Summary and Recommendation: Barbering and Cosmetology in Tennessee is an Important, Growing, and Increasingly Specialized Industry

Most people across diverse demographics and communities interact with the cosmetology and barbering industry, whether that be an occasional haircut or pedicure or regular styling. Nationwide, the barbering and cosmetology industry has been growing—demand for basic hair, nail, and skincare services, along with specialty services, is increasing. Given the national trend, stakeholders expressed interest in a study of the industry in Tennessee. In response, Public Chapter 102, Acts of 2025, directed the Tennessee Advisory Commission on Intergovernmental Relations to study the economic effect of the cosmetology and barbering professions in Tennessee, including the revenue generated through services provided and retail sales, the number of jobs generated by the professions, training and education opportunities, and potential barriers to entry into the industry (see appendix A). The report identifies and focuses on two important nationwide trends in the industry: overall growth and specialization.

The cosmetology and barbering industry is growing nationally and in Tennessee.

Nationally, the barbering and cosmetology industry—often called the beauty or salon industry—is growing. The Professional Beauty Association, a national organization that tracks data for the salon industry,¹ estimates that from 2018 to 2022, total salon industry revenue increased 29.6%, totaling \$81.8 billion in 2022. Employment is also increasing. According to the US Bureau of Labor Statistics (BLS), overall barber, cosmetologist, and hairstylist employment is projected to increase 5% between 2024 and 2034, faster than the average 3% growth for total employment. These estimates likely don't represent the entire industry because within the industry many workers are self-employed and not reported as employees—the BLS estimates that, nationwide, 48% of cosmetologists, hairdressers, and hairstylists and 76% of barbers were self-employed in 2024. Further, tips and private business revenues are a substantial part of income for these professionals, and underreporting is common.

Tennessee is seeing a similar trend in the cosmetology and barbering industry—revenue generated by the industry has increased in recent years. The Professional Beauty

¹ The salon industry includes beauty salons and spas, nail salons, and barber shops. This report does not address some services offered at spas, such as massages or microneedling, that are not regulated by the Tennessee Board of Cosmetology and Barber Examiners.

Association estimated that the salon industry in Tennessee generated \$1.8 billion in total revenue in 2022, a 38.5% increase from \$1.3 billion in 2019. Data provided by the Tennessee Department of Revenue show that business gross sales revenue and state and local tax revenue from beauty supply shops, barber shops, beauty and nail salons, and barber and cosmetology schools has increased since 2019.² License fees—including for individual, shop, and school licenses—collected by the state Board of Cosmetology and Barber Examiners, which regulates the barbering and cosmetology professions—have also increased.³ See table 1.

**Table 1. Summary of Estimated Total Revenue
Fiscal Year 2018-19 Compared to Fiscal Year 2023-24**

Revenue Source	Fiscal Year 2018-19	Fiscal Year 2023-24	Percent Change
Business gross sales*	\$ 766,932,647	\$ 1,012,627,282	32.0%
State and local taxes	35,291,430	75,697,127	114.5%
License fees	2,841,135	3,223,645	13.5%
Total	\$805,065,212	\$ 1,091,548,054	35.6%

*This data is based on tax filing years 2019 and 2024, typically calendar years.

Source: Emails from Jeff Bjarke, director of research, Tennessee Department of Revenue, August 27, September 29, and October 3, 2025; and Roxana Gumucio, executive director, Regulatory Boards Division, Tennessee Department of Commerce and Insurance, July 9, 2025.

In addition to revenue, the number of barber shops, beauty salons, employees, and wages have all increased (see table 2). The number of active licenses has also increased overall. As of July 2025, there were 91,610 active cosmetology and barbering licenses of all types issued by the Tennessee Board of Cosmetology and Barber Examiners—an increase of 22.2% since fiscal year 2018-19.

² Taxes include franchise, excise, and business tax revenue, as well as state and local sales tax on products sold, such as shampoo and conditioner. Most services, including cosmetology and barbering services, are not subject to sales tax in Tennessee, and not all cosmetology and barbering businesses are subject to franchise and excise taxes.

³ The Board also collects civil penalties assessed for violations. In fiscal year 2023-24, barbering and cosmetology civil penalties collected totaled \$220,987, a 33.1% increase since fiscal year 2018-19.

Table 2. Barber and Beauty Shops, Salons, Employees, and Wages, 2020 to 2024

	2020	2024	Percent Change
Barber Shops and Beauty Salons	1,052	1,124	6.8%
Employees	7,017	7,345	4.7%
Wages	\$201,947,733	\$291,245,497	44.2%

Note: This data does not include self-employed workers.

Source: Email from Martha Wettemann, statistical analyst supervisor, Tennessee Department of Labor and Workforce Development, September 22, 2025.

Enrollment and the number of graduates at Tennessee College of Applied Technology (TCAT) barbering and cosmetology programs have been increasing, reflecting interest in the professions and demand for the courses offered. At TCAT institutions offering barbering or cosmetology programs, between the 2018-19 and 2024-25 academic years, enrollment increased approximately 156.8%, with cosmetology programs experiencing the greatest overall increase compared to barbering and instructor programs, and graduates from the programs increased by 66.5%.

As the industry becomes more specialized, the state can continue to update licensing requirements in line with this trend.

Along with growth, services within the industry have been specializing. In 2024, one professional school said, “In the future, specialization will be a key driver for success in cosmetology. . . . With specialized skills, cosmetologists can cater to niche markets and offer premium services, which often come with higher income potential.” Full-service cosmetology shops are not as common as they were in the past—there are now more specialty shops focusing on specific services, such as nails, facials, eyelashes, and hair styling. For example, according to a 2025 report by the Professional Beauty Association, nail salons are 23% of all salon establishments and increased the most between 2013 and 2023. Stakeholders in Tennessee and other states agree that many professionals want to focus on one service, and shops are more specialized than they were in the past.

