Work to be accomplished by in-house consultant

UNIVERSITY OF TENNESSEE

1) Dr. Petersen presented a request for consideration of modification of the University of Tennessee **Biofuels** Initiative project. He stated that on October 11, 2007, the Commission approved the University's request to make a \$40,700,000 grant to its affiliate, University of Tennessee Research Foundation (UTRF), for the purpose of constructing a biofuels research and demonstration facility, an authorized capital project. As approved, the facility was to be owned and operated by a Tennessee limited liability company, the majority owner of which was to have been UTRF, and Mascoma Corporation as the minority owner. He said the University was requesting that the State Building Commission approve a modification of the request considered by the Commission at the October 11, 2007 meeting by authorizing to make a grant of \$40.7 million to its affiliate, University of Tennessee Research Foundation (UTRF). He said that UTRF will contribute the proceeds to Genera Energy, its wholly owned limited liability company created to allow strategic partnerships with private companies to facilitate the construction and operation of cellulosic ethanol and bioenergy research and development facilities and commercial industrial investments. Genera will enter into a collaboration agreement and lease with DuPont Danisco Cellulosic Ethanol, LLC for the purpose of Genera owning and DDCE constructing and operating a pilot plant and a smaller, separate cellulosic ethanol production development unit (PDU). Genera will also construct, operate and own a switchgrass pelletization and utilization demonstration facility. Dr. Petersen stated that they were bringing this item

to the Commission in advance of the UT Board of Trustees Executive Committee meeting scheduled for September 18 due to the need to complete the land transaction by September 30, posing some timing issues. He said they would understand if they wished to refer this item to the Executive Subcommittee, with authority to act, for consideration at their September 22 meeting. He said they will provide additional details about the collaboration upon the conclusion of the definitive agreements.

Treasurer Sims commented that they now have a better understanding of this request and it sounds like they are moving in a positive direction. He said they were acknowledging their partnering in this transaction, although he was not familiar with Mascoma, but was somewhat familiar with DuPont. He made a motion to approve the request as presented, subject to the Subcommittee being able to deal with any modifications to the request made, if required. The motion was properly seconded and passed without objection.

Estimated Project Cost: \$40,700,000.00
SBC Project No. 540/017-01-2007

- 2) Dr. Petersen presented a request for approval of a revision in scope for **Cherokee Farm Infrastructure Improvements**. Commissioner Goetz asked if this was the work that was going to be funded by the Foundation, and was told "yes". Dr. Petersen said the Foundation may come back later and help with funding building projects, but they have to get moving on the project or they may lose federal funding. Commissioner Goetz commented that he thought the master plan was about a look and feel of the campus. Dr. Petersen responded that they feel this is important. Secretary of State Darnell stated that the Foundation has backed out of the picture for now so the process has been set aside. He added that they were moving forward with the normal process and architects. He asked Dr. Petersen if the Foundation re-involves, will they be back to the SBC, and was told "yes". After discussion, the request was approved as presented.

Estimated Project Cost: \$32,000,000.00
