of children and overall percent of population without health insurance coverage.

- **Housing Within Reach:**

Recovery Within Reach is a Tennessee resource for people seeking wellness and recovery from issues such as mental illness, substance use disorder, trauma, homelessness, and others. The website began in 2009 as part of a Real Choice Systems Change grant from the Centers for Medicare and Medicaid Services of the U.S. Department of Health and Human Services. Housing Within Reach, part of the Recovery Within Reach site, is a resource for people seeking housing. The webpage provide listings for various types of housing.

- **Crisis Detoxification:**

Treatment is available through Medically Monitored Withdrawal Management Services (MMWM). Detox services are delivered by medical and nursing professionals. They provide 24 hour medically supervised evaluation and withdrawal management in a facility with inpatient/residential beds. This webpage outlines eligibility, referral sources, contact information, and a link to a list of service providers.

- **Recovery Navigators:**

Tennessee Recovery Navigators are people in long-term recovery who meet patients who have recently overdosed in the Emergency Department and connect them with the substance abuse treatment and recovery services they need. Navigators maintain a Certified Peer Recovery Specialist (CPRS) Certification in order to use their lived experience to help others find recovery. The Navigators are employed by local treatment providers in the areas across the state with the greatest prevalence of overdoses. This webpage identifies the local treatment providers and hospitals currently receiving Navigator services, and addresses frequently asked questions.

County Level Data:

- **TennCare Enrollment by County in 2019:**

TennCare is the state's Medicaid program and the second largest source of insurance coverage in Tennessee. The program primarily covers low-income children and their caretakers, pregnant women, and individuals with disability. Figure 1 provides a breakdown of where Tennesseans get their health insurance coverage. The dashboard presented near the bottom of the webpage, utilizing TennCare Monthly Enrollment for September 2019 and University of Tennessee Center for Business and Economic Research (UT CBER) 2019 County Population Projections, provides a summary of TennCare enrollment by county. There are tabs for children, adults, and total Tennessee population. The map can be filtered by number or percent.