To work in any of the disciplines within cosmetology and barbering in Tennessee, you must have a license issued by the Tennessee Board of Cosmetology and Barber Examiners. The Board regulates both the barbering and cosmetology professions to protect public health, safety, and welfare of consumers in the state. Under the current licensing structure, those who want to work in the industry can either complete the full 1,500-hour master barbering or cosmetology curriculum and pass the theory and practical exams to obtain a master barber or cosmetology license—which authorizes them to provide most types of services in the industry—or they can complete a separate focused

curriculum that has been established for some of the disciplines within the industry and pass the theory and practical exam for that discipline. Tennessee, like other states, has established separate licenses and schools for nails, aesthetics, natural hair styling, and eyelashes and a certificate for hair braiding. The education requirements for the existing specialty licenses are:

- Barber technician – 340 hours (established 1986)
- Aesthetician – 750 hours (established 1987)
- Manicurist – 600 hours (established 1988)
- Natural hair stylist – 300 hours (established 1996)
- Hair braiding certificate – 16 hours (established 2019)
- Eyelash specialist – 300 hours (established 2023)

Hair styling, however, is a popular service for which the state has not established a separate license. Hair styling includes both natural and chemical hair-focused services such as cuts and coloring. One TCAT instructor said 90% to 95% of cosmetology students want to work only on hair and suggested a hair-focused license.

Although there are tradeoffs to specialized licenses—for example, they don't allow the licensee to offer other types of services and might not be transferable to other states—rather than having to complete the full cosmetology licensure requirements, they do allow people to focus on their interests, save money and time on education, and get to work more quickly. In an industry that is already becoming more specialized, aligning state requirements with this specialization can be beneficial. The board of cosmetology and barber examiners' executive director said that offering a "specific license welcomes individuals who only want to offer that service and get it done quickly," and she didn't express concerns with a separate hair license. Similarly, a representative for the Professional Beauty Association said they are not opposed to specialty licenses if it makes sense and seems helpful.

Sixteen other states have separate hair styling, hair designing, or hairdresser licenses. The required hours for hair-focused licenses range from 600 to 1,650; the average is about 1,000 hours. An Oregon licensing representative said that with specialty licenses, "clients can feel more confident about who they're going to. [It] also helps keep up with the growing demand for beauty services and makes the whole system more efficient." A representative from West Virginia said the creation of the hairstylist license in that state has provided another opportunity for students who only want to do hair styling and has not had a negative effect.

While Tennessee has adapted to the evolving specialization of barbering and cosmetology professions by establishing licenses for specific disciplines, it has not established a specialty license for hair styling. A hair-specific license would provide an option that would require less money and time for people who are interested in providing natural and chemical hair services but not the other services included in the barbering and cosmetology licenses. **Therefore, the commission recommends the state establish a hair styling license focused only on hair-related services that requires fewer hours of education than the existing cosmetology and master barber licenses.**

DRAFT

Analysis: Evaluating the Economic Impact and Licensing of Barbering and Cosmetology Professions in Tennessee

The barbering and cosmetology industry plays an important role in the American economy. The professionals who work in the industry—whether they are styling hair, giving a manicure or a facial, or extending eyelashes—learn specialized skills and provide services that are in high demand. Not only does the industry provide jobs, but as noted by the Professional Beauty Association, a national organization that tracks data for the industry, it also provides opportunities for individuals to start their own businesses.⁴ Ultimately, its effect on communities and the wider economy can be measured by the number of shops, salons, and jobs it supports, as well as the revenue it generates.⁵

Nationally, the barbering and cosmetology industry—often called the beauty or salon industry—is growing in response to demand for basic hair services, including hair treatments like coloring and straightening and other specialty services like manicures, pedicures, and skincare.⁶ According to the Professional Beauty Association, from 2018 to 2022, the number of establishments increased an estimated 10.7%, and total revenue—including from salons that pay employees through payroll and people who are self-employed—increased an estimated 29.6%, totaling \$81.8 billion in 2022.⁷ In fact, this revenue estimate for the industry might be low because tips and private business revenues are a substantial part of income for these professionals, and underreporting is common.⁸

Employment in the industry is also increasing. According to the US Bureau of Labor Statistics (BLS), overall barber, cosmetologist, and hairstylist employment is projected to

⁴ Professional Beauty Association 2025c.

⁵ Pham and Donovan 2019.

⁶ US Bureau of Labor Statistics 2025a.

⁷ The salon industry includes beauty salons and spas (69%), nail salons (19%), and barber shops (12%). This report does not address some services offered at spas, such as massages or tanning services (11%), that are not regulated by the Tennessee Board of Cosmetology and Barber Examiners. Professional Beauty Association 2020; and Professional Beauty Association 2025b.

⁸ Kleiner 2006; and interview with Maura Scali-Sheahan, chief executive officer, National Association of Barber Boards of America, July 8, 2025. In 2025, Congress passed the 45B FICA Tip Tax Credit, providing beauty industry employers with a dollar-for-dollar tax credit on the employer portion of FICA taxes paid on employee tips—as restaurant employers have received since 1993—which will help encourage reporting tips as income. See Professional Beauty Association 2025a.

increase 5% between 2024 and 2034, faster than the average 3% growth for total employment.⁹ These BLS estimates also likely don't represent the full number of individuals working in the industry, because within the industry many workers are self-employed and not reported as employees—the BLS estimates that, nationwide, 48% of cosmetologists, hairdressers, and hairstylists and 76% of barbers were self-employed in 2024.¹⁰

Given the national trend, stakeholders expressed interest in a study of the industry in Tennessee. In response, Public Chapter 102, Acts of 2025, directed the Tennessee Advisory Commission on Intergovernmental Relations to study the economic effect of the cosmetology and barbering professions in Tennessee (see appendix A). The study includes the revenue generated through services provided and retail sales, the number of jobs generated by the professions, training and education opportunities, and potential barriers to entry into the industry.

Aligning with national trends, the cosmetology and barbering industry has been growing in Tennessee.

Tennessee is seeing a similar trend of growth in the barbering and cosmetology industry, while the industry continues to recover from the effects of the COVID-19 pandemic.¹¹ Revenue generated by the industry, wages, and employment have increased in recent years, and the number of barber shops, beauty salons, and licenses also reflect overall growth in the state. Enrollment and the number of graduates at Tennessee College of Applied Technology (TCAT) barbering and cosmetology programs have been increasing, showing interest in the professions and demand for the courses offered.

