

Preparing for the ACT, Postsecondary, and Career

Primary Career Cluster:	General Career and Technical Education	
Course Contact:	CTE.Standards@tn.gov	
Course Code:	G25H00	
Prerequisite:	None	
Credit:	1/2 to 1	
Grade Level(S):	9-12	
Graduation Requirements:	This course is intended to support preparation for the ACT postsecondary readiness assessment and student exploration of postsecondary pathways. It does not fulfill any graduation requirements.	
POS Concentrator:	This course does not satisfy credit attainment for concentrator status since it is not part of an approved program of study.	
Programs of Study and Sequence:	N/A	
Coordinating Work- Based Learning:	Teachers are encouraged to use embedded WBL activities such as information interviewing, job shadowing, and career mentoring. For information, visit https://www.tn.gov/education/educators/career-and-technical-education/work-based-learning.html	
Promoted Tennessee Student Industry Credentials:	There are no dual credit/dual enrollment opportunities for this course.	
Teacher Endorsement(s):	001, 004, 006, 007, 009, 009, 010, 011, 012, 013, 014, 015, 016, 017, 018, 019, 020, 021, 022, 023, 024, 025, 026, 027, 027, 028, 029, 030, 031, 032, 033, 034, 035, 036, 037, 038, 039, 040, 041, 042, 043, 044, 045, 046, 047,048, 049, 050, 051, 052, 054, 055, 056, 057, 058, 059, 060, 061, 062, 063, 064, 065, 066, 067, 068, 069, 070, 071, 072, 073, 077, 078, 079, 080, 081, 082, 099, 100, 101, 102, 103, 105, 108, 134, 135, 136, 137, 138, 139, 140, 141, 142, 143, 145, 146, 125, 126, 127, 128, 129, 130, 131, 132, 133, 147, 150, 151, 152, 153, 154, 155, 156,157, 158, 201, 202, 203, 204, 210, 211, 212, 213, 214, 220, 221, 230, 231, 240, 241, 250, 301, 310, 311, 400, 401, 402, 404, 405, 406, 407, 408, 409, 410, 411, 412, 413, 414, 415, 416, 417, 418, 419, 420, 421, 422, 423, 434, 425, 426, 427, 428, 429, 430, 431, 432, 433, 434, 435, 436, 439, 445, 448, 449, 450, 451, 452, 453, 458, 460, 461, 462, 463, 464, 465, 466, 470, 471, 472, 473, 474, 475, 476, 477, 478, 479, 484, 485, 486, 490, 491, 492, 493, 494, 495, 496, 498, 501, 502, 503, 504, 505, 506, 507, 508, 509, 510, 511, 512, 513, 514, 515, 516, 517, 518, 519, 520,521, 522, 523, 524, 525, 526, 527, 528, 529, 530, 531, 532, 533, 534, 535, 536, 537, 538, 539, 540, 541, 542, 543, 544, 545, 546, 547, 548, 549, 550, 551, 552, 553, 554, 555, 556, 557, 558, 559, 560, 561, 562, 563, 564, 565, 566, 567, 568, 569, 570, 571, 572, 573, 574, 575, 576, 577, 578, 579, 580, 581, 582, 583, 584, 585, 586, 587, 588, 589, 590, 591, 591, 592, 593, 594, 595, 596, 597, 598, 700, 701, 702, 703, 705, 706, 707, 710, 711, 720, 721, 722, 730, 740, 742, 750, 751, 760, 770, 771, 772, 773, 774, 775, 776, 780, 781	
Required Teacher Certifications:	None	
Required Teacher Training:	None

Course Description

Preparing for the ACT, Postsecondary, and Career is designed to assist students in (a) understanding what the ACT is, why it is important for their postsecondary readiness, and how to interpret their progress/results; (b) understanding how academic skills connect to career pathways and postsecondary opportunities; (c) preparing for the ACT exam through instruction, practice, and familiarity with the structure and format of the ACT exam; and (d) identifying and using strategies for dealing with test anxiety, benefits of retaking the exam). The course is appropriate for all students in grades 9-12 but may be offered at the middle school level for high school credit.

