Career and Technical Education (CTE) Courses Standards

The Background:

T.C.A. § 49-1-302(a)(8) authorizes the State Board of Education to "approve all academic standards and adopt rules and policies governing courses of study in the public schools." Additionally, State Board Rule 0520-01-03-.03(1) calls for the State Board to adopt standards for each subject area, grades K-12 and Standards Review Policy 3.209 requires the Department of Education (Department) to review the Career and Technical Education (CTE) course standards at a minimum of every three (3) years. The approved standards are to be the basis for planning instructional programs in each local school system.

This item includes new and revised course standards for the following CTE career clusters:

- Advanced Manufacturing
- Agriculture, Food, and Natural Resources
- Architecture & Construction
- Arts, A/V, Technology, and Communications
- Business Management and Administration
- Education & Training
- Finance
- Government and Public Administration
- Health Science
- Hospitality & Tourism
- Human Services
- Information Technology
- Law, Public Safety, Corrections, & Security
- Marketing, Distribution and Logistics
- STEM
- Transportation
- Elective Course: Preparing for the ACT, Postsecondary, and Career
- Middle School Career Awareness, Career Exploration, and Career Advising and Planning

This item includes new courses within the following CTE career clusters:

- Agriculture, Food, and Natural Resources:
 - o Agriculture, Food, and Natural Resource Practicum
- Human Services
 - Barbering IV
- Information Technology
 - Data Science I
 - Data Science II
 - o Data Science III

The Department previously reviewed CTE courses on a three (3) year cycle; however, beginning in 2023-24 and moving forward, the Department intends to review each course annually to ensure the courses are up-to-date and align with postsecondary and workforce. Reviewing courses may not necessitate changes each year. Districts will receive prior notice of any course changes during CTE director meetings, so that they may plan for any course changes and the corresponding implications, such as staffing, curriculum, etc.

The high school CTE courses have been updated based on educator feedback to align more closely with industry and postsecondary needs. Industry partners and secondary and postsecondary educators have reviewed these new and revised standards. All career clusters listed above have proposed standards to include the importance of utilizing the engineering design process while working with a team to complete a project; the importance and integration of career and technical student organizations (CTSOs); the emphasis on the growing need for data analysis; and ethical, responsible use of artificial intelligence (AI).

Below is a summary of the revisions to each career cluster:

- The <u>Agriculture</u>, <u>Food</u>, <u>and Natural Resources</u> career cluster includes proposed standards incorporating the Agriscience fair; a proposed revision to standards to include native species relevant to specific biomes for identification; and a non-native species identification relevant in specific biomes. Additionally, the Agriculture, Food, and Natural Resources practicum course is being added to all programs of study.
- The <u>Architecture & Construction</u> career cluster includes proposed standards to understand the basics of Programmable Logic Controllers (PLCs) in an electrical system and a proposed standard to include forms for foundations and concrete work.
- The Arts, A/V Technology, and Communications career cluster includes an addition to an existing standard to include design portfolio artifact(s) and the inclusion of standards on social media marketing and social media analysis. It also includes a name change for three of the courses.
- The <u>Business Management and Administration</u> career cluster includes a proposed edit to an
 existing standard to compile the elements of the marketing research with other artifacts for
 inclusion in a program portfolio or design notebook to be updated throughout the program
 of study. There is also a proposal to merge the three programs within Business Management
 and Administration into one program of study.
- The <u>Education and Training</u> career cluster includes the addition of communication development and speech-language development to an existing standard, including physical, emotional, social, and intellectual development; an edit to include brain development, language development, reasoning capacity, and learning, including the definition of brain plasticity and how learning approach differs and how it changes over the lifespan; an addition to a standard to include communication-rich environment; how assistive technology allows access to improved learning and education for children with disabilities; and the rearrangement of standards within courses to provide better sequencing of content in Teaching as a Profession. The Department is proposing the Teaching as a Profession program of study to include PreK-12 instead of K-12 as it has been aligned historically.