Business Gross Sales, Tax, and License Fee Revenue

The Professional Beauty Association has estimated that the salon industry in Tennessee generated \$1.8 billion in total revenue in calendar year 2022, a 38.5% increase from \$1.3 billion in 2019.¹² Data provided by state agencies shows that overall revenue for the barbering and cosmetology industry in Tennessee—including business gross sales, state and local taxes, and license fees—increased 35.6% between fiscal years 2018-19 and 2023-24, totaling an estimated \$1.1 billion in fiscal year 2023-24. Business gross sales account

⁹ US Bureau of Labor Statistics 2025b.

¹¹ Professional Beauty Association 2025c.

¹² Professional Beauty Association 2020b; and Professional Beauty Association 2025c.

for most of this revenue and increased from \$766.9 million to \$1 billion—by 32.0%—between tax filing years (typically calendar years) 2019 and 2024. The Tennessee Department of Revenue provided additional detail on business gross sales, breaking down the data for beauty and nail salons and supply shops, barber shops, and private cosmetology and barber schools. During that time period, nail salons and supply shops, barber shops, and private cosmetology and barber schools saw overall increases in gross sales of between 5% and 80%, though beauty salons’ gross sales decreased by 3.8%. See tables 1 (reposted) and 3.

**Table 1 (reposted). Summary of Estimated Total Revenue
Fiscal Year 2018-19 Compared to Fiscal Year 2023-24**

Revenue Source	Fiscal Year 2018-19	Fiscal Year 2023-24	Percent Change
Business gross sales*	\$766,932,647	\$ 1,012,627,282	32.0%
State and local taxes	35,291,430	75,697,127	114.5%
License fees	2,841,135	3,223,645	13.5%
Total	\$805,065,212	\$ 1,091,548,054	35.6%

*This data is based on tax filing years 2019 and 2024, typically calendar years.

Source: Emails from Jeff Bjarke, director of research, Tennessee Department of Revenue, August 27, September 29, and October 3, 2025; and Roxana Gumucio, executive director, Regulatory Boards Division, Tennessee Department of Commerce and Insurance, July 9, 2025.

Table 3. Business Gross Sales, Tax Filing Years 2019 through 2024

Taxpayer	Tax Filing Year		Percent Change
	2019	2024	
Beauty Supply Shops	\$ 261,824,820	\$ 471,904,795	80.2%
Barber Shops	\$ 32,117,392	\$ 41,901,121	30.5%
Beauty Salons	330,425,361	317,811,885	-3.8%
Nail Salons	\$ 137,632,628	\$ 175,813,402	27.7%
Cosmetology and Barber Schools	\$ 4,932,446	\$ 5,196,079	5.3%
Total	\$ 766,932,647	\$1,012,627,282	32.0%

Note: Filing year 2018 is the earliest full year of data provided by the Tennessee Department of Revenue because of a data system change within the department in 2017. A filing year is typically a calendar year.

Source: Emails from Jeff Bjarke, director of research, Tennessee Department of Revenue, September 29, 2025.

Along with gross sales, tax revenue collections have been increasing. Between fiscal years 2018-19 and 2024-25, total state and local tax revenue from beauty supply shops, barber shops, beauty salons, nail salons, and cosmetology and barber schools went from \$35.3 million to \$75.7 million—a 114.5% increase (see table 4). This includes franchise, excise, and business tax revenue, as well as state and local sales tax on products sold, such as shampoo and conditioner. Most services, including cosmetology and barbering services, are not subject to sales tax in Tennessee, and not all cosmetology and barbering businesses are subject to franchise and excise taxes.¹³

	Total	\$ 29,189,716	\$ 67,829,166	132.4%
Barber Shops	State Sales Tax	\$ 208,731	\$ 200,071	-4.1%
	Local Option Sales Tax	71,670	73,560	2.6%
	Franchise and Excise Tax	43,735	142,210	225.2%
	Business Tax	81,587	158,978	94.9%
	Total	\$ 405,723	\$ 574,819	41.7%
Beauty Salons	State Sales Tax	2,669,964	2,730,129	2.3%
	Local Option Sales Tax	927,066	985,589	6.3%
	Franchise and Excise Tax	440,772	775,005	75.8%
	Business Tax	811,777	1,144,451	41.0%
	Total	\$ 4,849,580	\$ 5,635,174	16.2%
Nail Salons	State Sales Tax	\$ 42,927	\$ 60,273	40.4%
	Local Option Sales Tax	14,927	22,055	47.8%
	Franchise and Excise Tax	279,038	638,118	128.7%
	Business Tax	330,059	662,471	100.7%
	Total	\$ 666,951	\$ 1,382,917	107.3%
Cosmetology and Barber Schools	State Sales Tax	\$ 122,205	\$ 184,268	50.8%
	Local Option Sales Tax	44,826	71,447	59.4%
	Franchise and Excise Tax	1,690	2,395	41.7%
	Business Tax	10,741	16,941	57.7%
	Total	\$ 179,462	\$ 275,051	53.3%
Total All Taxes		\$ 35,291,430	\$ 75,697,127	114.5%

Note: Fiscal Year 2018-19 is the earliest full year of data provided by the Tennessee Department of Revenue because of a data system change within the department in 2017.

Source: Emails from Jeff Bjarke, director of research, Tennessee Department of Revenue, August 18 and August 27, 2025.