The course is designed to be delivered in modules with each focusing on a different component of the ACT. It is recommended to always begin the course with Module 1 ("What is the ACT and why does it matter"). Also, it is recommended that Module 2 (Reading) precede Module 4 (Science) due to the overlap in reading skills that are important to both sections. However, the modules may be delivered in any order and should be customized based on the needs of the students with regard to subject area. For instance, the sequence of modules and score-level standards being taught might differ if this class is being offered to students in grade 10 preparing to take the ACT for the first time versus students in grade 12 who are preparing to retake the ACT to improve their scores.

This course is designed as a 0.5 to 1 credit course.

By state law, all Tennessee students are expected to take a college entrance exam by high school graduation. To fulfill this requirement, students may take the ACT or SAT. The department chose to create an ACT-focused course based on its prevalence as the college entrance exam administered throughout the state.

Course Standards

1. Module 1: What is the ACT and why does it matter?

- 1.1 <u>Career Assessment</u>: **Complete a career interest inventory or assessment**. Apply results of career interest inventory or assessment to explore occupations and the activities or job duties related to specific careers. Identify an occupation of interest and plan the educational and career pathway to attain qualifications for the identified career.
- 1.2 <u>Postsecondary Opportunities</u>: Individually, or in groups, **research postsecondary opportunities**, **citing multiple sources**, **and create a presentation** based on criteria such as (but not limited to) career interest, type of institution, location, learning environment, academic and career programs, sports and activities, support services, diversity, cost and financial aid, and admission/acceptance requirements, including ACT score, and state/institution scholarship opportunities, including required ACT score.

Postsecondary opportunities include community college, four-year college/university, technical school, industry certification, military training, apprenticeship, and professional training. Suggested information for the presentations includes (but is not limited to) information on acceptance criteria (emphasizing ACT requirements or averages, where applicable), financial impact of higher ACT scores, academic and career concentrations, length of time to complete training or degree, and average salary based on concentration or credential.

- 1.3 Personalized Career Plan: Generate a personalized postsecondary/career plan which includes action steps toward a career pathway including (but not limited to) performance goal on the ACT, future high school coursework (may include early postsecondary opportunities, work-based learning, summer academic programs, etc.), intended major or concentration, multiple postsecondary institutions to apply to, and experiential learning opportunities such as internships, job shadows, volunteer work, or summer training/employment.
- 1.4 <u>ACT Components</u>: Summarize the components of the ACT sections by creating a **table outlining the four components of the ACT** (English, Reading, Math, and Science), the number of questions per section, the amount of time allocated, and the types of questions found in each section, and content skills needed to obtain target subject test scores (as determined in Standard 1.3).

Question Types

- Reading: Main Idea, Supporting Detail, and Inference/Evaluation
- Science: Data Representation, Research Summary, Conflicting Viewpoints
- English: Usage/Mechanics, Rhetorical Skills
- Math: Pre-Algebra/Elementary Algebra, Intermediate Algebra/Coordinate Geometry, Plane Geometry/Trigonometry
- 1.5 <u>ACT Score Impact</u>: **Demonstrate understanding of the meaning and impact of ACT results** by analyzing a sample ACT score report, defining key terms, and explaining how ACT relates to postsecondary and career readiness. Understand how to positively impact subscores and composite score.

Key Terms	Postsecondary and Career Readiness Awareness
ACT Composite Score	Score thresholds for remediation in college
 ACT Sub-score (subject test) 	coursework
College Readiness	Job skill requirements
Benchmarks	Opportunities for early postsecondary coursework
College Score Reports	such as Advanced Placement (AP), Cambridge
National Career Readiness	International Exams, International Baccalaureate
Certificate	(IB), local dual credit, statewide dual credit, dual
Percentile Rank (national and	enrollment, and courses aligned to industry
state)	certifications or CLEP exams.
World-of-Work Map	Financial aid and scholarship criteria at
	postsecondary institutions