- The <u>Finance</u> career cluster includes proposed changes in the elective course, Personal Finance, to include standards on housing which includes buying and renting; emerging technologies which includes cryptocurrency; financial institutions; editing existing standards to be more inclusive of all postsecondary options; updated language on check writing; and balancing a checkbook. There is a proposal to merge the two programs, Accounting and Finance, into one single program of study.
- The <u>Health Science</u> career cluster includes edits to utilize Certified Nursing Aide, Nursing Home, and Health Facilities Commission to be consistent with the Health Facilities Commission. Additionally, due to a continual decline in student enrollment, standards from Public Health and Epidemiology and Medical Terminology courses are embedded into other health science courses, retiring both courses as stand-alone options.
- The <u>Hospitality and Tourism</u> career cluster includes the recommendation to incorporate ProStart into the program of study; edits to an existing standard to include macro and micronutrients required in the human diet; an edited standard including FCCLA Nutrition and Wellness Star Event CTSO event; and an edited standard on the marketing mix.
- The <u>Human Services</u> career cluster includes proposed changes to add a standard in Lifespan Development that reflects childcare standards for positive growth and development of children; an updated standard in Nutrition Science and Diet Therapy that reflects the impact of swallowing related to the disease process; standards to better meet salon safety in cosmetology that align with state board testing requirements; and barbering techniques and business standards and standards better aligned to support state board testing. Additionally, Barbering IV is being proposed as a new course.
- The <u>Information Technology</u> career cluster includes edits to standards that address Alenhanced client interactions, Al-enhanced imagery in Web Design, and Al and XR in branding and marketing. Additionally, Data Science I, II, and III are being added as part of the new Data Science program of study.
- The <u>Law, Public Safety, Corrections</u>, and <u>Security</u> career cluster includes employability and career development; additional court cases; levels of force and decision-making; domestic violence; effects of trauma and coping treatment options; trauma-informed response and questioning; drug laws; Odontology; legal processes and legal writing; juvenile law; immigration law; jury selection; and trial procedures.
- The <u>Marketing, Distribution and Logistics</u> career cluster includes proposed changes to edit the standard on marketing and small business ownership; and tracking techniques to capture online sales and data, sales, site traffic, and purchase amounts tracked in person and online; consumer behavior, consumer/buyer decision process, business/organizational markets, marketing-channel decisions and the advantages of distribution channels, online marketing, electronic commerce, website advertisements, cookies and choices, and other modern marketing terms.
- The <u>Transportation</u> career cluster includes additional standards related to diagnostic challenges, damage assessment, and aircraft weight and balance.

Pursuant to T.C.A. § 49-1-309, the State Board submitted the proposed changes to the education committees of the House and Senate prior to final reading. These CTE courses and standards changes will go into effect for the 2025-26 school year.

Between first and final reading, the Department solicited additional feedback on the proposed standards. The public comment period for the standards was from August 23, 2024, through September 23, 2024. Between first and final reading, revisions were made to the following courses:

- Culinary Arts I: Standard section 10 is edited from Garde Manager to Garde Manger to correct a spelling error.
- In the Teaching as a Profession program of study, the Department is proposing the Teaching as a Profession program of study to include PreK-12 instead of K-12 as it has historically.
- Introduction to Teaching as a Profession: Standard 2.3 was edited to correct a standard reference from 3.2 to 2.2 within the standard.
- Teaching as a Profession II: Standard 5.1 was revised to remove the words "national standards." Standard 5.2 was revised to remove the words "performance indicators."
- Teaching as Profession Practicum: Standard 5.3 was revised to expand the age range from age 9 to 21 to age three to 21.
- Introduction to Business and Marketing: Standard 1.6 was revised to replace FCCLA and SkillsUSA with DECA and FBLA.

Below are the career clusters with revised course standards.

^{*}Indicates a proposed new course

Advanced Manufacturing	
Principles of Manufacturing	Revised standards
Introduction to Industrial Maintenance	Revised standards
Principles of Machining I	Revised standards
Digital Electronics	Revised standards
Welding I	Revised standards
Advanced Industrial Maintenance	Edited spelling and grammar
Manufacturing Practicum	Edited spelling and grammar
Principles of Machining II	Edited spelling and grammar
Mechatronics I	Edited spelling and grammar
Mechatronics II	Edited spelling and grammar
Robotics and Automated Systems	Edited spelling and grammar
Welding II	Edited spelling and grammar
Agriculture, Food, and Natural Resources Career Cluster	
Agriscience	Revised standards
Applied Environmental Science	Revised standards
Meat Science I	Revised standards
Natural Resource Management	Revised standards
Principles of Agricultural Mechanics	Revised standards
Principles of Farm and Agribusiness Management	Revised standards
Principles of Food Production	Revised standards
Principles of Plant Science and Hydroculture	Revised standards
Small Animal Science Technologies	Revised standards

Preparing for the ACT, Postsecondary, and Career	Revised Standards	

The Fiscal Analysis Impact:

T.C.A. § 49-1-212 requires that the Department prepare a fiscal analysis of any policy, rule, or regulation proposed to the State Board of Education. This item has no financial impact on an LEA.

Connection to the Master Plan:

This item supports the State Board's strategic focus on postsecondary and career outlined in the Master Plan by ensuring that students develop and demonstrate readiness for their postsecondary or career plans.

The Recommendation:

The Department of Education recommends approval of this item on final reading. The SBE staff concurs with this recommendation.