License fees—including for individual, shop, and school licenses—collected by the Tennessee Board of Cosmetology and Barber Examiners, which regulates the barbering and cosmetology professions—have also increased. For example, the Board collects fees for initial licenses and license renewals for master barbers, barber technicians, cosmetologists, manicurists, aestheticians, natural hair stylists, eyelash specialists, and instructors, and other fees for things like replacing lost licenses, issuing reciprocal licenses for professionals coming from other states, and change of ownership for a shop

or school.¹⁴ Overall, the revenue collected from license fees has increased by 13.5% between fiscal years 2018-19 and 2023-24, from \$2.8 million to \$3.2 million (see table 5). The only category for which fee revenue has decreased is barber shops—it decreased by 14.7%. The fee revenue includes penalties for late license renewals and late required reporting from schools. The Board also collects civil penalties assessed for violations—in fiscal year 2023-24, it collected barbering and cosmetology civil penalties totaling \$220,987.¹⁵

Table 5. License Fee Revenue, Fiscal Year 2018-19 Compared to Fiscal Year 2023-24

License Type		Fee Revenue		Percent Change
		Fiscal Year 2018-19	Fiscal Year 2023-24	
Barbering	Individual	\$ 224,935	\$ 235,610	4.7%
	Shop	115,005	98,150	-14.7%
	School	5,435	7,360	35.4%
Cosmetology	Individual	1,927,695	2,232,510	15.8%
	Shop	554,405	629,435	13.5%
	School	13,660	20,580	50.7%
Total		\$2,841,135	\$3,223,645	13.5%

Note: License fee revenue includes penalties for late license renewals and late required reporting from schools. Dual barber cosmetology licenses are included.

Source: Emails received from Roxana Gumucio, executive director, Regulatory Boards Division, Tennessee Department of Commerce and Insurance, July 9 and July 16, 2025.

Establishments, Employment, and Wages

According to the Tennessee Department of Labor and Workforce Development, barber shops, beauty salons, employees, and wages reported for the barbering and cosmetology industry increased from 2020 to 2024, despite the pandemic shutdown. Because this data does not include self-employed workers, it does not reflect a large number of individuals who work in the industry and the space they use to provide their services, often rented or leased suites. Further, because income in the industry often comes in the form of tips and private business revenue, which are both commonly underreported, the reported wages for the industry are likely low compared to actual wages. See tables 2 (reposted) and 6.

¹⁴ Rules of the Tennessee Board of Cosmetology and Barber Examiners, Chapter 0440-01-.13 and Chapter 0200-01-.11.

¹⁵ Emails received from Roxana Gumucio, executive director, Regulatory Boards Division, Tennessee Department of Commerce and Insurance, July 9 and July 16, 2025.

Employment within the industry is likely to continue growing. In 2025, the Tennessee Department of Labor and Workforce Development classified cosmetologists as in-demand occupations, meaning they are jobs that “Tennessee employers have a high demand to fill.” The department defines occupations as in-demand “when two of three measures of demand (job postings, projected job openings, and hires) are above the median relative to other occupations within the region.”¹⁶

Table 2 (reposted). Barber and Beauty Shops, Salons, Employees, and Wages 2020 Compared to 2024

	2020	2024	Percent Change
Barber Shops and Beauty Salons	1,052	1,124	6.8%
Employees	7,017	7,345	4.7%
Wages	\$201,947,733	\$291,245,497	44.2%

Note: This data does not include self-employed workers.

Active Licenses

Licensing trends provide insight into the evolving cosmetology and barbering professions in Tennessee. As of July 2025, there were 91,610 active cosmetology and barbering licenses of all types issued by the Tennessee Board of Cosmetology and Barber Examiners—an increase of 22.2% since fiscal year 2018-19 (see table 7). Active licenses include those that are expired but still within the three-year grace period.¹⁷ Individuals and businesses can have more than one license, and holding an active license does not necessarily mean that an individual or entity is practicing or operating.

¹⁷ Expired individual licenses that are within the three-year grace period can be renewed by paying a penalty. Email from Roxana Gumucio, executive director, Regulatory Boards Division, Tennessee Department of Commerce and Insurance, May 12, 2025.

Among the different license types, most have increased over the last 10 years, with aesthetician licenses seeing the greatest increase overall, while dual licenses for cosmetology and master barber shops, skincare shop licenses, and natural hairstylist licenses have had the largest percentage increases. Barber technician, barber shop, full-service cosmetology shop, and natural hair stylist shop licenses have decreased. Two licenses—cosmetologist/aesthetician and shampooist/manicurist—are being phased out, and the shampoo technician license was deregulated in 2017, meaning it can no longer be renewed. In addition, several new license and certificate types have been established: dual barber and dual cosmetology instructor were created in 2022,¹⁸ eyelash specialist was created in 2023,¹⁹ and a hair braiding certificate was created in 2019.²⁰ The aesthetician, manicurist, and natural hair licenses also provide opportunities to specialize.

Enrollment and Graduates of Tennessee College of Applied Technology Barbering and Cosmetology Programs and Enrollment through Career and Technical Education

Enrollment and graduation rates in barbering and cosmetology education programs offered at Tennessee Colleges of Applied Technology (TCATs) and through the Career and Technical Education (CTE) human services pathway have demonstrated consistent growth, reflecting an increased interest in and demand for careers in cosmetology and barbering. At TCAT institutions offering barbering or cosmetology programs, between the 2018-19 and 2024-25 academic years, enrollment in these programs increased approximately 156.8%, with cosmetology programs experiencing the greatest overall increase compared to barbering and instructor programs, and graduates from the programs increased by 66.5% (see tables 8 and 9). TACIR staff analysis of CTE enrollment showed a similar trend—enrollment in those cosmetology programs increased 29.5% and barbering programs by 166.4% between academic years 2018-19 and 2024-25.²¹

Trade Shows and Conferences

While trade shows and conferences can generate substantial economic benefits, they are held only sporadically in Tennessee. Further, the Tennessee Department of Tourist Development does not collect data on hair or beauty shows, making it difficult to evaluate their overall contribution to the state's economy.²² Individual events, however,

²² Interview with Josh Gibson, research director, Tennessee Department of Tourist Development, June 30, 2025.

demonstrate the potential effect these shows and conferences can have. For example, the Music City Center in Nashville hosted the Mary Kay Inc. Leadership conference in January 2023, drawing in 6,000 attendees and generating an estimated \$6.8 million in direct spending. Another conference is scheduled for 2026. In 2024, the Sport Clips National Huddle conference—also held at the Music City Center—attracted 3,700 attendees and an estimated \$2.5 million in direct spending.²³ In addition to the economic benefit, trade shows and conferences provide opportunities for industry professionals to network and update their skills through continuing education offered during the events.²⁴

The state Board of Cosmetology and Barber Examiners regulates the industry in Tennessee through licensing.