- 1.6 <u>Practice ACT Test</u>: **Complete an entire official practice ACT test, in simulated test conditions,** at the beginning (pre-test) and end of the course (post-test).¹
- 1.7 <u>Personalized ACT Plan</u>: Generate a **personal ACT plan with progress benchmarks and ACT goal by identifying areas of strength and weakness** based on the sections and question types. Track progress towards goal and the growth plan throughout the course, utilizing ACT data tracking tool (provided by ACT).
- 1.8 <u>Test Taking Experience Reflection</u>: After taking the ACT practice test, **analyze performance and reflect on test taking experience to develop a personal test experience plan** that includes potential solution(s) to be practiced during simulated ACT assessments. Test experience plan should include (but is not limited to) strategies that address:
 - a. fatigue,
 - b. anxiety,
 - c. nervousness, and
 - d. pacing/time-management.
- 1.9 <u>ACT Test Taking Tips</u>: After taking ACT practice test, and then interwoven throughout the other modules, **discuss and practice ACT test taking tips** including (but not limited to):
 - a. pacing required for each section;
 - b. reading questions carefully;
 - c. reading all answer choices carefully;
 - d. eliminating wrong answers;
 - e. underlining important details or scanning for information;
 - f. answering every question;
 - g. checking answers;
 - h. marking your test document precisely and erasing completely;
 - i. guessing the same letter choice throughout the test;
 - j. understanding there is only one correct answer; and
 - k. skipping questions that are more challenging and returning to answer or guess as a time-management strategy.

2. Module 2: Reading

2.1 Reading Skills for Career Readiness: Identify why skills tested on the ACT Reading test are important to career and postsecondary plans by identifying examples of complex text in documents, manuals, textbooks, etc. relevant to expectations in career and postsecondary settings. Compare Lexile levels of relevant text to Lexile levels expected to be found on the ACT.

¹ You may prioritize specific sub-tests based on the needs of students and modules being covered. All practice tests, however, should be administered under simulated test conditions.

2.2 <u>Practice ACT Reading Questions</u>: **Apply knowledge of the structure and format of the ACT Reading subtest and use strategies to maximize the number of correct responses** through regular practice with ACT Reading sample questions.

Structure and Format	ACT Reading Strategies
 The ACT Reading test is a 40 question, 35-minute multiple choice test. There is approximately 9 minutes allotted per passage. The reading test is composed of four passages from the categories of Prose Fiction/Literary Narrative, Humanities, Social Studies, and Natural Science. There are two basic categories of questions on the reading test: Referring questions: require finding or using information that is clearly stated in the passage, and Reasoning questions: ask you to apply information that is stated or implied to answer a question. 	 Develop comfort and familiarity with the pace required for the ACT Reading test. Refer to the passages when answering questions. Read passages and answer questions according to personal preference, not necessarily in the order of the test design. Look for answers that are supported directly and specifically in the text. Recheck your answers whenever possible. Look out for answer choices that are the exact opposite or contradictory to the correct answer.

- 2.3 <u>ACT Reading Skill Mastery</u>: **Demonstrate mastery of skills needed for ACT growth** by prioritizing skill-gaps based on pre-test data and ACT Reading standards (https://www.act.org/content/act/en/college-and-career-readiness/standards/reading-standards.html) by applying skills to a range of complex texts aligned with individual interests including (but not limited to) sample ACT passages, fiction, and non-fiction.
- 2.4 <u>Modify Personal ACT Plan</u>: **Apply knowledge and practice with the ACT Reading test to modify personal ACT plan to support goals for ACT growth and outcomes** based on personal postsecondary plan.

3. Module 3: Math

3.1 Math Skills for Career Readiness: Identify why skills tested on the ACT Math test are important to career and postsecondary plans by creating or analyzing a resume for a career in which strong mathematical skills and knowledge are essential to workforce readiness and success. Examples should include (but are not limited to) careers that require different levels of educational attainment (e.g. industry certification, associate's degree, bachelor's degree, master's/doctorate) including relevant local industry examples.

3.2 <u>Practice Math ACT Questions</u>: **Apply knowledge of the structure and format of the ACT Math test and use strategies to maximize the number of correct responses** through regular practice with ACT Math sample questions.

Structure and Format	ACT Math Strategies
 The ACT Math test is a 60 question, 60-minute multiple choice test. The content of the test is typically broken down into the following math subject areas: 20-25% Pre-Algebra 15-20% Elementary Algebra 15-20% Intermediate Algebra 15-20% Coordinate Geometry 20-25% Plane Geometry 15-10% Trigonometry Calculators are allowed for the entire subtest but are not necessary. In order to maximize utilization of time, it is recommended that students try not to rely on calculator. 	 Memorize and be fluent using certain common formulas and concepts.² Practice with the same calculator to be used on the actual test. Note that cell phones may not be used as calculators during testing. Find the correct answer under the given choices; plug answer choices into the question when possible. Eliminate obvious wrong answers.

