

Cigna Dental Care Dental Health Maintenance Organization - Prepaid Provider

Overview

The Cigna Dental Care® Dental Health Maintenance Organization – Prepaid Provider plan helps Partners for Health members get quality dental care at a lower, predictable cost. Members choose a primary care dentist from the Cigna network who manages their care and referrals if needed. There is no coverage for out-of-network care except in emergencies.

Key Features

This plan offers no deductible and no yearly maximum, making it easier to plan for dental costs. Members pay a set copay for services based on a patient charge schedule.

The network includes many dentists across Tennessee, all listed in one easy-to-use directory on the [Cigna website](#).

Programs and Support

The Oral Health Integration Program helps members with certain health conditions get money back for some dental services. Cigna also offers Healthy Rewards® discounts, access to identity theft protection through IdentityForce® and a 24/7 Dental Information Line for questions and support.

Virtual Care

Members can access virtual dental care anytime through the [Cigna member website](#). This service helps with urgent issues like tooth pain or swelling and guides next steps for care.

How to Get Care

Members can find a dentist, get plan details and access resources online at [the state of Tennessee Cigna member website](#) or by calling customer service 24/7 at 1.800.997.1617.

Please review plan details carefully.

If there are any differences between the information contained here and the certificate/plan document, the information in the certificate/plan document takes precedence.