The Tennessee Board of Cosmetology and Barber Examiners safeguards public health, safety, and the welfare of consumers by regulating all professions encompassed under cosmetology and barbering through a licensing system. This regulation is especially important in the cosmetology and barbering industry because, compared to many other professions, it involves more skin-to-skin contact and personal interaction.²⁵ The regulated individuals and entities include cosmetologists, instructors, aestheticians, manicurists, natural hair stylists, hair braiders, eyelash specialists, cosmetology shops, master barbers, barber technicians, barber instructors, barber shops, and barber and cosmetology schools. These individuals, shops, and schools must all have a license issued by the Board to provide services in the state.²⁶ Individuals must complete required training and practical and theory exams to obtain their license and are required to pay fees for both the exams and license. Additionally, inspections are conducted to ensure that health and safety standards in schools and shops are maintained.²⁷ Tennessee’s regulation of the industry aligns with several other states,²⁸ and the state has adjusted to

the evolving industry, moving towards license specialization to allow individuals to focus on specific services, such as manicuring and aesthetics.

Tennessee requires training, exams, and fees for individuals seeking licenses in cosmetology, barbering, and specialty professions.

Tennessee requires individuals seeking licensure in cosmetology, barbering, and the various specialty professions within the industry to complete a specific number of training hours. Requirements to obtain a license for a specific profession—such as manicurist or aesthetician—in the industry vary, and individual license requirements are distinct from requirements to operate a shop or school. For example, to obtain a master barber or cosmetology individual license in Tennessee—which both include most of the specialties—the Board requires individuals to complete 1,500 hours of training.²⁹ For individuals who would like to focus on one kind of service, there are other options for licenses. These specialty licenses require fewer program hours than the full cosmetology or master barber license. Training requirements for other types of licenses include:

- Barber technician: 340 hours (established 1986)³⁰
- Aesthetician: 750 hours (established 1987)³¹
- Manicurist: 600 hours (established 1988)³²
- Natural hair stylist: 300 hours (established 1996)³³
- Eyelash specialist: 300 hours (established 2023)³⁴
- Instructor: 300 hours (must have already been licensed three years)³⁵
- Hair braiding certificate – 16 hours (established 2019)³⁶

Along with licenses, options for specialized cosmetology education have expanded. Legislation was passed in 2013 allowing schools to specialize in natural hair styling, manicuring, and aesthetics and authorizing the Board to promulgate rules for these schools.³⁷ This change allowed for more focused educational opportunities—if someone wants to open a private aesthetics school, for example, this law allows them to do so. Previously, schools only covered the full barbering and cosmetology curricula. The figure shows a timeline of relevant legislation since 1929 when the barber board was established.

³⁷ Public Chapter 447, Acts of 2013.

Examinations and licensure fees are required of all individuals as part of obtaining and maintaining their licenses.³⁸ To obtain a license of any type, individuals must complete the required education and pass both a practical and a theory exam, at a cost of \$67 each.³⁹ The Board contracts with PSI, a private testing company, to administer the exams.⁴⁰ Individuals must earn minimum licensure exam scores of 70% and must pass all exams no more than three years after passing the initial theory exam. After three years, they are required to retake and pass the initial theory examination again.⁴¹

The Board also collects fees for initial licenses and renewals.⁴² For individual practitioners, the fees are \$60 each for both initial licenses and renewals. For instructors, the initial license fee is \$80, and the renewal fee is \$70.⁴³ Individual practitioner and instructor licenses are renewed every two years.⁴⁴ Table 10 shows a few license fees collected by the Board. The Board is fully funded by fees and penalties it collects and does not receive funding from the state.⁴⁵

Tennessee's licensing of cosmetology and barbering professionals aligns with other states. All 50 states regulate the industry through licensing and training requirements,

fees, and minimum age requirements for licensure.⁴⁶ Although there is variation in the types of licenses offered and the number of hours of training required, Tennessee falls in the middle of the range in terms of requirements for its cosmetology and master barber licenses. Like 19 other states, Tennessee requires 1,500 hours of training to obtain a master barber license, while 22 states require fewer hours, and seven require more. In New York, the approved barber schools in the state determine the hours of training required. For cosmetology licenses, Tennessee is one of 26 states that requires 1,500 hours of training, while 11 require fewer hours, and 11 others require more. Two states—Alaska and Oregon—don’t have a cosmetology license.

Licensing requirements for shops and schools focus on safety and sanitation, along with additional requirements related to equipment, space, and reporting.

The requirements for licensure differ between shops, schools, and individuals. While individuals receive training on safety and sanitation, the primary requirements for shops and schools are different. Shops and schools are required to provide proper safety and

sanitation—similar to training and requirements for individuals—but in addition to that, they must also meet certain equipment, space, and reporting requirements. For example, other than specialty schools—ones that do not teach all services encompassed under a full cosmetology or master barber license but rather, only specific services—all schools must contain at least 2,200 square feet of instructional space.⁴⁷ Schools are required to publish admission policies and license requirements, submit regular reporting, and have enrollment and administrative processes. School licenses are renewed every year, and shop licenses are renewed every two years.⁴⁸ Separately, prospective shop owners and private schools are subject to the same requirements for obtaining business licenses as any other business in Tennessee.⁴⁹

Inspections are conducted to enforce regulations.