- 3.3 <u>ACT Math Skill Mastery</u>: **Demonstrate mastery of skills needed for ACT Math growth** by prioritizing skill-gaps based on pre-test data and ACT math standards (https://www.act.org/content/act/en/college-and-career-readiness/standards/mathematics-standards.html)by applying skills to a range of mathematical concepts.
- 3.4 Modify Personal ACT Plan: Apply knowledge and practice with the ACT Math test and standards to modify personal ACT plan to support goals for ACT growth and outcomes based on personal postsecondary plan.

4. Module 4: Science

4.1 Science Skills for Career Readiness: Understand how skills tested on the ACT Science test (e.g., comparing and contrasting conflicting viewpoints, recognizing experimental design, interpreting data, etc.) are important to career and postsecondary plans by identifying job duties that might require reasoning, judgment, or analysis. With peers, discuss and compare different occupations and the role of scientific-reasoning skills and make observations about the characteristics of each.

² Please refer to supplemental resources for examples of common formulas and concepts.

4.2 <u>Practice ACT Science Questions</u>: **Apply knowledge of the structure and format of the ACT Science test and use strategies to maximize the number of correct responses** through regular practice with ACT Science sample questions.

Structure and Format	ACT Science Strategies
 The ACT Science test is a 40 question, 35 minute multiple choice test. The content of the test is typically broken down into the following science subject areas: Biology Chemistry Physics Earth/space sciences (geology, astronomy, meteorology) The test has seven passages and each one is conveyed in one of three different formats: Data representation: 30-40 percent Research summaries: 45-55 percent of the questions Conflicting viewpoints: 15-20 percent The test content parallels information commonly taught in science courses for grades 7-12 but emphasizes scientific reasoning skills rather than recall of science content. Extensive knowledge of these subjects is not required. Questions may require mathematical reasoning but do not rely on mathematical skills. Calculators are not allowed on this subtest. 	Spend approximately 5 minutes per passage for both reading and answering

- 4.3 <u>ACT Science Skill Mastery</u>: **Demonstrate mastery of skills needed for ACT Science test growth** by prioritizing skill-gaps based on pre-test data and ACT Science standards (https://www.act.org/content/act/en/college-and-career-readiness/standards/science-standards.html) by applying skills to a range of scientific concepts and practicing skills needed for each type of passage.
- 4.4 Modify Personal ACT Plan: Apply knowledge and practice with the ACT Science test and standards to modify personal ACT plan to support goals for ACT growth and outcomes based on personal postsecondary plan.

5. Module 5: English

- 5.1 English Skills for Career Readiness: Identify why skills tested on the ACT English test are important to career and postsecondary plans by analyzing grammar, tone, diction, and use of rhetoric in exemplar biographies, brand websites, or similar media and create a personal biography, blog, web projected career, education, and/or personal aspirations.
- 5.2 <u>Practice ACT English Questions</u>: Apply knowledge of the structure and format of the ACT English test and use strategies to maximize the number of correct responses within the subtest through regular practice with ACT English sample questions.

Structure and Format ACT English Strategies • Consider the style of the writing used in The ACT English test is a 75 question, 45 minute multiple choice test. each essay when answering the • The test has five essays and content of questions. The five essays are written in the test is typically broken down into the a variety of styles and some questions following English subject areas: will ask one to select the best answer o 45-60 percent usage/mechanics based on the style and tone of the essay ■ 10-15 percent punctuation as a whole. ■ 15-20 percent grammar and usage ■ Reread the sentence substituting the 20-25 percent sentence structure answer selected in the passage context o 40-55 percent rhetorical skills as a way of checking work. ■ 15-20 percent strategy • Read the sentence before and/or after ■ 10-15 percent organization the underlined portion to determine the ■ 15-20 percent style meaning and the best answer choice. • The ACT English test assesses • Develop comfort and familiarity with the understanding of standard conventions pace required for the reading subtest. of English; note that casual conversation, • Refer to the passages when answering emails, or other informal written questions. communication often uses slang or regional terms that are not correct in standard written English.

- 5.3 <u>ACT English Skill Mastery</u>: **Demonstrate mastery of skills needed for ACT English growth** by prioritizing skill-gaps based on pre-test data and ACT English standards (https://www.act.org/content/act/en/college-and-career-readiness/standards/english-standards.html) by applying skills to a range of complex texts.
- 5.4 Modify Personal ACT Plan: Apply knowledge and practice with the ACT English test and standards to modify personal ACT plan to support goals for ACT growth and outcomes based on personal postsecondary plan.