Inspections play an important role in enforcing barbering and cosmetology regulations and maintaining public health and safety standards across Tennessee. To ensure that license and sanitation requirements are met, state law requires that the Division of Regulatory Boards within the Tennessee Department of Commerce and Insurance assigns field inspectors to areas of the state to conduct inspections of new and existing businesses and investigate complaints for all regulatory boards within the department, including the Board of Cosmetology and Barber Examiners.⁵⁰ When entering a shop or school, inspectors check for a valid business license, individual licenses for professionals working in the shops and schools, and proper equipment and sanitation, completing a checklist (see appendix B) with a score that is required to be posted and visible to the public in the business. When field inspectors find a violation, they issue the business a notice of violation and submit a complaint to the regulatory board’s complaints division.⁵¹ Beginning in fiscal year 2025-26, the number of inspectors across all regulatory boards under the Department of Commerce and Insurance was reduced from 22 to 14, and the inspection schedule was changed from once a year to every two years.⁵²

⁵² Interview with Don McCormick, executive director, Regulatory Boards Investigations and Fields Enforcement Unit, Tennessee Department of Commerce and Insurance, June 27, 2025.

The Board tries to resolve complaints with the businesses before ordering corrective actions or assessing penalties. For complaints submitted by inspectors—called administrative complaints—shops are only re-inspected if a concern remains, for example if corrective action isn't taken by the business. The public also can submit complaints to the division through an online portal. They are reviewed using the same process as inspectors' complaints. For these complaints—called consumer complaints—inspectors return to the business to check whether it completed the corrective action.⁵³ For both administrative and consumer complaints, the Board uses an agreed citation schedule with five levels of offenses to determine the course of disciplinary action, if any. Disciplinary actions range from correcting the violation or paying a fine to license suspension or in rare situations, license revocation. The most common complaints involve expired licenses and improper sanitation practices, and many complaints received are found to be outside of what the Board regulates—for example, poor customer service or a service regulated by a different agency.⁵⁴ Complaints resulting in disciplinary action have been less than 1% of the total number of active licenses each year since fiscal year 2018-19.⁵⁵

While Tennessee has adapted to specialization within the industry with specialty licenses, it does not have a hair styling license focused only on hair-related services.

The cosmetology and barbering industry has evolved over time, shifting toward specialization. Full cosmetology shops offering all services are not as common as they were in the past—now there are specialty shops focusing on specific services, such as nails, facials, eyelashes, and hair styling. As observed by one professional school, “In the future, specialization will be a key driver for success in cosmetology. . . . With specialized skills, cosmetologists can cater to niche markets and offer premium services, which often come with higher income potential.”⁵⁶ When asked about industry trends, a licensing representative from West Virginia told commission staff that “we do see a lot of salons or shops that are specifically targeted towards one of the disciplines—either hair, skin, or nails. There are still a lot of salons that will offer all services, but I have noticed salons becoming more specialized in certain areas over the last seven years that I have been

here.”⁵⁷ For example, according to the Professional Beauty Association’s 2025 report on the national salon industry, nail salons make up 23% of all salon establishments and increased the most between 2013 and 2023. Nationwide, over the next 10 years, in addition to the growth in cosmetology jobs, manicurist jobs are projected to grow by 16% and skincare jobs by 40%.⁵⁸ Some instructors in Tennessee similarly agree that a lot of people entering the industry want to focus on one service, like hair or nails, and salons have become specialized.⁵⁹ The change in licensing numbers in the state also illustrates the trend—between fiscal year 2018-19 and 2024-25, the amount of total licenses issued across all types increased 22.2% (see table 7).

Specialty licenses can be beneficial in helping individuals focus on specific interests, saving them both time and money in completing their education and more quickly starting their careers.⁶⁰ A representative of the Professional Beauty Association said the organization is generally not opposed to specialty licenses if it makes sense and seems helpful.⁶¹ In addition to the full cosmetology program, in Tennessee and other states, professional cosmetology schools also offer shorter and more affordable programs such as nail treatment, skincare, and hair styling designed to teach specific skills to work in the beauty industry.⁶²

Like other states, Tennessee has adapted to specialization within the industry by establishing several specialty licenses and authorizing specialty schools, including nails, aesthetics, natural hair styling, and eyelashes, along with a certificate for hair braiding. Under the current licensing structure, an individual who wants to provide only hair services is required to complete the full 1,500-hour barbering or cosmetology curriculum and pass the theory and practical exams to obtain a barber or cosmetology license, which includes services such as hair, nails, skin, eyelashes, and waxing.⁶³ Because the curricula

cover all types of services, less time is spent focusing on each individual type of service. A 1,500-hour program is also likely to cost more than a program with fewer hours.⁶⁴ Hair styling, however, is a specialty license that has not been established in Tennessee.

The executive director of the Tennessee Board of Cosmetology and Barber Examiners said she does not see an issue with having a separate hair license—specific licenses welcome individuals who know they only want to offer one service and help them complete licensure training more quickly.⁶⁵ And a new specialty license for hair styling could be popular in Tennessee. One TCAT instructor estimated that 90 to 95% of cosmetology students only want to do hair and do not want to do nails or skincare services and suggested a 1,200-hour requirement for a hair-focused license.⁶⁶

Sixteen other states have separate hair styling, hair designing, or hairdresser licenses.⁶⁷ The required hours for hair-focused licenses in those states range from 600 to 1,650, with the average being about 1,000 hours. One state, Maryland, in addition to its limited hairstylist license (1,200 hours), has a limited blow dry stylist license that requires 350 hours, and Utah has a haircutting permit requiring 150 hours, in addition to its master hair designer license (1,000 hours). Two states, Alaska and Oregon, eliminated the cosmetology license and offer only specialty licenses; Alaska requires 1,650 hours for its hairdresser license, and Oregon requires 1,110 hours for its hair design license. An Oregon licensing representative said that with the specialty license, “it’s easier to tell whether a license is active, inactive, or expired—requiring licensees to stay on top of their credentials, and clients can feel more confident about who they’re going to. [It] also helps keep up with the growing demand for beauty services and makes the whole system more efficient.”⁶⁸ A representative from West Virginia said they did not think the creation of

the hairstylist license and program in the state has had a negative effect and has provided another opportunity for students who only want to do hair styling.⁶⁹

There are tradeoffs to having specialty licenses, including hair stylist licenses. They limit people to working on one type of service provision—for example, a hair stylist license limits people to working only on hair. Additionally, someone who moves to another state might need to retake at least part of their training and exams in that state to obtain the specific type of license offered there. The executive director of the Wyoming Board of Cosmetology said that while they have not seen negative effects from their hair stylist license, because not all states have hair stylist licenses, it is important to let people know that their license might not be transferable to another state.⁷⁰ A representative from Georgia said that although sometimes students change their mind—mostly master cosmetology apprentices who decide they would rather study for one exam area, like hair design—the hair design license has been a good option in their state.⁷¹

States, including Tennessee, have laws that allow people to move between states and transfer their license if they meet certain criteria. The laws and requirements vary by state. In general, industry representatives advocate improving reciprocity between states.⁷² To further support mobility within the industry, in 2022, the Council of State Governments and US Department of Defense partnered to create an interstate agreement called the Cosmetology Licensure Compact. The Compact is designed to enable cosmetologists to obtain a multistate license to practice in any state that has joined the Compact, rather than an individual having to obtain a new license in each state they want to practice in.⁷³ The language of the Compact must be the same in every state. Tennessee

⁷³ Cosmetology Compact “Cosmetology Licensure Compact, About.”

enacted and joined the Cosmetology Licensure Compact in 2024;⁷⁴ as of 2025, ten states have passed legislation to join the compact,⁷⁵ and four states have pending legislation.⁷⁶

There are several education and financial aid options available to individuals to complete their training hours for licensure.

There are several educational pathways available for individuals seeking to complete the required training hours to obtain a master barber or barber technician license, cosmetology license, or specialty license in Tennessee. Individuals have the option to attend one of Tennessee’s Colleges of Applied Technology (TCAT) or a private school offering barbering or cosmetology training programs. The Tennessee Department of Education’s Career and Technical Education program and dual enrollment courses provide opportunities for high school students, and apprenticeships and programs in correctional facilities are alternatives for adults. Financial aid is available for some programs.

Tennessee Colleges of Applied Technology and Private School Programs

The Tennessee Board of Regents offers barbering or cosmetology training options through 19 of its 23 Tennessee Colleges of Applied Technology (TCATs). Some TCATs offer programs at more than one location, and some also offer manicuring, aesthetics, or barbering and cosmetology instructor programs.⁷⁷ Including a new barbering program that started in Dickson and a new cosmetology program that started in Pulaski in January 2026,⁷⁸ four locations offer barbering, and 27 offer cosmetology, including a program in Hartsville that is solely dual enrollment (see map 1 and appendix C). For cosmetology programs the average tuition cost for students is \$5,499, and the average cost of books and materials is \$1,848. For barbering programs, the average tuition cost is \$5,495, and the average cost of books and materials is \$1,972.⁷⁹

⁷⁹ Email from Tachaka Hollins, assistant vice chancellor for academic affairs, Tennessee Board of Regents, September 30, 2025.

In addition to the programs offered by TCATs, individuals may also choose to attend one of the state’s 156 currently licensed private schools (see map 2).⁸⁰ The private barbering, cosmetology, and specialty schools are listed on the Board of Cosmetology and Barber Examiner’s website.⁸¹ On average, private school tuition ranges between \$20,000 and \$25,000.⁸²

Map 1. TCAT Barbering and Cosmetology Programs

Note: Some colleges offer programs at more than one location. The cosmetology program at the TCAT Hartsville location in Macon County is dual enrollment only. The barbering program at the TCAT Dickson location in Montgomery County and the cosmetology program at the TCAT Pulaski location in Giles County started in January 2026.

funded beginning in 9th grade.⁸⁴ Dual enrollment courses focus on attempting to lower the overall cost of college, while CTE aims to bridge the gap between education and workforce needs. Although both dual enrollment courses and the CTE pathway are options for high school students, it is not required after completing the CTE pathway to attend postsecondary schooling like it is for dual enrollment to complete their program in its entirety, as the CTE pathway can be completed by the time an individual graduates high school.⁸⁵ There were 35 high schools offering dual enrollment in cosmetology during academic year 2023-2024 (see appendix D).

Apprenticeships

Since 2013, any licensed school with a cosmetology or barbering program—including TCATs and private schools—is authorized to develop courses of instruction and practice for an apprenticeship program. These apprenticeship programs offer an option for individuals to complete a portion of their required training hours in a shop or salon as opposed to fully completing them in a school.⁸⁶ Apprentices complete half of the hours required for a specific license through classroom instruction and the second half under the direct supervision and responsible charge of a licensed professional; the supervising professional, school, and shop must meet certain requirements to participate in the apprenticeship program.⁸⁷ Since 2015, Tennessee has set a limit of one apprentice per supervising licensed professional; however, new rules effective December 2025, increased the limit to three apprentices, though the supervising licensed professional can only provide supervised instruction to one student at a time.⁸⁸ Several stakeholders said that while apprenticeships are helpful in filling the skills gap to prepare students for work, there are challenges with finding a licensed cosmetologist or master barber that has the time, teaching experience, and desire to teach an apprentice while also working with clients in a shop.⁸⁹

⁸⁹ Interviews with Christina Heard, senior cosmetology instructor, TCAT Nashville, June 13, 2025; Craig Charles, owner, Crown Cutz Academy, June 17, 2025; and Chelsea Joffray, owner, The Hideout and Hideaway Academy, September 5, 2025.

Programs in Correctional Facilities

Several Tennessee Department of Correction (TDOC) prisons and one county jail offer programs for inmates who want to take barbering or cosmetology courses, and an inmate who completes the programs can be licensed by the board of cosmetology and barbering while still incarcerated. TDOC offers barbering programs at two of its prisons: Northwest Correctional Complex and Bledsoe County Correctional Complex. Cosmetology is offered at four prisons: Turney Industrial Complex, West Tennessee Rehabilitation Center, and Debra K. Johnson Rehabilitation Center, and Bledsoe County Correctional Facility.⁹⁰ One county jail, the Shelby County Division of Corrections, has a program where inmates can earn their master barber license while incarcerated.⁹¹ Stakeholders say the programs have been successful and have waitlists. Facilities use risk needs assessments to determine which program an inmate is placed into, depending on their history and needs. For example, if an individual has a history of substance abuse, they might be placed in a behavioral substance abuse class instead of a barbering or cosmetology program.⁹²

Anyone who has been convicted of a felony within the last three years is required to disclose this to the Board of Cosmetology and Barber Examiners, as required on all initial applications for boards falling under the Tennessee Department of Commerce and Insurance's Regulatory Boards Division. If an individual discloses "yes," they are required to provide a written statement about the conviction and a letter of recommendation. The Board approves their licenses once the individual signs an order for a probationary two-year period. This is how the Board can protect the public if a violation were to come up during those two years.⁹³

Financial Aid Opportunities

Several financial aid options are available to barbering and cosmetology students enrolled at TCATs and private schools, helping alleviate the cost of attendance and

⁹³ Email from Roxana Gumucio, executive director, Regulatory Boards Division, Tennessee Department of Commerce and Insurance, October 3, 2025.

expand access to the programs.⁹⁴ Some options are specific to TCATs, community colleges, or four-year institutions, and some are available to individuals attending private schools. Private schools must be accredited to qualify for financial aid and in operation for two years before they can be eligible for accreditation.⁹⁵ Even if they are accredited, they qualify for less financial aid than TCATs. Table 11 is a summary of financial aid options for TCATs and private schools in the state.

Proposed legislation has sought to create more options for using financial aid at private postsecondary institutions, including those with barbering or cosmetology programs. During the 113th General Assembly, Senate Bill 1752 by Senator Massy and House Bill 1809 by Representative Davis, would have allowed students to use Tennessee Promise scholarships at private schools offering barbering or cosmetology programs, that are accredited by the National Accrediting Commission of Careers Arts and Sciences (NACCAS), and have been approved by the Board of Cosmetology and Barber Examiners to operate in this state for at least 10 consecutive years. The bill did not pass largely because of concerns about the fiscal note and the already limited funds in the Tennessee Promise Scholarship Special Reserve Account.⁹⁶ During the following General Assembly, in 2025, Senate Bill 803 by Senator Massey and House Bill 738 by Representative Parkinson, would also expand the Tennessee Promise scholarship to students enrolled at schools that are accredited by NACCAS and have been approved by the board to operate in this state for at least 10 consecutive years. Eligible students must have dual enrollment credit in cosmetology or barbering, and it must be determined that no enrollment spots for the student's desired program of study are available at a TCAT in the county in which the student resides. The bill did not pass in the Senate Education Committee mainly because of concerns regarding cost and limited funding.⁹⁷

Table 11. Financial Aid Opportunities for Education Programs

Program	Description	TCATs	Private Schools	Source
Tennessee Promise	This is a last-dollar scholarship that allows students graduating from Tennessee high schools to attend an eligible institution for up to five semesters at a Tennessee community college or four-year institution or eight trimesters at a TCAT, assuming they meet all the requirements.	Yes	Yes	https://www.collegefortn.org/tennessee-promise-scholarship/ https://www.tnachieves.org/tn-promise/eligible-institutions
TCAT Reconnect	This is specifically for adult students enrolled at a TCAT institution. It is available for eligible adults who want to pursue an associate degree, technical degree, or technical diploma at a Tennessee community college or TCAT. It can also be used at an eligible public or private college or university towards an eligible associate degree, but it is not a last-dollar grant.	Yes	Yes	https://tnreconnect.gov/Pay-For-College/Tennessee-Reconnect-TCAT-Grant
Wilder-Naifeh Technical Skills Grant	Students who are enrolled at a TCAT institution, are 18 years old, a Tennessee resident, and maintain satisfactory academic progress are eligible.	Yes	No	https://www.collegefortn.org/wilder-naifeh-technical-skills-grant/
Tennessee Student Assistance Award	This award provides non-repayable financial assistance to financially needy undergraduate students who are residents of Tennessee.	Yes	Yes	https://www.collegefortn.org/tennessee-financial-aid/tennessee-student-assistance-award/

Program	Description	TCATs	Private Schools	Source
Dual Enrollment Grants	These grants allow eligible high school juniors and seniors to take courses at a TCAT at no cost. They give students the opportunity to earn their initial technical credential or a semester of college credit tuition fee-free while still pursuing their high school diploma.	Yes	No	https://www.collegefortn.org/dualenrollment/
Federal Pell Grant	These grants are another form of financial aid that financially needy students attending accredited public or private institutions are eligible for.	Yes	Yes	https://studentaid.gov/understand-aid/types/grants/pell

DRAFT

Appendix A: Public Chapter 102, Acts of 2025

State of Tennessee

PUBLIC CHAPTER NO. 102

HOUSE BILL NO. 862

By Representative Parkinson

Substituted for: Senate Bill No. 939

By Senator Briggs

AN ACT to amend Tennessee Code Annotated, Title 62, Chapter 3 and Title 62, Chapter 4, relative to the economic impact of the cosmetology and barbering professions.

BE IT ENACTED BY THE GENERAL ASSEMBLY OF THE STATE OF TENNESSEE:

SECTION 1.

(a) The Tennessee advisory commission on intergovernmental relations (TACIR) shall study the economic impact that the cosmetology and barbering professions have in this state, including revenue generated through the services provided and the number of jobs generated by the professions.

(b) TACIR may request information and input from the department of commerce and insurance and other appropriate state and local governmental entities, as necessary, and such entities shall comply with TACIR's request. The study must be conducted from TACIR's existing resources.

(c) Upon completion of the study required by subsection (a), TACIR shall report its findings and recommendations, including any proposed legislation, to the chair of the commerce and labor committee of the senate and the chair of the committee of the house of representatives having jurisdiction over cosmetology and barbering, and provide a copy of the report to the legislative librarian. The report may be delivered electronically.

SECTION 2. This act takes effect upon becoming a law, the public welfare requiring it.

HOUSE BILL NO. 862

PASSED: March 17, 2025

CAMERON SEXTON, SPEAKER
HOUSE OF REPRESENTATIVES

RANDY MCNALLY
SPEAKER OF THE SENATE

APPROVED this 23rd day of March 2025

BILL LEE, GOVERNOR
